## Contents

### Description:

The workshop discusses pioneering work and monographs in the field of international economics published in international journals. These works focus on the patterns of specialisation in the world economy, international competition between locations and its policy implications.

### Reading:

Current journal articles and/or monographs.

### Intended Learning Outcomes

The workshop is intended for advanced graduate students and doctoral candidates. Through detailed study of selected technical papers, students are introduced to the research front in the field of International Economics. Students acquire the ability to communicate complex technical papers to penetrate independently and understand the highly compact design of such studies. Thus, the workshop promotes particularly the ability to write their own work.

The workshop seminar-like character lives by the interaction of teachers with students. Students are systematically involved in the event, because they are asked to prepare brief summaries of the technical papers and present them in the reading workshop and actively participate in the work-up and detailed discussion of the essays in the events. The workshop trains both analytical skills and an understanding of the respective current application questions.
