Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

24-Mar-2020 (2020-31)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

<p>The course offers basic insights into the principles of economics. We analyse how markets work, i. e. how consumers form their demand and how suppliers make production decisions. On the basis of first insights into market economies, we analyse why governments might want to intervene. In this context, we focus on monopoly, environmental issues and minimum wages in labour markets.</p> <p>In addition to micro topics, we also focus on macroeconomic aspects and analyse why we observe business cycles (unemployment, inflation) and long term economic growth. We also address topics related to monetary and fiscal policy in the euro area.</p>			
Intended learning outcomes			
<p>The students have a basic knowledge of economics , with which they can analyze complex economic relationships. They can deal critically with current economic policy issues and make an independent judgment. In addition, elementary mathematical techniques for solving micropores and macroeconomic models are mediated.</p>

<p>This course provides an introduction into modern labor economics. The lecture will cover the following three core topics:</p> <ol style="list-style-type: none"> 1. Structure of the labor market <ol style="list-style-type: none"> 1. Labor supply 2. Labor demand 3. Labor market equilibrium <p>The objective of this part is to provide an understanding of the determinants of labor supply and labor demand and how they match and finally reach an equilibrium. This also implies studying the design and effects of policy interventions in order to combat inefficiencies.</p> 2. Wage formation <ol style="list-style-type: none"> 1. Human capital formation 2. Compensating wage differentials 3. Discrimination 4. Wage structure and inequality <p>The objective of the second part to investigate the different determinants of wages and to understand the reasons (justified or unjustified) why some people earn more than others.</p> 3. Unemployment <p>The third and last part of the lecture deals with one of the biggest challenges to policy makers: unemployment.</p>		
Intended learning outcomes		
<p>Participants will be familiarized with the core theoretical models of modern labor economics and the basic methods of modern empirical labor economics. As such the course will be divided into two parts: the lecture where the theory is taught as well as the exercise class which are „hands on“ sessions in order to be able to conduct an economic analysis both theoretically as well as empirically.</p>

<p>This course provides an introduction into public economics/finance. Public finance studies the role of the government in the economy. It basically answers four questions: When should the government intervene? How might the government intervene? What is the effect of those interventions? Why do governments choose to intervene in the way that they do? The lecture will cover the following topics:</p> <ol style="list-style-type: none"> 1. Introduction into public economics/finance 2. Theoretical toolkit 3. Empirical toolkit 4. Public goods 5. Cost Benefit Analysis <p>Main reference for the lecture is Gruber, J. (2016): Public Finance and Public Policy, 5th edition, Worth Publishers, New York.</p>		
Intended learning outcomes		
<p>The aim of the course is to provide students with an understanding of the public policy making process of the government and to endow them with the necessary skills to judge about and/or design public policies. Students will learn the core theoretical models of public economics as well as modern empirical methods of public finance. The focus will not lie on the theoretical details, but rather on the beauty of the different methods to provide answers to public policy questions.</p>

In this module, the students acquire basic knowledge of the subject, phenomena, theories and methods of General Psychology. They become acquainted with the principles of human learning, action control, perception, attentiveness, concept formation, speech, memory and knowledge. In the seminar, the students gain knowledge of current research results of selected subdisciplines of General Psychology. In the practical part, they become familiar with experimental techniques of General Psychology.			
Intended learning outcomes			
This module enables the students to factor in findings of General Psychology when carrying out own actions as well as when dealing with applied psychological problems, for example when creating websites or learning environments. These factors might include findings about the principles of human attentiveness or human memory. Furthermore, they acquire competencies in planning, carrying out and evaluating scientific experiments. These competencies serve as a foundation for independent scientific work. In addition, the students learn to give scientific presentations and to write scientific reports.

