Contents

During the courses German as a Second Language or GFL, students will deal with key issues, ideas, approaches and methods of the course. They will become familiar with the acquisition and advanced structures of oral and written language acquisition for learners of German as a Second Language and acquire basic principles of migration and integration research, which is an essential part of the course. A concretisation of the methods will take place in terms of language and literature imparting in all school forms, taking account of the learning conditions of the students that learn German as a Second Language. Furthermore, the implementation of a course in all subjects, which will give students the chance to speak in this language in order to promote the feeling for the language, will be discussed.

Intended learning outcomes

Students acquire fundamental knowledge of mediation processes of German as a Second Language or of a specialised class in all disciplines, which will give students the chance to speak in this language in order to promote the feeling for the language, referring to current research and including practical school challenges. They will be familiar with current problem areas and tasks, which are necessary for the professional skills in order to plan, implement and reflect an own class, of a contemporary specialised class. In doing so and in terms of increasing self-competence, the students develop a basic understanding of a theory-driven, practice-oriented, subject related and in pedagogical contexts involved instructional dealing. Here, they can understand and integrate particular learning initial situations of non-native learners.

Contents

This module is designed to teach key skills in the principles of teaching. Students receive special training to become student mentors and broaden and consolidate their knowledge and skills through interactive workshops and relevant learning methods. Students carry out voluntary work, teaching *Oberstufe* students at cooperating *Gymnasien* (German high schools) the essentials of academic writing. They receive support and assistance at every stage of the project, mostly in the form of feedback sessions with their teachers.

Intended learning outcomes

Students will gain subject-specific, methodical and personal skills they will later apply when teaching the fundamental principles and techniques of academic writing. The knowledge they gain in the first part of the course will enhance the academic writing skills as well as the teaching skills of students and will thus qualify them for their role as student mentors. This module includes voluntary work in schools, an experience the students will not only benefit from on a personal level but that will also enhance their social skills.

This module is designed to teach key skills in the principles of teaching as well as presentation skills. Participants develop an increased and intensified awareness of their own voice and of how their voice is perceived by others. They learn how to use body language that supports effective communication in an academic context. Comprising breathing and vocal exercises, the module teaches participants to keep a proper posture, use their voice effectively, and avoid voice strain. Practical exercises give participants the opportunity to receive constructive feedback on how they are perceived by others.

Intended learning outcomes

Students have acquired methods and developed personal skills that allow them to influence how they are perceived by others. They are able to identify and analyse how their voice and body language is perceived by others and to develop their own strategies for improvement. Students are able to put into practice what they have learned and improve the quality of their own teaching. Having developed their self-awareness and their awareness of how they are perceived by others, students have enhanced their personal skills and are well prepared for taking on their role as active participants in the academic process.

This workshop gives participants the opportunity to enhance their academic reading skills. Participants expand and consolidate their skills in taking in and processing information presented in written form, skills that are essential to success in any degree subject. They are trained in efficient reading strategies and receive advice on how to read academic texts effectively. Practical exercises give participants the opportunity to put into practice the techniques they have learned and receive constructive feedback.

Intended learning outcomes

Students have acquired methods and developed personal skills that allow them to go about their studies successfully. They are able to analyse texts and manage their time efficiently. Students are able to identify relevant information and develop their own strategies for the improvement their reading skills. They are able to put into practice what they have learned and become more efficient readers. Having developed proficiency in relevant methods, students have enhanced their personal skills and are well prepared for taking on their role as active participants in the academic process.

This module is designed to teach key skills when it comes to learning techniques and strategies as well as time management. Trained student mentors advise their peers on the use of specific organisational and memory aids in organising their time and exam preparation. Making practical use of the methods acquired is a core component of this course. Upon request, students receive support with their own learning tasks and feedback from their student mentors.

Intended learning outcomes

Students gain an overview of learning techniques and essentials as well as time management. They will be able to fulfil tasks in their field of study quickly, pertinently and to a deadline. This will enable them to prepare for exams proficiently and in good time.

This module is designed to teach key skills in presentation, group leadership and information literacy. Particular emphasis is on students learning to present academic content accurately and appropriately as well as getting to grips with the technical features of relevant software and hardware. In addition to providing students with support on current degree programme-related presentation projects, trained student mentors offer workshops and mentoring sessions on presentation techniques as well as on suitable behaviour when giving a presentation and dealing with feedback. The practical use of the methods acquired is an essential part of the course.

Intended learning outcomes

By the end of the course, students will possess the following skills and key strengths to go about their studies successfully: essentials of group leadership and presentation, ability to apply established academic conduct methods, academic presentation practice and information literacy. They will also be able to effectively operate visual representation programs.

