<b>Contents</b>		
<p>The module addresses transitions between different institutions of the education system and between different types of schools. This concerns the transition from elementary schools to secondary schools as well as the transition from preschool institutions to elementary schools to improve the permeability between different types of schools, up to the transition between high schools to university and college. The concept of "transition" is here-by theoretically elaborated, reflected critically, and practically implemented.</p>		
<b>Intended learning outcomes</b>		
<p>Students are able to put theoretical approaches of the concept "transition" holistically into practice and reflect upon practice theoretically. They are experienced at elaborating lesson concepts at the interface between the types of schools that flank a transition. They can attribute the different requirement profiles of specific lesson sequences and units to the transition matter and thus use them purposefully. In periods of teaching practice that take place in selected schools they can validate the theoretical knowledge practically.</p>
