<b>Contents</b>		
This module discusses relevant principles, concepts and applications of business information processing and its impact on organisational and process structures in today's business world.		
<b>Intended learning outcomes</b>		
The expertise gained from other modules related to business management issues can be interpreted and classified in a certain way by participating in this module. For decisions in regards to human resources planning, investment, and a company's strategy, the students will get to know all the relevant concepts and interdependencies, which come with taking information processing into account as the so called "fourth" factor of production.
