Learning Outcomes

German contents and learning outcome available but not translated yet.

Wissenschaftliche Befähigung

- Die Absolventinnen und Absolventen verfügen über fundierte Kenntnisse auf verschiedenen Teilgebieten der Psychologie (Methodenlehre und Diagnostik; Geschichte der Psychologie, Entwicklungspsychologie; Physiologische und anatomische Grundlagen von Denken und Wahrnehmung, etc.).
- Die Absolventinnen und Absolventen besitzen forschungsmethodisches Wissen und die Fähigkeit, wissenschaftliche Erkenntnisse und Literatur zu vergleichen und einzuordnen.
- Die Absolventinnen und Absolventen sind in der Lage, wissenschaftliche Untersuchungen zu planen, durchzuführen und zu bewerten.
- Die Absolventinnen und Absolventen k\u00f6nnen die erworbenen methodischen F\u00e4higkeiten einsetzen, um die Ergebnisse empirischer Untersuchungen auszuwerten und daraus Schlussfolgerungen zu ziehen.
- Die Absolventinnen und Absolventen sind in der Lage, sich mithilfe von internationaler Fachliteratur in neue Aufgabengebiete einzuarbeiten und selbstständig Literatur für bislang unbekannte Fragestellungen zu recherchieren, zu interpretieren und zu bewerten.
- Die Absolventinnen und Absolventen sind befähigt, sich in neue psychologische Themengebiete und Fragestellungen durch die Recherche aktueller Forschungsergebnisse einzuarbeiten. Sie können diese Themen- und Fragestellungen unter verschiedenen Zielsetzungen bearbeiten, darstellen und analysieren.
- Die Absolventinnen und Absolventen sind in der Lage, Probleme und deren Lösungen zielgruppengerecht und auch in einer Fremdsprache aufzubereiten und darzustellen.

Befähigung zur Aufnahme einer Erwerbstätigkeit

- Die Absolventinnen und Absolventen verfügen über breites Wissen aus Grundlagenfächern der Psychologie und können diese auf reale Probleme anwenden.
- Die Absolventinnen und Absolventen können ihr Wissen und ihre Erkenntnisse einem Fachpublikum gegenüber darstellen und theoriegeleitet argumentieren.

Persönlichkeitsentwicklung

- Die Absolventinnen und Absolventen kennen die Regeln guter wissenschaftlicher Praxis und reflektieren ihr berufliches Handeln in Bezug auf diese.
- Die Absolventinnen und Absolventen sind in der Lage, konstruktiv und zielorientiert in einem heterogenen Team zusammen- zuarbeiten, unterschiedliche und abweichende Ansichten produktiv zur Zielerreichung zu nutzen und auftretende Konflikte zu lösen (Teamfähigkeit).

Befähigung zum gesellschaftlichen Engagement

- Die Absolventinnen und Absolventen können gesellschaftliche Diskussionen auf der Basis selbst recherchierter objektiver Daten bewerten und diskutieren.
- Die Absolventinnen und Absolventen können auf der Basis des erworbenen Wissens im gesellschaftlichen Diskurs begründet Position beziehen.
- Die Absolventinnen und Absolventen haben die Bereitschaft und Fähigkeit entwickelt, ihre Kompetenzen in partizipative Prozesse einzubringen und aktiv an Entscheidungen mitzuwirken.

Abbreviations used

Course types: $\mathbf{E} = \text{field trip}$, $\mathbf{K} = \text{colloquium}$, $\mathbf{O} = \text{conversatorium}$, $\mathbf{P} = \text{placement/lab course}$, $\mathbf{R} = \text{project}$, $\mathbf{S} = \text{seminar}$, $\mathbf{T} = \text{tutorial}$, $\ddot{\mathbf{U}} = \text{exercise}$, $\mathbf{V} = \text{lecture}$

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASP02015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

12-Aug-2015 (2015-108)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Contor	Contents				

Contents

In this module, the students acquire basic knowledge of the subject, phenomena, theories and methods of General Psychology. They become acquainted with the principles of human learning, action control, perception, attentiveness, concept formation, speech, memory and knowledge. In the seminar, the students gain knowledge of current research results of selected subdisciplines of General Psychology. In the practical part, they become familiar with experimental techniques of General Psychology.

