### Module description

#### Module title
- **Econometrics 1**

#### Abbreviation
- 12-M-OE1-182-m01

#### Module coordinator
- **unknown**

#### Module offered by
- Faculty of Business Management and Economics

#### ECTS
- **5**

#### Method of grading
- **numerical grade**

#### Only after succ. compl. of module(s)
- **--**

#### Duration
- **1 semester**

#### Module level
- **unknown**

#### Other prerequisites
- **--**

### Contents

**Description:**
This module deals with the basic concept and methodology of the ordinary least squares (OLS) regression model. In particular, model assumptions and properties are discussed and formally motivated. In addition, the module examines linear restrictions on the models explanatory variables as well as dummy variables and introduces tests to verify simple and multiple linear restrictions.

Linear algebra is used as formal aid.

**Outline of syllabus:**
1. Random variables
2. Important distributions
3. Point estimates
4. Simple linear regression model
5. Model assumptions
6. Model properties
7. Simple hypothesis tests
8. Multiple linear regression model
9. Linear restrictions
10. Dummy variables
11. Multiple hypothesis tests

### Intended learning outcomes

The students acquire knowledge of the basics, concepts and methods used in the classical linear regression model and understand the role of econometrics in science and data analysis. In particular, they learn how to analytically derive, calculate and interpret the coefficients, standard errors and p-values of a classic regression output of the multiple regression model. Furthermore, they are able to state and motivate formally the assumptions and properties of OLS and know how to deal with transformed and dummy variables. Additionally, students are able to test multiple linear restrictions on the parameters and are able to apply these tests to real economic, business and social science questions.

The competences acquired in this course serve as a prerequisite for "Econometrics II", "Econometrics III", "Microeconometrics" and "Financial Econometrics".

### Courses

(type, number of weekly contact hours, language — if other than German)

**V (2) + Ü (2)**

Module taught in: German (winter semester), English (summer semester)

### Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

**a) written examination (approx. 60 minutes) or b) term paper (approx. 15 pages)**

Language of assessment: German and/or English creditable for bonus

### Allocation of places
