Module title: Optimal Tax Theory
Abbreviation: 12-M-OST-102-m01

Module coordinator: holder of the Chair of Public Finance
Module offered by: Faculty of Business Management and Economics

ECTS: 5
Method of grading: numerical grade
Only after succ. compl. of module(s): --
Duration: 1 semester
Module level: graduate
Other prerequisites: --

Contents:
The course will deal with the design of an optimal tax system. First, students will become familiar with the criteria that characterise an optimal tax system. Lectures will introduce students to key rules for taxing commodities as well as income and capital. Examining specific taxation issues such as the eco-tax, family taxation and the taxation of international enterprises, the course will then provide students with more in-depth insights into these rules.

Outline of syllabus:
1. Optimal commodity taxation
2. Optimal income taxation
3. Optimal taxation of families
4. International tax competition

Reading: lecture notes to be provided

Intended learning outcomes:
After completing this module students have a basic understanding of what is meant with "optimal taxation". They are able to apply this concept to specific normative questions of tax policy in practice. Students also learn to prepare and present short papers where they discuss specific normative policy issues.

Courses (type, number of weekly contact hours, language — if other than German):
V + Ü (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus):
written examination (approx. 60 minutes)

Allocation of places:
--

Additional information:
