1 semester	undergraduate	--
<b>Contents</b>		
Students will gain insights into the theory and praxis of empirical methods of classroom research. Using the example of a question and aided by working with literature, the research process is reconstructed from asking a question to evaluation and a personal, small, empirical data collection is going to be conducted.		
<b>Intended learning outcomes</b>		
Under guidance, students develop an empirical question and can by means of this question conduct an exemplary data collection. They will get to know empiricism with the help of a practical example of classroom research and become acquainted with the use of academic literature via examples from a specific empiric research area.
