Contents		
<p>Information literacy in an academic context:</p> <ul style="list-style-type: none"> - Search strategies and tools. - Using the library's electronic resources. - Resources for subjects offered by the Faculty of Arts: bibliographies, databases, catalogues, journals, reference books. - Online searches and search engines. - Overview of additional resources (eLearning etc.). - Reference management. Some sections of the module will focus on particular disciplines (wherever possible, on disciplines within in the Faculty of Arts). Although we will not discuss all subject-specific resources in class, students will become familiar with the resources for their two degree subjects in their independent study time. 		
Intended learning outcomes		
<p>Students know what information is needed for what purpose. They are able to locate information that is relevant within their disciplines and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. Students are able to manage and process the information they have found, using reference management software and eLearning tools. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their Bachelor's theses.</p>