The module "Studierwerkstatt: Presentation and Moderating" focuses on the (further) development of oral presentation skills in an academic context. It is aimed at students from various disciplines and offers comprehensive preparation for various forms of academic presentation, including papers, exposés and the presentation of (interim) results of final theses. Criteria for high-quality PowerPoint slides, thesis papers and table presentations are also discussed. The workshop offers a practice-oriented platform on which participants can test and further develop their skills in academic presentation and discussion. A special focus is placed on improving rhetoric and body language during presentations.

Intended learning outcomes

After completing the module, students should be able to plan, structure and conduct scientific presentations professionally. They will have the skills to convey complex content clearly and comprehensibly and to adapt their presentation techniques to the respective audience. Participants will have improved their rhetorical skills and learned to use their body language consciously and effectively. Through practical practice and the feedback they received, they have developed the ability to self-reflect and continuously improve their presentation skills. In addition, they now have basic knowledge of scientific communication, which enables them to make their study and research results accessible to an audience from outside the field.

This module is designed to teach key skills in academic writing. Trained student mentors instruct their peers in how to prepare and plan the process of writing an academic text and how to go about academic research. They also offer advice on writing foreign-language texts and help students practise writing a diverse range of texts that are relevant in their fields of study. Regular completion of actual writing tasks is a core component of this course. Along with peer feedback, students receive feedback and support from their student mentors to enable them to master the specific requirements set by their fields of study.

Intended learning outcomes

Students achieve an overview of academic writing techniques and essentials as well as citation methods and best academic practice. Having been provided with expert training in academic writing methods, they will be capable of writing any text in their field of study appropriately, with stylistic confidence and using the correct format.

Contents

The module teaches important key study-related skills in the field of academic writing. In addition to the preparatory work and basics of the academic writing process, the organization of research and instructions on writing in foreign languages, trained writing tutors use writing tasks to teach students how to write texts relevant to their studies and degree. Great emphasis is placed on practical application. Students receive feedback on the submitted portfolio and support with their own academic writing tasks.

Intended learning outcomes

Students have an overview of the basics and techniques of academic writing, citation methods and good academic practice. They are able to write texts relevant to their respective subject correctly, with stylistic confidence and in the correct form and are therefore familiar with various methods of academic writing.

Contents

This module is designed to teach key skills in the principles of teaching. Students receive special training to become student mentors and broaden and consolidate their knowledge and skills through interactive workshops and relevant learning methods. Students carry out voluntary work, teaching *Oberstufe* students at cooperating *Gymnasien* (German high schools) the essentials of academic writing. They receive support and assistance at every stage of the project, mostly in the form of feedback sessions with their teachers.

Intended learning outcomes

Students will gain subject-specific, methodical and personal skills they will later apply when teaching the fundamental principles and techniques of academic writing. The knowledge they gain in the first part of the course will enhance the academic writing skills as well as the teaching skills of students and will thus qualify them for their role as student mentors. This module includes voluntary work in schools, an experience the students will not only benefit from on a personal level but that will also enhance their social skills.

Seminars and workshops covering essential lab techniques. Participants are arranged into small groups and instructed by peer tutors who have practical work experience as pharmaceutical, medical or biological lab technicians and share their expertise. Topics covered include: lab protocols, recording data and results in lab notebooks, dilution series: various buffers and solutions, calculation of molarity, preparation of small amounts of different solutions and buffers, pH values, titration, pipetting precisely, measuring, weighing, common mistakes, essential lab techniques, problem solving tools, material storage, lab safety and good practice.

Intended learning outcomes

Students are able to perform essential lab techniques independently, they have learned how to avoid common mistakes and have acquired problem solving skills. They can prepare standard solutions and buffers independently and can reliably calculate various dilution series as well as molarity. Students are able to record results and protocols in a lab notebook. They have been trained in safe laboratory practices.

In this course we use the examples of first aid and lifesaving to discuss and practise the basics of helping and rescuing. We study central aspects relevant to school with and without reference to school sports. These aspects include specific behaviour guidelines and rescue measures in the fields of supervision of pupils during swimming lessons and first aid.

Intended learning outcomes

The students have basic skills in first aid and lifesaving. They are aware of measures to prevent and avoid accidents, especially in the field of planning and conducting physical education classes. Furthermore, the students are skilled in assessing safety and preventing hazards in the context of extracurricular physical activities. In the field of lifesaving, they know how to rescue themselves and others.

Chalk and talk teaching, carousel activities, unguided experimentation. There are many ways to communicate knowledge to groups of pupils. Out-of-classroom learning has been gaining in importance. In interdisciplinary contexts, it is particularly important to draw attention to the fact that looking at a topic from a "different" point of view may facilitate learning. This course will provide students with a practical introduction to knowledge-based and experience-based learning methods. Some of these methods will be adapted to be appropriate for specific topics and will be implemented with groups of pupils. This course will present students with an opportunity to find out what methods they feel comfortable with and whether students like or dislike the respective methods.