Intended learning outcomes

This module enables the students to factor in findings of General Psychology when carrying out own actions as well as when dealing with applied psychological problems, for example when creating websites or learning environments. These factors might include findings about the principles of human attentiveness or human memory. Furthermore, they acquire competencies in planning, carrying out and evaluating scientific experiments. These competencies serve as a foundation for independent scientific work. In addition, the students learn to give scientific presentations and to write scientific reports.

Contents

In this module, the students acquire basic knowledge of the central psychological theories and findings of the research fields of motivation and emotion. The lecture comprises the subject areas, theories, methods, application and practice of Psychology of Motivation and Psychology of Emotion. The seminar elaborates on selected, alternating subject areas (e.g. emotion regulation, impulsivity, aggression).

Intended learning outcomes

The students acquire professional and practical skills, which are useful for the further course of studies and for their future occupation. The students acquire profound professional knowledge of central subject areas, theories and methods of Psychology of Emotion and Motivation, while also learning to transfer this basic knowledge to application subjects, especially the one's of the Master's degree programme. Furthermore, the students already acquire theoretical, empirical and application-oriented competencies, which can be useful in professional life (e.g. organising work processes in a motivating manner), after finishing the first university degree programme (BSc.).

In this module, the students acquire basic knowledge of theories on personality and of research approaches to individual differences in thinking, feeling and behaviour. The lecture provides an introduction to this subject area and explains the theories and methods. The seminars elaborate on various important examination contents.

Intended learning outcomes

The students acquire professional knowledge of central subject areas, theories and models. In the seminar, they learn and practice the processing of topics for oral or written presentations.

Contents

In this module, the students acquire basic knowledge of the theories and findings in the field of psychological processes underlying social interaction. The lecture comprises the subject areas, theories and methods of Social Psychology, including applied socio-psychological questions. It focuses on social perception, stereotypes and prejudices, social influence, the Self in a social context, attraction, close relationships, group interaction as well as conflict and cooperation. In the second part of the module, the students carry out exercises on the subject contents and critically examine relevant literature to prepare for the examination.

Intended learning outcomes

The students acquire professional skills and social competencies, which can be useful in everyday situations (e.g., for solving social conflicts and central problems of social influenceability). They gain profound professional knowledge of central subject areas, theories and methods of Social Psychology while also learning to transfer this basic knowledge to application subjects, especially the one's of the Master's degree programme. The students acquire competencies in evaluating and comparing the quality of scientific findings, methods and theo-

Psychological diagnostics entails professional action and decision making according to strict methodological criteria. Therefore, diagnostics is subject to its own scientific and pragmatic standards. This module introduces the corresponding methods and approaches to the identification of individual differences by means of observation, questioning, testing and questionnaires as well as the recording in reports and assessments. Furthermore, it elaborates on classical test theory and probabilistic test theory. In addition, it provides a technical introduction to selected psychodiagnostic methods. The lecture deals with approaches to professional scientific action and decision making which are exercised in the practical parts.

Intended learning outcomes

Competencies in raising and recording psychodiagnostic findings about individuals based on observation, questioning, tests and questionnaires. Knowledge of classical probabilistic approaches to the organisation of tests and questionnaires as well as the terms and methods of evaluating tests and questionnaires. SEQ CHAPTER h r 1 Introduction to classical and probabilistic test theory. Knowledge of standardised research procedures of Differential Psychology, personality research and psychological diagnostics as well as self-experience in carrying out and evaluating these procedures. The competencies are meant to be transferred and applied to other basic and application subjects of the BSc..

Contents

In this module, the students acquire advanced knowledge of central topics of diagnostic Psychology in view of various application fields. They familiarise themselves with various diagnostic methods whilst especially focusing on multi-modal diagnostics, which combine various test methods. In addition, the students examine topics such as the assembly of test batteries, aggregation and weighting of individual test methods, statistical vs. clinical assessment, types of questions, conversation techniques, judgement formation as well as diagnostic principles. They compare scientific standards to practical requirements. Additional topics include the interpretation of psychological test results, giving feedback to test persons, decision making, deduction of intervention measures, evaluation and processing of information in diagnostic processes. Furthermore, the students acquire skills in applying diagnostic means (e.g. administering performance tests, conducting diagnostic interviews, behavioural observation or similar) in practical classes.

