Content and Objectives of the Programme

The Master of Music Education is a science-based professional degree programme. The research-oriented degree course establishes the basis for a professional career in Music Education Research and for higher qualified activities in the field of music communication.

The diversity of task fields related to the discipline of Music Education is considered and included in research-based training. Theoretical and practical skills in music performance and music education as well as practical and cultural aspects of music pedagogy lay the foundation for the valid discipline-based and individually differentiated training.

As a consequence, Music Education can be experienced as a versatile and interconnected subject that includes aspects of education and educational and cultural studies.

As Music Education has to fulfil varied communication tasks, graduates of this programme acquire sensitivity for the many facets of their subject and for constantly changing shapes of professional activity: they are encouraged to seek new paths and to place appropriate accents reflecting their own creativity and conceptual sustainability.

Corresponding modules support this aim, illuminating the spectrum of such areas of activity and professional engagement and examining them in greater depth in special courses. The degree course offers to study the whole range of the discipline as well as to set priority on specific focus areas to develop a subject-specific profile. The concept of the course is defined by the following fields: history of music education, music theory, music education practice, cultural management and networking, music education research, aspects of mediality and culturality, questions on interdisciplinarity.

The individually chosen specialized profile can be elicited in the documented modules in the transcript of records.

The Master's degree programme also fulfils requirements for an internationally recognised degree in the field of Music Education and represents a second qualification for professional work. At the same time, the programme represents a qualification for entry to a PhD programme related to Music Education Research or to other courses with musical, cultural, media-related or further pedagogical emphasis.

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

11-Jul-2011 (2011-63)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.
