### Module Title

**Econometrics 3**

#### Abbreviation

12-M-OE3-111-m01

### Module Coordinator

holder of the Chair of Econometrics

### Module Offered by

Faculty of Business Management and Economics

### Method of Grading

Only after succ. compl. of module(s)

### Contents

**Description:**

This module deals with advanced econometric methods and concepts based on the classical and the generalised least squares estimator discussed in Ökonometrie I and II (Econometrics I and II). In particular, this includes the instrumental variable (IV) estimator, the generalised method of moments (GMM) estimator, distributed lag models as well as basic methods and concepts used in uni and multivariate econometric times series analysis, including (non)stationarity, integration, cointegration. Linear algebra is used as formal aid.

**Outline of syllabus:**

1. Error-in-variables
2. IV estimation
3. Generalised least squares estimation
4. Distributed lag models
5. Stationary uni and multivariate processes
6. Deterministic and stochastic trends
7. Integrated and cointegrated processes

### Intended Learning Outcomes

The students acquire thorough understanding of advanced methods and concepts in econometrics. They are familiarized with diverse error-in-variables issues and capable of handling them appropriately. After the course, students understand the generalized methods of moment (GMM) and the instrumental variable (IV) estimator to an extent that they can discuss their pros and cons, apply these to selected questions in quantitative economics, and understand scientific papers using these methods. Furthermore, they become acquainted with selected time series issues, such as distributed lag models, non-stationarity, spurious correlation, and cointegrated processes, enabling them to conduct a comprehensive time series analysis. In brief, the course enables students to apply the above mentioned methods and concepts to real life questions, assess their appropriateness, and address their theoretical and practical benefits and shortcomings.

### Courses

V + Ü (no information on SWS (weekly contact hours) and course language available)

### Method of Assessment

a) written examination (approx. 60 minutes) or b) term paper (approx. 15 pages)

### Allocation of Places

--

### Additional Information

--

### Referred To In LPO I

(examination regulations for teaching-degree programmes)
