Contents		
Students gain insights into daily teaching practices or rather real life planning and creation of lessons. They learn about different, innovative, co-operative teaching and learning methods which are interdisciplinary. They devise own examples for lessons, and discuss and reflect upon them in a group. Emphasis is thus placed on subject specific didactical and methodological questions and their implementation.		
Intended learning outcomes		
Students broaden their methodological knowledge and build up methodological competencies. They have knowledge about different co-operative ways of teaching and learning and their optimal application in lessons. Students are able to take up a position concerning questions of planning lessons and to reflect upon that position from different points of view.
