### Contents

Students gain insights into daily teaching practices or rather real life planning and creation of lessons. They learn about different, innovative, co-operative teaching and learning methods which are designed especially for their type of school. They devise own examples for lessons, and discuss and reflect upon them in a group. Emphasis is thus placed on subject specific didactical and methodological questions and their implementation.

### Intended learning outcomes

Students broaden their type of school specific methodological knowledge and build up methodological competencies. They have knowledge about different co-operative ways of teaching and learning and their optimal application in lessons. Students are able to take up a position concerning questions of planning lessons and to reflect upon that position from different points of view.