Intended learning outcomes

Students are familiar with practical methods for teaching groups in an effective and lively way.

This course will provide students with an opportunity to take on the role of teacher and work with real groups of pupils. Particular emphasis will be placed on the presentation of topics; in many cases the presentation will be accompanied by a demonstration to illustrate the topics. Students will either teach existing topics they adapted to fit the needs of their target groups or will develop new topics.

Intended learning outcomes

Students are able to teach groups, communicating in practice what they have learned in theory.

Groups are diverse, their members have different personalities. Groups are also dynamic entities. How do we deal with these groups? What do we have to expect? How do we come across to groups and how can we adjust to their needs? How can we get the individual members interested in or even enthusiastic about the topics we are teaching? This module will focus on different groups and their expectations. You will learn and try out some of the tricks of the teaching trade.

Designing and creating activity stations at which pupils in *Grundschule* and *Sekundarstufe I* will perform experiments, using low-cost everyday items.

Intended learning outcomes

Students will design simple scientific activity stations to be used at the interface between *Primarstufe* and *Sekundarstufe I* by small groups comprised of pupils from different types of school. They will learn to "elementarise" and teach scientific topics from the curriculum in a manner that is tailored to the target group.

Contents

Basic perspectives for the explanation of behavioural disorders; key and selected psychological and sociological approaches to the explanation of behavioural disorders in view of medico-biological aspects; key and selected phenomena in the context of behavioural disorders; introduction to scientific work.

Intended learning outcomes

The students are able to apply basic knowledge to achieve a differentiated understanding of behavioural disorders, also in view of specific explanation concepts and specific selected problems (professional competence, self-competence). This knowledge enables them to classify and understand behavioural disorders in children and juveniles and to develop first ideas for dealing with behavioural disorders (professional competence, self-competence, methodological competence). The students have basic knowledge and skills in acquiring, selecting and processing information in the context of scientific work; they can apply their knowledge and skills to the utilization of study group resources (professional competence, methodological competence, social competence).

Contents

In this module, students (without any previous knowledge) are taught basic knowledge of the foreign language that can be expanded. The course is general language and oriented towards the academic context.

Intended learning outcomes

In this module, the student acquires basic knowledge with a general language-intercultural orientation and the elementary ability to communicate and exchange information in the simplest way. He/she understands familiar, everyday expressions and very simple sentences when listening or reading and can express him/herself orally and in writing using the simplest phrases.
The module is aimed at reaching the level "A1 - Breakthrough" of the Common European Framework of Reference for Languages (CEFR).

1 semester	undergraduate	Course prerequisites: existing language skills; successful completion of module 42-ARA-A1.1 is therefore highly recommended.	

Contents

In this module, students (with limited previous knowledge of the target language) gain a basic knowledge of the target language. They develop language skills for both general and academic purposes.

Intended learning outcomes

Students will develop basic general language skills and become familiar with intercultural aspects. They will develop an elementary ability to communicate and exchange information in a very basic way. When they read or listen to texts, they will understand familiar, everyday expressions and very simple sentences. Students will be able to speak and write in the target language, using simple phrases. At the end of the module, students will have developed skills in the target language that are equivalent to level "A1 -- Breakthrough" of the Common European Framework of Reference for Languages.

Courses (type, number of weekly contact hours, language — if other than German)

Ü (4)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) written examination (approx. 90 minutes) or
b) written examination (approx. 60 to 90 minutes) and oral assessment (5 to 10 minutes, e. g. contribution to the discussion, group presentation); weighted 3:1 or
c) 2 to 5 assessments (5 to 7 pages, 10 minutes): Assessments may take a written or an oral form or a combination of these two forms. The number and type of assessments will be specified by the lecturer at the beginning of the course. Examples of oral forms of assessment include but are not limited to short presentations, presentations and contributions to the discussion. Examples of written forms of assessment include but are not limited to text production as well as listening and reading exercises. The total scope/length of oral and/or written assessments will be announced in class.

In this module, students gain a basic knowledge of Palestinian Arabic that will allow them to orient themselves in basic situations in the target language. They develop language skills for both general and academic purposes.

Intended learning outcomes

Students will develop a basic general knowledge of Palestinian Arabic and become familiar with intercultural aspects as well as with the culture and society of the region in which the target language is spoken. When they read or listen to texts on topics they are familiar with, they will understand the main points. They will be able to talk and write about very general topics, using fundamental grammatical structures and a limited vocabulary. In addition, they recognise and understand differences between standard language and dialect. This module aims to enable students to reach level "B1 -- Vantage" of the Common European Framework of Reference for Languages.

Building on the students' basic knowledge of written Arabic, this module teaches students how to independently read unvocalised Arabic texts of low to medium difficulty. Using selected texts, the course helps students expand their existing grammar skills, explains how to use dictionaries, and gives students an opportunity to practise using dictionaries.

