## Module coordinator

holder of the Chair of Industrial Economics

## Module offered by

Faculty of Business Management and Economics

## ECTS

5

## Method of grading

numerical grade

## Only after succ. compl. of module(s)

--

## Duration

1 semester

## Module level

unknown

## Other prerequisites

--

## Contents

### Description:

This course discusses vertical contracts in supply chains and their impact on competition.

### Outline of syllabus:

1. The classic problem of double marginalisation and its solution by nonstandard contracts (resale price maintenance, nonlinear pricing (rebates), exclusive territories, exclusive dealing etc.)
2. Contracts for service
3. Common agency
4. The delegation principle
5. The commitment problem
6. Interlocking relationships
7. Foreclosure by vertical contracts or mergers

## Intended learning outcomes

After completing the course students are able to:

(i) explain the results of theoretical industrial economics on vertical contracts;
(ii) apply the involved methods to given simple examples on their own;
(iii) recognize, in which real life situations (and how) the results can be applied;
(iv) analyze the impact of certain vertical contracts on competition.

## Courses

(type, number of weekly contact hours, language — if other than German)

V (2)

Module taught in: English

## Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) written examination (approx. 60 to 120 minutes) or b) term paper (15 to 20 pages)

Assessment offered: In the semester in which the course is offered

Language of assessment: English

creditable for bonus
