| <p>Consolidation of business knowledge in virtually all functional areas (procurement/logistics, human resources, investment, finance, business planning, accounting etc.).</p> <p>The module should make participants aware of the fact that business decisions require joined-up thinking between the different functional areas. The companies that participants are confronted with are fictitious but very close to reality. Participants will learn to understand the complexity of these companies as well as the business solutions and techniques applied by them. For a simulated period of time, participants will be required to make autonomous decisions (in groups).</p> |                              |  |
| <b>Intended learning outcomes</b>   |                              |  |
| Students learn to apply the necessary data for corporate management methods and tools in concrete, simulated business situations.   |                              |  |