Intended learning outcomes

Advanced competencies in raising and recording psychodiagnostic findings about individuals based on observation, questioning, tests and questionnaires. Practice in planning and conducting psychodiagnostic data collection. Knowledge of diagnostic tools of different areas of Psychology as well as self-experience in carrying out and evaluating diagnostic procedures.

The course gives an introduction to univariate and bivariate descriptive statistics and probability theory (descriptive statistics, graphic representations of data, probability theory, Bayes, distributions, binomial test, linear, nonlinear and multiple regression, correlation) as well as statistical methods of evaluation research. The application of computer-based data collection and -analysis is trained in exercises and explicitly tested in the exam.

Intended learning outcomes

Students acquire knowledge of various procedures of descriptive statistics and probability theory and their foundations as well as the ability to select adequate statistical methods for testing empirical questions, perform the procedures correctly with using computer-based data analysis, display the results reasonably and interpret them correctly.

The module provides advanced knowledge of inferential statistics (sampling, estimation principles, confidence intervals, theory of Null hypothesis testing, parametric and nonparametric methods for univariate and bivariate data sets, tests of equivalence, contingency table analysis, analysis of variance). After the principles of statistical data analysis are discussed, computational procedures using computer-based data analysis are trained with examples and tested in the final exam.

Intended learning outcomes

Students possess knowledge of various inferential procedures and their foundations as well as the ability to select adequate statistical methods for testing empirical questions e.g. from evaluation research, perform these correctly, display the results reasonably and interpret them correctly.

Contents

In this module, the students acquire basic knowledge of the principles of experience and behaviour in the economic environment. The two seminars discuss selected, alternating subject areas of Industrial and Organisational Psychology (e.g. topics of personnel selection, leadership, advertising effects).

Intended learning outcomes

The students acquire professional and practical skills, which are useful for the further course of studies and their future occupation. They gain profound professional knowledge of central results, theories and methods of Industrial and Organisational Psychology and learn to apply this knowledge to practice as well as to the Master's degree programme. After finishing the first university degree programme (BSc.), the students have already acquired theoretical, empirical and application-oriented competencies, which can be useful in everyday life and in professional life (e.g. personnel selection and management).

Contents

During the work placements, the students gain insights into the occupational activity of a psychologist in a corresponding institution and/or in the private sector under the guidance of a supervisor with a diploma or a Master's degree in Psychology. The students practice and improve the skills acquired in the courses.

Intended learning outcomes

The students learn to apply theoretical and practical aspects of the degree course to new tasks of the work placements. They establish first contacts in the vocational world and therefore lay a foundation for their future choice of occupation and the specialisation of their Master's degree programme.

Courses (type, number of weekly contact hours, language - if other than German)

P (o)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

1 placement report (approx. 6 pages) or 2 or 3 placement reports if placement is divided up into 2 or 3 individual placements. Duration of placement: 12 weeks (may be divided up into 2 or 3 individual placements, each placement must, however, have a minimum duration of 4 weeks). As a rule, it must be ensured that the person supervising the placement has a degree as Diplompsychologe or a Master's degree in psychology. Upon approval by the examination committee, this rule can be deviated from if it can be ensured that the placement is supervised by a person with an equivalent qualification.)

Language of assessment: German and/or English

Contents					

This module deals with the cognitive and emotional principles of human decision making and their interactions during judgement formation. Furthermore, it examines human decision making in an economic context, for example during processes of applicant selection or investment decisions at the stock exchange.

Intended learning outcomes

The students acquire profound, theoretical professional skills as well as comprehensive methodological competencies in the subdiscipline of human decision making. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor's thesis and during the Master's degree programme. The interdisciplinarity of the module promotes the students' abilities to integrate different theoretical perspectives and approaches. In addition, the students acquire special professional competencies, which equip them for an academic career and which can already be useful in professional life after finishing the first university degree programme (BSc.), for example for optimising processes of decision making in work life.