Intended learning outcomes

Students have command of a basic vocabulary in Modern Standard Arabic (MSA). They are able to read and understand unvocalised Arabic texts as well as to use dictionaries to clarify meaning. This module aims to enable students to reach level "B1 -- Threshold" of the Common European Framework of Reference for Languages.

Contents

This module provides students with advanced knowledge of the foreign language. The course is divided into two parts, the first theoretical and the second practical. In the theoretical part, students work on selected texts from various scientific and cultural sources. The texts enrich both the vocabulary and the grammatical understanding of the students. In addition, the students' comprehension skills are developed and they are enabled to produce their own texts as well as to express themselves in a well-founded manner in conversations on a variety of topics. In the practical part, students work on various topics and publish them in the form of a podcast. The content is based on current topics and issues in the Arab world.

Intended learning outcomes

In this module, the student acquires in-depth knowledge of the Arabic language (MSA), taking into account intercultural and regional aspects. He/she will understand longer speeches and presentations as well as longer texts of intermediate difficulty with general and topic-related vocabulary and will be able to express him/herself in a well-founded and detailed manner, both orally and in writing, on a wide range of topics of personal interest. The aim of the module is to achieve level "B2 - Vantage" in the Common European Framework of Reference for Languages (CEFR).

Contents

In this module, students gain a basic knowledge of the target language. They develop language skills for both general and academic purposes.

Intended learning outcomes

Students will develop a basic general knowledge of the target language and become familiar with intercultural aspects as well as with the culture and society of countries in which the target language is spoken. When they read or listen to texts on topics they are familiar with, they will understand the main points. They will be able to talk and write about general topics, using fundamental grammatical structures and an appropriate yet limited vocabulary. At the end of the module, students will have developed skills in the target language that are equivalent to level "B1 -- Threshold" of the Common European Framework of Reference for Languages.

This online course equips students with an intermediate knowledge of the target language that will allow them to apply for jobs, trainee positions, or work placements in countries where the target language is spoken. Students develop skills in the target language that will allow them to attend university and get by in everyday life in countries where the language is spoken.

Intended learning outcomes

This module equips students with language skills that will allow them to attend university or prepare for working in countries where the target language is spoken. Having expanded their basic vocabulary, students possess the language skills required for living abroad and applying for jobs, trainee positions, or work placements abroad. In addition, they are able to continue learning on their own initiative and reach the level of language proficiency that is required for study in countries where the target language is spoken. At the end of the module, students will have developed skills in the target language that are equivalent to level "B2 -- Vantage" of the Common European Framework of Reference for Languages.

Duration	**Module level**	**Other prerequisites**	
1 semester	undergraduate	--	

Contents

The module addresses the various opportunities of humanities students for entry into professional life. In this context, it provides the students with information on the whole range of possible occupational fields for humanities scholars. The students conduct an analysis of their strengths and weaknesses in order to identify their personal key competencies or lack thereof. Afterwards, they create a professional application portfolio to familiarise themselves with the guidelines of writing a curriculum vitae, an application letter and an unsolicited application. Furthermore, they practise their presentation skills in order to prepare for real job interviews.

Intended learning outcomes

The students know possible occupational fields for humanities scholars. Apart from typical career opportunities, this also includes opportunities for lateral entry into the job market. The students know which personal key competencies qualify them for their desired occupation or for alternative occupational fields and are confident in using relevant sources of information. They are able to create a complete application portfolio as well as a personal portfolio containing relevant information for the desired occupational field. The students know how to write a personal curriculum vitae, application letters and unsolicited applications. Furthermore, they know the argumentative principles of job interviews. They are able to deal with the specific requirements on humanities scholars in the job market.

Courses (type, number of weekly contact hours, language — if other than German)

Contents

In this module, students are taught in-depth knowledge of the foreign language, which enables them to communicate in foreign language situations at university or at work in a way that is appropriate to the situation, both orally and in writing. Combined with the teaching of subject-related language knowledge and skills and intercultural competence oriented towards the target language country, the focus is on the acquisition of communicative competences in the field of business.

Intended learning outcomes

The student achieves a sound (written and oral) communication ability in the specialist language. He/she has in-depth subject-related linguistic knowledge and skills that enable him/her to communicate on selected topics in appropriate communication situations through the variable use of linguistic means. He/she has mastered the linguistic vocabulary and structures required in the field of business.
The module is aimed at achieving the level "C1 - Effective Operational Proficiency" of the Common European Framework of Reference for Languages of the Council of Europe.

This module equips students with an advanced knowledge of the target language that will allow them to communicate appropriately, in both written and oral form, at university and in the workplace. The course focuses on equipping students with knowledge about the culture and society of countries where the target language is spoken while giving them an opportunity to systematically practise their communication skills and equipping them with country-specific intercultural skills.