In this module, the students acquire basic knowledge of the central psychological theories and findings of the research fields of motivation and emotion. The lecture comprises the subject areas, theories, methods, application and practice of Psychology of Motivation and Psychology of Emotion. The seminar elaborates on selected, alternating subject areas (e.g. emotion regulation, impulsivity, aggression).			
Intended learning outcomes			
The students acquire professional and practical skills, which are useful for the further course of studies and for their future occupation. The students acquire profound professional knowledge of central subject areas, theories and methods of Psychology of Emotion and Motivation, while also learning to transfer this basic knowledge to application subjects, especially the one's of the Master's degree programme. Furthermore, the students already acquire theoretical, empirical and application-oriented competencies, which can be useful in professional life (e.g. organising work processes in a motivating manner), after finishing the first university degree programme (BSc.).

In this module, the students acquire basic knowledge of the theories and findings in the field of psychological processes underlying social interaction. The lecture comprises the subject areas, theories and methods of Social Psychology, including applied socio-psychological questions. It focuses on social perception, stereotypes and prejudices, social influence, the Self in a social context, attraction, close relationships, group interaction as well as conflict and cooperation. In the second part of the module, the students carry out exercises on the subject contents and critically examine relevant literature to prepare for the examination.		
Intended learning outcomes		
The students acquire professional skills and social competencies, which can be useful in everyday situations (e.g. for solving social conflicts and central problems of social influenceability). They gain profound professional knowledge of central subject areas, theories and methods of Social Psychology while also learning to transfer this basic knowledge to application subjects, especially the one's of the Master's degree programme. The students acquire competencies in evaluating and comparing the quality of scientific findings, methods and theories.

Contents		
This module introduces students to ethnomusicological study of music-making as social process and cultural phenomenon. The module explores the nature of the relationships between music and society, how sociocultural factors influence music-making, and how music can impact individuals and society. These issues will be examined through case studies of folk/traditional music, popular music, and art music from both Western and non-Western cultures. Topics covered may include, for example, music and identity, music and politics, music and gender, music as commodity, and so on. This module will also provide a basic introduction to the primary research methods in the field of ethnomusicology, including participant observation, interviewing, and fieldwork.		
Intended learning outcomes		
Upon the successful completion of this module, students should have a basic understanding of how music influences and is influenced by society. They should be able to think critically about the social nature of music-making in their own and other music cultures. They should have a basic understanding of key ethnomusicological research methods.

This colloquium continues to explore current scholarly work and addresses additional contemporary issues in the field of ethnomusicology and related disciplines. It provides a forum for the exchange and development of ideas and peer feedback on work-in-progress.		
Intended learning outcomes		
On successful completion of this module, students should be able to engage in meaningful conversations on contemporary research topics and provide constructive peer feedback on work-in-progress.		
Courses (type, number of weekly contact hours, language — if other than German)		
S (2) Module taught in: German and/or English		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) presentation (approx. 45 minutes) or b) portfolio (70 to 100 hours total) or c) written homework (approx. 3,000 to 5,000 words) or Language of assessment: German and/or English		
Allocation of places		
20 places. Should the number of applications exceed the number of available places, places will be allocated as follows: Bachelor's students of Ethnomusicology (60 ECTS points) will be given preferential consideration. The remaining places will be allocated to students of other subjects. Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.

The module consists of a lecture on the contemporary history of the People's Republic of China (PRC) and a seminar on Chinese regional studies. The lecture introduces students to the first 40 years of the PRC (1949 to 1989). The regional studies seminar provides knowledge on physical-geographical basics, administrative structures of the PRC, population, regional disparities, social welfare and cultural mechanisms. The module is a compulsory module aimed at first-year students in the first semester.			
Intended learning outcomes			
Students have a solid knowledge of the political history of the People's Republic of China until 1989 as well as of regional, geographical and ecological facts and fundamental social developments. They are able to classify further topics on contemporary China in this basic structure.

In two courses within one year, the module offers an overview of the history of China from the Neolithic cultures to the end of the Republican period. In addition to a chronological introduction to the factual history, there is a thematic deepening in the following areas of epoch-typical relevance, such as tensions between centre and periphery, state unity and regional fragmentation, aristocracy and bureaucracy, self-image and world view, relation between city and country, philosophical and religious movements, evidence of material culture, economic reforms or international relations. An introduction to the state of historiographical discussion of the most important epochs and areas of Chinese history is given.		
Intended learning outcomes		
Students are able to independently classify events in Chinese history chronologically and thematically. They are able to analyse historical phenomena comparatively and critically and to establish references to current China from a historical perspective. They have the basic knowledge of independent and in-depth familiarisation with further historical questions.

