Contents		
<p>Data protection law:</p> <p>The course provides a systematic overview of key aspects of German and European data protection laws specifically in relation to IT and internet issues. The course will use numerous practical examples and exercises from the areas of IT and internet to illustrate the respective contents.</p> <p>Outline of syllabus:</p> <ul style="list-style-type: none"> · Principles and historical development of data protection law · Legal goals of data protection law · Statutory powers for data use · Privacy policy regarding IT and internet issues · Privacy regarding IT outsourcing · Privacy and marketing · Consequences of data breaches · Rights of the person concerned · Employee data protection · Outlook on the forthcoming EU Data Protection Regulation <p>Media law:</p> <p>The course will first address the classification of the two areas of law in the legal system. In the section on media law, the course will focus on the basic principles of the right to report (press freedom, moral rights) and internet law. In addition, the course will discuss the basic principles of copyright with its manifestations in IT law. The section on trademark law will include a comprehensive overview of the law of intellectual property (patents, design rights, competition law aspects). This section will focus on the core area of trademark law: registration of trademarks, delineation of brands and trademarks, protection of trade marks, infringement of trademarks and law enforcement. The course will mainly work with cases.</p>
