Contents

Demographic change and a shortage of skilled workers have brought about an urgent need for more reflection and action on health-related aspects of work - due to both corporate and political responsibility. In addition, stress-related illness costs businesses and the state billions of euros.

Outline of syllabus:

- Legal basis
- The concept and objectives of a company health management
- Analyses in occupational health management
- Planning and implementation of measures of behavioural and structural prevention
- Quality assurance and project management
- Evaluation and health controlling (cost-effectiveness analysis)

Intended learning outcomes

The seminar provides the content (labor) psychology, health science, education, sociology and economics. Using examples, practical lectures and through the presentation of selected aspects in small groups, the students acquire the central components of a company health management.

Courses (type, number of weekly contact hours, language — if other than German)

- S (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- a) written examination (approx. 60 minutes) or b) written elaboration (approx. 15 pages) or c) presentation (approx. 25 minutes) d) oral examination (approx. 30 minutes)
