<p>The students acquire subject-didactic competencies which exceed the requirements of the teaching degree programme. The module especially focuses on subject-didactic research methods and on the examination of current international subject-didactic research. Most of the lectures combine topics of various disciplines. In addition, they establish connections to scientific disciplines and educational sciences. Some exemplary topics might be: Qualitative and quantitative research methods in subject didactics; connections between subject didactics and educational sciences; interdisciplinary connections between subject didactics and scientific disciplines; closer connections between subject didactics and school practice; in-depth analyses of classes (e.g. video studies, "university classroom"); exploratory learning at extracurricular learning facilities (e.g. genetic engineering laboratory in Bayreuth, teaching-learning-laboratories (LLL); M!ND and SFZ (special needs centre), M!ND in Würzburg)</p>
