Content and Objectives of the Programme

The M.A. course in Classical Archaeology with the final qualification Master of Arts is offered as a research oriented programme. Its aim is to introduce the student to the in-depth work with selected topics of Classical Archaeology, to enable him / her to discern problems in research and desiderates and to independently develop solutions on the basis of a sound overview of the ancient Graeco-Roman culture. By training these capabilities solid foundations for a PhD course are laid.

The course focuses on the independent and critical reflection of archaeological research. Acquiring specialised knowledge in specific branches of Classical Archaeology is conditioned by this goal.

The M.A. thesis demonstrates that the graduate is able to deal with a thematically limited archeological problem within a given time according to the taught methods and scholarly standards. The graduate has accomplished this task independently but receiving professional guidance.

The M.A. in Classical Archaeology is an internationally comparable degree that usually constitutes the basis for the subsequent PhD course, which qualifies for the start of a professional job. In a final colloquium the graduate has proved to be capable of defending his thesis in a scientific discussion by scholarly methods.

The M.A. in Classical Archaeology typically aims at preparing for the work at research institutions such as universities, academies of science, the German Archaeological Institute (DAI) or museums with collections of antiques. Furthermore, degree holders are provided with the skills to assume jobs outside academia, e.g. in publishing, libraries, culture management, the media, tourism, museology, public relations and diplomatic service.

The expert knowledge and skills necessary for an academic career is imparted in the respective modules. Classical Archaeology is a very wide subject that deals with a range of sources and material remains arising from over 3000 years. Consequently, it is impossible to introduce students to all fields of the subject with equal thoroughness. Thus, courses concentrate on equipping the students with knowledge dealing with exemplary monuments, genres of art and various scientific challenges. Alongside this specialised basic competence, the courses provide the methodological capability to make oneself familiar with new and complex topics quickly and efficiently. Thus, the graduate is familiar with and used to permanent learning and to reach solutions by adequate methods. He / she develops a high degree of individual initiative and commitment to acquire profound factual information.

The cultures which are subject to Classical Archaeology are mainly located in the Mediterranean area. Work as an archaeologist therefore requires close relations to the countries in this area and accordingly the relevant knowledge of foreign languages. Through the respective modules as well as stays abroad (e.g. excavations, field trips, Erasmus-exchange programme) the students acquire the ability to operate internationally. Linguistic competence is reinforced by the specialist literature which is to a great extent composed in foreign languages, especially, French, Greek and Italian. This way the students learn to comprehend complex texts in other languages and to extract the basic statements.

Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2007

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

7-Apr-2009 (2009-19)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Compulsory Courses

(90 ECTS credits)

Module title		Abbreviation
Evidence of Greco-Roman culture 1: Interpretational approaches 1		o4-KA-ZeuWe1-o82-mo1
