Contents		
Information literacy in an academic context: search strategies, resources, online searches, etc.		
Intended learning outcomes		
Students know what information is needed for what purpose. They are able to locate information that is relevant within their discipline(s) and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their papers.		
Courses (type, number of weekly contact hours, language – if other than German)
