<p>The students carry out independent research to examine a complex question for their Master's thesis. In doing so, they are allowed to flexibly set their own priorities. All work groups of the subjects involved of both universities are available for the supervision of the Master's thesis. Therefore, the students can also write their Master's theses in an inter-university manner. They are integrated into research projects of the corresponding work groups. This enables them to experience how current research is almost always conducted in (inter-)national co-operation.</p>