Intended learning outcomes

Students develop advanced language skills and a thorough familiarity with the culture and society of countries where the target language is spoken. They are thus able to communicate, both verbally and in writing, in a variety of situations, taking into account aspects related to the culture and society of said countries. They are able to effectively and flexibly use the target language, both during study abroad periods and in the workplace. This module aims to enable students to reach level "C1 -- Effective Operational Proficiency" of the Common European Framework of Reference for Languages.

This module equips students with an advanced knowledge of the target language that will allow them to communicate appropriately, in both written and oral form, at university and in the workplace. The course focuses on equipping students with business-specific communication skills while giving them an opportunity to systematically practise their communication skills and equipping them with country-specific intercultural skills.

Intended learning outcomes

Students gain sound business-specific communication skills (written and oral) in the target language. They develop advanced business-specific language skills that will allow them to communicate about selected topics in corresponding situations, using language flexibly. Students are proficient in business terminology and are able to communicate effectively within the discipline. This module aims to enable students to reach level "C1 -- Effective Operational Proficiency" of the Common European Framework of Reference for Languages.

This module equips students with academic skills in the target language in order to prepare them for study abroad. The module aims to maximise students' opportunities to succeed at university in their host countries.

Intended learning outcomes

Students are systematically trained in academic skills in the target language and will gain the ability to attend university in a country where the target language is spoken. They are able to understand and produce academic texts in in the target language. In addition, they can demonstrate the level of oral language proficiency that is required for study in their host countries. This module supports level "B2 -- Vantage" of the Common European Framework of Reference for Languages and aims to enable students to reach the independent user level. In addition to preparing students for the lowest level of mobility (*unterste Mobilitätsstufe*) as recommended by the Council of Europe, the module aims to maximise students' opportunities to succeed at university in their host countries.

This module equips students with advanced communication skills in the target language. These will allow them to communicate appropriately, in both written and oral form, in situations involving humanistic topics.

Intended learning outcomes

Students gain sound humanities-specific communication skills (written and oral) in the target language. They develop advanced humanities-specific language skills that will allow them to communicate about selected topics in corresponding situations, using language flexibly. Students are proficient in humanities terminology and are able to communicate effectively within the discipline. At the end of the stage, they will have developed humanities-specific language skills that are equivalent to level "C1 -- Effective Operational Proficiency" of the Common European Framework of Reference for Languages.

In this module, students gain a basic knowledge of the target language. They develop language skills for both general and academic purposes.

Intended learning outcomes

Students will develop a basic general knowledge of the target language and become familiar with intercultural aspects as well as with the culture and society of countries in which the target language is spoken. When they read or listen to texts on topics they are familiar with, they will understand the main points. They will be able to talk and write about general topics, using fundamental grammatical structures and an appropriate yet limited vocabulary. At the end of the module, students will have developed skills in the target language that are equivalent to level "B1 -- Threshold" of the Common European Framework of Reference for Languages.

This module equips students with an advanced knowledge of the target language that will allow them to communicate appropriately, in both written and oral form, at university and in the workplace. The course focuses on equipping students with intercultural skills as well as knowledge about the culture and society of countries where the target language is spoken while giving them an opportunity to systematically practise their communication skills.

Intended learning outcomes

Students develop advanced language and intercultural skills as well as a thorough familiarity with the culture and society of countries where the target language is spoken. They are thus able to communicate, both verbally and in writing, in a broad range of situations, taking intercultural aspects into account. They are able to effectively and flexibly use the target language, both during study abroad periods and in the workplace. This module aims to enable students to reach level "C1 -- Effective Operational Proficiency" of the Common European Framework of Reference for Languages.

In this module, students are taught advanced knowledge of the foreign language. Combined with the targeted training of communicative competencies and intercultural competence oriented towards the target language country, the focus is on teaching grammatical structures and vocabulary training.

Intended learning outcomes

In this module, the student acquires advanced knowledge with a general language orientation with targeted consideration of level-specific grammatical structures and idioms as well as level-specific vocabulary. He/she can communicate approximately fluently and express him/herself orally and in writing on a wide range of topics. In addition, he/she can read and understand longer complex texts independently and write formal and informal texts of various formats.
Upon completion of this module, he/she will have acquired competences in the foreign language oriented towards the level "B2 - Vantage" of the Common European Framework of Reference for Languages of the Council of Europe.

Contents

In this module, students (without any previous knowledge of the target language) gain a basic knowledge of the target language. They develop language skills for both general and academic purposes.

Intended learning outcomes

Students will develop basic general language skills and become familiar with intercultural aspects. They will develop an elementary ability to communicate and exchange information in a very basic way. When they read or listen to texts, they will understand familiar, everyday expressions and very simple sentences. Students will be able to speak and write in the target language, using simple phrases. At the end of the module, students will have developed skills in the target language that are equivalent to level "A1 -- Breakthrough" of the Common European Framework of Reference for Languages.

