Introduction to Economics - Minor

12-NW-EVWL-111-m01

Module coordinator
holder of the Chair of Monetary Policy and International Economics

Module offered by
Faculty of Business Management and Economics

ECTS 5
Method of grading numerical grade
Only after succ. compl. of module(s)

Duration 1 semester
Module level undergraduate
Other prerequisites --

Contents
The course offers basic insights into the principles of economics. We analyse how markets work, i.e. how consumers form their demand and how suppliers make production decisions. On the basis of first insights into market economies, we analyse why governments might want to intervene. In this context, we focus on monopoly, environmental issues and minimum wages in labour markets.

In addition to micro topics, we also focus on macroeconomic aspects and analyse why we observe business cycles (unemployment, inflation) and long term economic growth. We also address topics related to monetary and fiscal policy in the euro area.

Intended learning outcomes
The students have a basic knowledge of economics, with which they can analyze complex economic relationships. They can deal critically with current economic policy issues and make an independent judgment. In addition, elementary mathematical techniques for solving micro pores and macroeconomic models are mediated.

Courses (type, number of weekly contact hours, language — if other than German)
V + Ü (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)
written examination (approx. 60 minutes)

Allocation of places
