Content and Objectives of the Programme

The M.A.-programme in Egyptology is offered a research oriented programme. Its aim is to introduce the student to an in-depth-work with selected topics of Egyptology on an advanced level, to enable him to identify research problems and desiderates and to independently develop solutions on the basis of a sound overview of the ancient Egyptian culture. Through training these capabilities the foundations for a Ph.D. programme in Egyptology are laid.

The M.A.-programme in Egyptology focuses on independent and critical reflection of Egyptological research. Acquiring knowledge in certain fields within Egyptology is conditioned by this goal.

The M.A.-thesis demonstrates that the graduate is able to deal with a thematically limited Egyptological problem within a certain given time span according to the taught methods and according to scholarly standards. He or she has mostly independently written the thesis under limited supervision.

The internationally comparable degree in the field of Egyptology is the second degree within the consecutive Bachelor-Master's programme. Thus it qualifies for the start into a job outside the university. On the other hand it is the typical prerequisite for a ensuing Ph.D.-programme. In a colloquium the graduate has proved to be capable to defend his thesis in a scholarly discussion by applying scholarly methods.

The M.A.-programme in Egyptology typically aims at the profession of an Egyptologist who works in various research institutions, e. g. universities, academies, the German Archaeological Institute or Egyptian museums. To this end the studies for the Master's degree lays foundations for a Ph.D. which qualifies for scholarly work. However, graduates of this programme should also be trained or have skills for further education to work outside academia, e.g. in publishing houses, libraries, cultural management, media, tourism, museology, public relations, diplomatic service.

For an academic career the necessary methodological and Egyptological knowledge is taught in Egyptological modules. Egyptology is a subject which studies a great variety of sources and material remains stretching over 4000 years. Consequently it is impossible to introduce to all specialized fields of the subject equally thoroughly. Therefore in the programme students learn alongside the specialized basic Egyptological competence the methodological capability to make oneself familiar with a new Egyptological topic efficiently and quickly.
Abbreviations used

Course types: E = field trip, K = colloquium, O = conversatorium, P = placement/lab course, R = project, S = seminar, T = tutorial, Ü = exercise, V = lecture

Term: SS = summer semester, WS = winter semester

Methods of grading: NUM = numerical grade, B/NB = (not) successfully completed

Regulations: (L)ASPO = general academic and examination regulations (for teaching-degree programmes), FSB = subject-specific provisions, SFB = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

11-Jul-2011 (2011-56)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

**Contents**

On the basis of respective and presuppositional texts, particularities of Egyptian literature (topics, structure, intentions) as well as the related scientific discussion will be covered.

**Intended learning outcomes**

The objective of the module is that students are familiar in some depth with aspects of the Egyptian history of literature, the topics and contents of Egyptian literature and the issues of Egyptian research concerning the Egyptian literature. Students are able to sum up respective technical literature, to give a lecture on and critically evaluate the state of research concerning certain literary texts. They are able to word issues concerning problems of Egyptian literature independently and to develop and implement solution approaches.

**Contents**

The module provides students with reading matter and exegesis of difficult religious texts (two courses). The sources will basically be read in the Egyptian original, which is the reason why the courses of this module require skills of the Egyptian language. In order to participate in the courses successfully, students will practise the dealing with Egyptian original texts, because religious texts are usually very difficult to understand and require some skills.

**Intended learning outcomes**

The students are acquainted with sources of Egyptian religious history and with the current respective research.

### Contents
Current issues of Egyptology will be covered, the scientific discussion concerning the individual topic will be processed and critically examined on the basis of sources. The module serves the Egyptian prioritisation and specialisation. The Egyptian guest lectures that will be offered in the particular semester, are part of the module.

### Intended learning outcomes
The students have knowledge of current topics from the Egyptian research. Moreover, they are acquainted with the methodology, presentation types and critical ability of technical literature.

**Contents**

During the research colloquium, the candidates have to prove that they are able to present fundamental results of their theses in front of an expert audience orally and to apply skills they have acquired during their studies, this means to be familiar with the contexts of the audit field and to classify special issues into the contexts. Additionally, it is required that they have a broad fundamental knowledge.

**Intended learning outcomes**

Students have a broad basic knowledge and have the ability to present scientific results orally and linguistically adept. They are able to apply this knowledge and skills in their entirety.

**Courses**

K (no information on SWS (weekly contact hours) and course language available)