Courses (type, number of weekly contact hours, language — if other than German)

Ü (4)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) written examination (approx. 90 minutes) or
b) written examination (approx. 60 to 90 minutes) and oral assessment (5 to 10 minutes, e. g. contribution to the discussion, group presentation), weighted 3:1 or
c) 2 to 5 assessments (4 to 7 pages, 15 to 20 minutes): Assessments may take a written or an oral form or a combination of these two forms. The number and type of assessments will be specified by the lecturer at the beginning of the course. Examples of oral forms of assessment include but are not limited to short presentations, presentations and contributions to the discussion. Examples of written forms of assessment include but are not limited to text production as well as listening and reading exercises. The total scope/length of oral and/or written assessments will be announced in class.

The aim of the module is to produce a professional video clip (broadcasts). Therefore, the principles of audio and video work, e.g. lighting engineering, camera settings, editing, montage, and professional recording of audio tracks, are conveyed during the course. Afterwards, the students apply their acquired skills to practical projects at the video / recording studio. Finally, the resulting audiovisual materials are converted into different target formats for the internet, live streams etc.

Intended learning outcomes

Basic skills regarding the proper usage of professional audio and video technology, basic skills in lighting engineering, postproduction (e.g. for various platforms), planning and designing broadcasts.

Courses (type, number of weekly contact hours, language — if other than German)

Contents

The modul functions as the preparation for the subsequent excursion to schools in different European countries. The course includes facts about the history, culture, society, and other aspects of the target culture. Furthermore, students will acquire knowledge about the structure of teacher training, schools and higher education systems of the respective country in order to compare them to the German educational system. Additionally, students are prepared in an intercultural way for the respective country. This will form the basis for the mutual exchange

Intended learning outcomes

Students are able to reflect upon and discuss about similarities and differences of international educational systems in comparison with the German educational system. They can discuss different aspects of educational systems in respect to migration and intercultural learning. They recognize and can assess historic, social, cultural and political effects on educational systems.

1 semester	undergraduate	This module is only open for students who attended the prep session for the field trip to the respective country in the module they successfully completed beforehand.	

Contents

This modul provides the chance to become acquainted with different international educational systems. With excursions into other European as well as non-European countries an international and intercultural exchange between educational systems takes place. This can cover a system as a whole on a political level as well as individual sections on the level of specific educational institutions. Subject of this are educational as well as extra- and pre-school institutions. Apart from structural questions, content-related fields of duty as well as general moral values and cultural norms of an educational system or individual fields of education will be dealt with.

Intended learning outcomes

Students are acquainted with different international educational systems or individual fields of education of a broader system, know how to describe them structurally and classify them in reference to their content, and are able to relate their objectives to their fields of duty. International educational institutions and systems can be placed correctly into their wider context of respective national and cultural values and norms.

Blackboards are still the classic medium for teaching classes. The students examine the theoretical principles of working with boards to determine the possibilities and opportunities of using interactive board systems. The module provides an overview of the functionality of interactive whiteboards which combine the functions of blackboards with the functions of flip charts by using computer technology as well as projection technology. Self-organised learning processes, which are demanded by modern learning culture, are put into practice. In this way, the students actively participate in class and work with the board systems from the beginning of the seminar.

Intended learning outcomes

After successfully completing this module, the students have acquired basic skills in dealing with interactive whiteboards. By creating virtual arrangements, the students have learned to create content for interactive whiteboards and they are able to integrate these whiteboards into school lessons in a useful manner. Furthermore, they know how to search for additional digital resources and materials for teaching school lessons with an interactive whiteboard.

Students will gain background knowledge about different cultures and intercultural aspects of these cultures. Particular emphasis is placed on the diversity of values and life styles, different world views and orientation patterns, as well as different ways of living and thinking. At the same time, thematic emphases are treated under an intercultural point of view. With the help of practical exercises students can transfer their knowledge to situations of their own (pedagogical) actions.

Intended learning outcomes

Students have knowledge about cultures, cultural standards and intercultural connections. They are able to reflect and discuss about similarities and differences of different cultures. Via dealing with the diversity of cultures and cultural interpretative patterns they gain essential intercultural key competencies as well as self and social competencies. Practical exercises enable them to establish methodical competencies.

With the help of practical exercises students can transfer their knowledge to situations of their own (pedagogical) actions.

Intended learning outcomes

Students have knowledge about cultures, cultural standards and intercultural connections. They are able to reflect and discuss about similarities and differences of different cultures. Via dealing with the diversity of cultures and cultural interpretative patterns they gain essential intercultural key competencies as well as self and social competencies. Practical exercises enable them to establish methodical competencies.

