5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
<p>The module provides an overview of strategic implications of digital technologies at the level of organisations, industries and value networks. To this end, concepts and frameworks from strategic technology management are applied to digital innovations and illustrated with numerous examples. In the accompanying exercise, case studies of well-known digital companies and their business models are analysed and discussed.</p>		
Intended learning outcomes		
<ul style="list-style-type: none"> - Understand theoretical concepts of strategy development and implementation in the context of digital technologies. - Apply different frames of reference and understand their strengths and weaknesses in the context of practical application. - Transfer the concepts to real business situations