This module provides an overview of the models and theories on the description of cognitive structures and mechanisms for controlling target-oriented behaviour as well as the development and adaptation to the environment. Furthermore, individual projects deduce further research questions by critically examining current topics regarding the necessity of cognitive mechanisms and structures of behaviour control.

Intended learning outcomes

The students acquire profound theoretical skills as well as comprehensive methodological competencies in the subdiscipline of cognitive behaviour control. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor's thesis and during the Master's degree programme. The module's orientation on research promotes the students' ability to evaluate research results in a critical yet productive manner. In addition, the students acquire professional competencies, which prepare them for an academic career.

This module provides an overview of psychological mechanisms facilitating the development and persistence of disorders with somatic symptoms. Furthermore, it provides a detailed introduction to neurobiology, physiology and psychology of behaviour change in view of the prevention and therapy of different disorders.

Intended learning outcomes

The students acquire profound, theoretical professional skills as well as comprehensive methodological competencies in the subdisciplines of Health Psychology and behaviour modification. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor's thesis and during the Master's degree programme. The module's orientation on research promotes the students' ability to integrate different theoretical perspectives and approaches. In addition, the students acquire special professional competencies, which equip them for an academic career and which can already be useful in professional life after finishing the first university degree programme (BSc.), for example when it comes to counselling activities in the health care system.

Courses (type, number of weekly contact hours, language — if other than German)

S(2) + S(2)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- a) presentation (approx. 30 minutes) or
- b) written examination (approx. 60 minutes) or
- c) oral examination (approx. 15 minutes) or
- d) practical assignment (approx. 60 hours) or
- e) term paper (approx. 10 pages) or
- f) scientific poster (1 page DIN Ao) or
- g) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session) Language of assessment: German and/or English

creditable for bonus

Allocation of places

max. 30 places.

Should the number of applications exceed the number of available places, places will be allocated as follows: a) Applicants who have not yet achieved the required ECTS credits in the area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who have achieved the required number of ECTS credits already. Within these groups, places will be allocated according to the following quotas: b) Quota 1 (80% of places): average grade (weighted according to ECTS credits) achieved in the modules listed under 'Only after successful completion of' in the module description of the respective module; among applicants with the same average grade, places will be allocated by lot. c) Quota 2 (20% of places): number of subject semesters of the respective applicant; among applicants with the same number of subject semesters, places will be allocated by lot.

This module elaborates on the principles of ergonomics (e.g. organisation of the work environment and working conditions, personnel selection and training) on the basis of examples (e.g. from Traffic Psychology)..

Intended learning outcomes

The students acquire profound, theoretical professional skills as well as comprehensive methodological competencies in the subdiscipline of ergonomics. They apply their advanced professional knowledge during the further course of studies, especially during the writing of their Bachelor's thesis and during the Master's degree programme. In addition, the students acquire special professional competencies, which can already be useful in professional life after the first university degree programme (BSc.), for example when it comes to the ergonomic organisation of modern work environments and human-computer interactions.

This module elaborates on a subject area of Psychology. The individual choice of subject within the field of Psychology allows for an independent prioritisation and for the integration of psychology courses completed during stays abroad.					

Intended learning outcomes

The students advance their knowledge of one of the subject areas of Psychology. They gain a thematic overview of the fields of Psychology and learn to identify individual areas of interest and learning goals. Furthermore, they learn to relate their acquired knowledge to contents of the obligatory curriculum.

Contents					

This lectures provides an overview of the History of Psychology whilst focusing on selected studies and individual chapters of history such as the Psychology of Thought Processes of the Würzburg School. The students gain insights into the historical and historico-scientific contexts of the origin and development of various basic fields and application fields of Psychology.

Intended learning outcomes

The module provides an introduction to scientific and social contexts regarding the origin and development of Psychology. The students acquire central professional skills in reflecting the situation of the subject and of the profession of Psychology within the area of other sciences and within the whole of society. Furthermore, the students learn to assess the historical conditionality of central theoretical and methodological approaches to psychological research and practice. The competencies are meant to be transferred and applied to other basic and application subjects of the BSc.. Module component: Abbreviation: o6-PSY-EiG-1 Version: 2009-WS Title: Introduction to the History of Psychology, Degree of Obligation: Obligatory SWS: 2 ECTS credits: 3.