Contents

Basics of communication at school / educational work; task specification of a teacher; introduction to various (interactive) media and medial methods; their use and purposeful usage in the classroom; production of learning objects for the classroom.

Intended learning outcomes

The students know a broad variety of media and medial methods and are able to use them in the classroom purposefully. Through the use of interactive media they can lead the students to self-organized and independent learning and working. They can prepare their lessons effectively and support them with objects for learning in an optimal way.

Students gain insights into daily teaching practices or rather real life planning and creation of lessons. They learn about different, innovative, co-operative teaching and learning methods which desicnget especially for their subject. They devise own examples for lessons, and discuss and reflect upon them in a group. Emphasis is thus placed on subject specific didactical and methodological questions and their implementation.

Intended learning outcomes

Students broaden their subject specific methodological knowledge and build up methodological competencies. They have knowledge about different co-operative ways of teaching and learning and their optimal application in lessons. Students are able to take up a position concerning questions of planning lessons and to reflect upon that position from different points of view.

"Learning through the arts" can be used at all types of schools and with all kinds of pupils. In the seminar, interconnections with the Bavarian curricula and own lesson plans for the major subjects will be worked out. Areas of the sciences of teaching and learning, learning theories, and results of brain research form a focal point of the theoretical part. Artist-teacher-cooperation leads to a changed understanding of learning culture. Besides insights into practical work, there will also be an elucidation about educational successes. In the seminar, students will get to know the work of LTTA at our schools and in other countries, while also analyzing and reflecting upon it. The participants of the seminar can also take part in events by LTTA, such as artists' training, teachers' further education, as well as in teaching examples at our project schools.

Intended learning outcomes

Students gained knowledge about teaching theories, are able to do immersed curricular work, to reprocess lessons methodically and can transfer the artistic experiences choreographically, sculpturally, musically etc to their subject area. They can confidently work in a team. Furthermore, through their own practical implementation, they have experienced a furthering of their teaching personality with an increased feeling of security when using artistic elements for the purpose of achieving cognitive curricular goals. Moreover, they gained knowledge about classroom teaching research and are able implement and analyze their own units and surveys.

Not a new project, not an event, but a "rethinking" of classroom teaching. Information: about LTTA in general and about the cooperation with the Royal Conservatory of Toronto and Queens University: The teacher education program Learning Through the Arts", developed at Canada's Royal Conservatory of Music, has become the world's most comprehensive school initiative based on the arts. LTTA brings specially trained artists to schools, who cooperate with teachers to create lessons that cover learning material in an exciting and playful way. For example, pupils learn math through dancing, history via story-telling and the natural sciences through the fine arts. The artists and teachers form a three-year teaching partnership with the goal of teaching non artistic subjects, such as math, natural sciences, history, and languages, in a holistic fashion by adding a broad variety of art forms (music, dance, fine arts). LTTA offers schools a comprehensive implementation program that includes advanced vocational training, support in the classroom, models for integration of the curriculum as well as means for rating pupils and evaluating the program. Ongoing, high quality professional training for teachers, artists, principals, and lecturers at LTTA schools are at the center of the program's philosophy. Content of the module: "Learning through the arts" can be used at all types of schools and with all kinds of students. In the seminar, interconnections with the Bavarian curricula and own lesson plans for the major subjects are worked out. Areas of the sciences of teaching and learning, learning theories and results of brain research form a focal point of the theoretical part. In the seminar, students will get to know the work of LTTA at our schools and in other countries, while also analyzing and reflecting upon it. Some investigations from the LTTA model school can be realized. The participants of the seminar can also take part in events by LTTA, such as artists' training, teachers' further education as well as in teaching examples at our project schools.

Students observe, analyze and reflect upon the education of a school abroad. They obtain information about the local conditions and the organization of the school. The exchange with the teachers facilitates reflection of the observed lesson process. The participation in project days and other school activities can improve the learning process through the interaction with the students.

Intended learning outcomes

The students can observe and analyze lessons with a special focus on teaching methods and the behavior of the teacher and the pupils. They recognize the learning potentials and interests of individual students. The observed results can be summarized and reflected upon in written form.

The students gain an insight into teaching practice. The focus lies on the conveyance of teaching methods and methods for individual advancement in the classroom. Through observations, coaching projects, internships or purposeful assignments inside or outside the classroom, the students have their own practical education and teaching experiences.

Intended learning outcomes

The students learn about various kinds of teaching methods and methods for individual advancement and differentiation. They are familiar with concepts about professional action in the classroom and about dealing with heterogeneity and difference. The acquired knowledge about teaching can already be applied in some cases.

The students know about fundamental questions of inclusion. They can name various challenges that inclusion creates for the individual, society and school. They are able to take on different perspectives and points of view towards inclusion and base their own position on this. They are aware of the school type specific conditions and goals in connection with inclusion. They elaborate basic competences for dealing with students in inclusive lesson contexts.