The module comprises two courses on Chinese contemporary history. In the lecture on China's most recent history (from 1990), students get a contemporary historical overview of the most important events in politics, economy and society. This forms the basis for in-depth courses in other modules. The second component of the module is a seminar on Greater China, which deals with the historical, political and social developments of Taiwan, Hong Kong and Singapore. This module is aimed at students in an early to intermediate stage of their studies.		
Intended learning outcomes		
The module provides students with the ability to orientate themselves in China's contemporary history as well as in the context of Greater China. They become familiar with the subject area of their studies and, on this basis, are able to decide independently which partial aspects they would like to deepen and supplement in other advanced modules.

The module consists of the lecture "Political System of the PR China" and the seminar "Beijing". The basic knowledge of political structures and processes, as taught in the lecture on the political system of the PRC, is indispensable for a deeper understanding of other subject areas. The second course of this module is a seminar that deals with the capital of the PRC and examines historical, social, cultural and economic aspects of its urban development. The module is aimed at students in the intermediate stage of their studies.		
Intended learning outcomes		
Students acquire the ability to understand political structures and processes in the People's Republic of China and to assess their impact on society. Furthermore, they are able to orientate themselves in Beijing and its urban history, which enriches and facilitates their stay there in their fourth semester.

The module discusses the influence of emotional and cognitive perception in education and learning processes. It gives insight into aesthetic, for the senses comprehensible dimensions of education and learning. Development, modelling as well as effects of the human's central perception are discussed in this context.		
Intended learning outcomes		
The students understand the relevance of meaningful experiences through the senses for processes of education and learning. They are capable of discussing aesthetic phenomena considering the meaning for education and learning and then can pose questions with a relevance for education.

Contents			
Information literacy in an academic context: search strategies, resources, reference management, copyright, etc.			
Intended learning outcomes			
Students know what information is needed for what purpose. They are able to locate information that is relevant within their discipline(s) and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their papers.

Module title			Abbreviation
Introduction to Data Analysis and Statistics I			o6-PSS-FSQ-Meth1-152-mo1
Module coordinator		Module offered by	
holder of the Chair of Quantitative Methods in the Social Sciences			
ECTS	Method of grading	Only after succ. compl. of module(s)	
5	numerical grade	--	
Duration	Module level	Other prerequisites	
1 semester	undergraduate	--	
Contents			
Basic concepts (measurement, scale levels), univariate statistics (frequencies, measures of central tendency, measures of dispersion), basics of inferential statistics, bivariate statistics (cross-tabulation, correlation, t-test), analysis of variance, OLS regression			
Intended learning outcomes			
The students know the most important measures of statistics. They are able to apply these measures adequately to empirical questions, calculate them in the right way and interpret them correctly. They know the assets and drawbacks of the measures covered by the course. They can apply a statistical program to deal with the contents covered by the course.			
Courses (type, number of weekly contact hours, language — if other than German)			
V (2) + Ü (1) Module taught in: German and/or English			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)			
a) written examination (approx. 90 minutes) or b) oral examination of one candidate each (approx. 30 minutes) or c) written examination (approx. 90 minutes) and 3 to 5 written exercises (approx. 10 hours total), weighted 8:2 Language of assessment: German and/or English

Contents			
Multivariate analysis procedures for cross-sectional data (multiple OLS regression, logistic regression, models for count data), regression diagnostics, basics of advanced multivariate analysis procedures for different data structures (e.g. event history analysis, panel data analysis, multi-level analysis)			
Intended learning outcomes			
The students know which multivariate data analysis methods are to be applied to which data structure. They will understand the basic principles of the methods dealt with and which model assumptions have to be fulfilled. They are able to interpret the results correctly.
