1 semester	undergraduate	--
<b>Contents</b>		
<p>This course is aimed at students of Wirtschaftsinformatik (Business Information Systems) and Wirtschaftswissenschaft (Business Management and Economics) interested in the topic. The course is divided up into two parts. In the theoretical part, students will acquire the necessary theoretical knowledge that will serve as a basis for the practical part. The practical exercise will present students with an opportunity to apply their newly acquired knowledge by working with an SAP Business ByDesign system on case studies on the model company Al-mika. In this context, the human resources, purchasing, sales, service, project management and finance departments will be dealt with.</p> <p>The course will introduce students to business processes of an ERP system (Enterprise Resource Planning) using the example of SAP Business ByDesign. In addition to the basic principles, students will also become familiar with the processes and functionalities.</p>		
<b>Intended learning outcomes</b>		
<p>After completing the course, the students will be able to</p> <ol style="list-style-type: none"> <li>1. reflect technical principles and operational models of ERP systems,</li> <li>2. understand the functionality of ERP systems and</li> <li>3. perform and understand business processes within the ERP system SAP Business ByDesign.</li> </ol>