The students get an insight into the practice of dealing with crisis situations at school with a focus on case-related conversation and consulting competence. Future teachers are made aware of their perception of individual student crisis and learn when to consult which out-of-school institutions, if necessary.

Intended learning outcomes

The students have examined problems of children and teenagers in situations of crisis and realize when to contact which out-of-school institutions for help with certain special problems.

The module deals with the challenges that pupils in a state of crisis might pose for the entity of school and lessons. This is done from a subject specific point of view. It points out subject specific questions and tasks that involved schools, people and lessons have to face. Possible options for support -- also out-of-school institutions -- are presented. Possible answers and approaches for the teacher in a specific subject are elaborated and discussed.

Intended learning outcomes

The students know about basic problems of pupils in situations of crisis -- also from a subject specific point of view. They are able to adopt different perspectives. They know where to get help and support (not limited to their school and profession) and are able to make use of this knowledge. They develop subject specific, basic competences and attitudes when dealing with students in situations of crisis.

Contents

The module conveys information and skills that help students during their pedagogic-didactic internship as well as with the start of their career. There will be a special focus on practical relevance. The students test various teaching situations in small groups and will receive qualified feedback. The module's contents are designed to be independent of the students' subjects. Subareas (selection):

- topics from school counseling, i.a. network of the infrastructure of offers of counseling and help for students, parents and teachers
- teachers' health: i.a. Burnout and phonation
- negotiation, the class as a unity, team building as a means to prevent mobbing; theoretical content will be applied at school and evaluated
- meaningful use of media in the classroom and for preparation purposes
- the handling of unusual situations in the classroom.

Intended learning outcomes

The students know about the versatility of being a teacher. They realize that there is more to the job than a mere transfer of knowledge. They know how to find strategies for solving the many different kinds of problems in everyday school life. The students have learned that there is a large network of helpful services and know how to contact them. Furthermore, the students know which factors are helpful for achieving a positive environment and thus allow for a better learning experience for pupils.

As a means of help for young people at school the youth welfare services offer fast and unbureaucratic help and/or cooperation with other areas. It is aimed at young people with severe social and pedagogical problems, who are dependent on support to overcome disadvantages or individual impairments. The module offers an insight into the tasks, structures and contents of an active youth or school social work and gives the students the opportunity to participate in the concrete pedagogical work with a professional focus on "projects", or to bring their own small projects to fruition.

Intended learning outcomes

The students have gained an insight into the diverse task areas of a teacher at the elvel of lower secondary education. They are experienced in carrying out projects of social school work and are able to use those as a basis for the development of their own pedagogical projects. They have furthered their own methodic competence and are able to use it purposefully, reflect upon it critically and broaden it independently.

The module offers an insight into the tasks, structures and contents of an active youth or social school work. In various areas of occupation, such as the "fostering of psychosocial competence" or the diverse tasks of networking the tasks of social school work are presented in their different aspects

Intended learning outcomes

Students have gained insights into the diverse areas of responsibility of social school work. Because of their focus on "psychosocial competences" they are experienced in the application of psychosocial methods of the social school workers and are able to choose and apply them adequately, reflect upon them critically and broaden them independently. Alternatively, with the focus on "networking", the students have basic knowledge about institutions and some experience in committees, and are familiar with tasks, competence and procedures in social school work and are thus able to coordinate the different requirements.

Contents

Based on a number of working steps, students' own ideas and wishes concerning their careers and plans for their professional future are made more transparent. Besides contributions by the seminar supervisors, topics will be treated in depth via role playing games as well as group and individual work which focuses on determining individual strengths and weaknesses, self-presentation (replication of their self-perception and how others perceive them), and definition of goals (in life as well as their career, and the compatibility of both).

Intended learning outcomes

The students learn to grasp and specify their skill profile. This includes a critical self-reflection in reference of their own goals. A comparison of their self-perception and how they are perceived by others enables the students to make their first steps towards improving their skills. These include their self-presentation as well as raising awareness for a possible correction in their career planning. The seminar prompts the students to take meaningful steps towards an implementation of their career plans.

Contents

The module addresses transitions between different institutions of the education system and between different types of schools. This concerns the transition from elementary schools to secondary schools as well as the transition from preschool institutions to elementary schools to improve the permeability between different types of schools, up to the transition between high schools to university and college. The concept of "transition" is hereby theoretically elaborated, reflected critically, and practically implemented.

Intended learning outcomes

Students are able to put theoretical approaches of the concept "transition" holistically into practice and reflect upon practice theoretically. They are experienced at elaborating lesson concepts at the interface between the types of schools that flank a transition. They can attribute the different requirement profiles of specific lesson sequences and units to the transition matter and thus use them purposefully. In periods of teaching practice that take place in selected schools they can validate the theoretical knowledge practically.
