Content and Objectives of the Programme

The intended aims and learning outcomes of the programme have been defined to meet the requirements of the Verordnung über die Ausbildung und Prüfung der Staatlich geprüften Lebensmittelchemikerinnen und Lebensmittelchemiker (regulations for the training and examination of state-examined food chemists, APOlmCh).

Graduates from the Food Chemistry programme leading to the degree of Master of Science (MSc, 120 ECTS credits) are permitted to use the job title ‘Lebensmittelchemiker’/‘Lebensmittelchemikerin’.

The programme is offered as a research-based course that gives students the opportunity to deepen their theoretical and practical knowledge about the chemistry, analysis and technology of foods, cosmetics, consumer goods and feeds as well as their knowledge and skills in the areas of food law, biochemistry, toxicology and environmental analysis (topics covered in part 2 of the state examination according to Section 18 (1) to (3) APOlmCh in conjunction with Appendix 3 to the APOlmCh).

In addition, the programme equips students with the ability to develop and validate methods.

In their Master's thesis, students solve a complex issue in food chemistry, applying the knowledge and skills they have developed throughout the programme.

Graduates from the Master's programme in Food Chemistry are able to select, from a matrix such as foods, cosmetics, consumer goods or feeds, the criteria that are relevant to solving a scientific problem, e.g. a problem relating to the identity, quality and safety of foods, and to evaluate that problem on the basis of the valid results of the analyses performed by them.

If necessary, they are able to develop and validate the instrumental as well as cell and molecular biological, quantitative methods needed for that purpose.

The knowledge and skills described above are equivalent to the knowledge and skills to be demonstrated in part 2 of the state examination for food chemists. Graduates who possess that knowledge and those skills qualify for admission to part 3 of the state examination.
Abbreviations used

Course types: E = field trip, K = colloquium, O = conversatorium, P = placement/lab course, R = project, S = seminar, T = tutorial, Ü = exercise, V = lecture

Term: SS = summer semester, WS = winter semester

Methods of grading: NUM = numerical grade, B/NB = (not) successfully completed

Regulations: (L)ASPO = general academic and examination regulations (for teaching-degree programmes), FSB = subject-specific provisions, SFB = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

19-May-2021 (2021-55)

22-Mar-2022 (2022-8)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

**Contents**

Quantitative and qualitative aspects of nutrition, e.g. energy balance, basal metabolic rate, the gross and metabolizable energy of the three main nutrients, biological value; fundamental principles of dietetics and special diets; functions of the main organs; fundamental principles of digestion, absorption and excretion as well as of the biosynthesis and metabolism of food constituents; interactions in intermediary metabolism; principles of metabolic regulation and hormonal regulation; mineral metabolism; nutrition and vitamins.

**Intended learning outcomes**

Students know how the relevant micro and macronutrients are transported through the human body. They have developed an understanding of the biochemical processing of nutrients in the cells and of the regulatory mechanisms of metabolic pathways.

**Courses** (type, number of weekly contact hours, language — if other than German)

V (2) + V (2)

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) written examination (60 to 120 minutes) or b) oral examination of one candidate each (approx. 20 minutes) or c) oral examination in groups (groups of 2, approx. 30 minutes total)

Language of assessment: German or English

**Allocation of places**

--

**Additional information**

Pursuant to Section 20 Subsection 2 Sentence 1 Verordnung über die Ausbildung und Prüfung der Staatlich geprüften Lebensmittelchemikerinnen und Lebensmittelchemiker (Regulation on the training and examination of state-certified food chemists, APOLmCh) in conjunction with No. I 3. of Annex 3 of APOLmCh and Section 20 Subsection 3 Sentence 1 APOLmCh. Pursuant to Section 2 Subsection 2 Sentence 2 Verordnung über die Ausbildung und Prüfung der Staatlich geprüften Lebensmittelchemikerinnen und Lebensmittelchemiker (Regulation on the training and examination of state-certified food chemists, APOLmCh) in conjunction with No. II 2. Letter e of Annex 1 of APOLmCh.

### Duration
2 semester

### Contents
German contents available but not translated yet.

Grundlagen der Einwirkungsarten von natürlichen und synthetischen Chemikalien, Toxikodynamik (Rezeptor-Theorie, Dosis-Wirkungs-Beziehungen); Toxikokinetik (Aufnahme, Verteilung, Biotransformation, Elimination); Einteilung von Giftstoffen und ihrer biologischen Wirkung; Toxikologie und Tierversuche; Untersuchungsmethoden der Toxikologie (Prüfung auf akute, subakute, subchronische, chronische, kanzerogene, mutagene und teratogene Wirkungen); Prinzipien von epidemiologischen Erhebungen; Risikoabschätzung und Festlegung von Höchstmen gen, Grenzwerten und Richtwerten.

### Intended learning outcomes
German intended learning outcomes available but not translated yet.

Die Studierenden kennen die Toxikokinetik, die Wirkmechanismen und deren experimentelle Nachweise von lebensmittelchemisch relevanten natürlichen und synthetischen Chemikalien sowie die Prinzipien von epidemiologischen Erhebungen. Sie kennen die Vorgehensweise bei einer Risikoabschätzung und bei der Festlegung von Grenz- und Richtwerten. Die Studierenden wählen selbständig einen angemessenen Test für eine einfache lebensmitteltoxikologische Fragestellung aus und führen ihn durch.

### Courses
(V (2) + V (2) + P (2)

### Method of assessment
a) written examination (60 to 120 minutes) or b) oral examination of one candidate each (approx. 20 minutes) or c) oral examination in groups of 2 candidates (approx. 30 minutes total) and lab course assessment components: Vortestate and Nachtestate (pre and post-experiment exams, approx. 15 minutes), assessment and documentation of practical assignments (approx. 10 pages) and written report (approx. 5 to 10 pages)

Language of assessment: German or English

Assessment offered: usually once a year, winter semester

### Contents

- b) Overview of the organisation and purpose of official controls on products and tobacco products pursuant to Section 1 Subsection 1 Sentence 1 No. 2, aa) Administrative structures at the federal and state levels, bb) Constitutional law and general administrative law, cc) Administrative jurisdiction, dd) Offences and legal proceedings, ee) EU institutions and bodies, ff) Legal acts of the EU.  
- c) Overview of quality assurance procedures in laboratories and industry, aa) Quality management systems in laboratories and industry (DIN EN ISO 9000 and EN 45000 or ISO/IEC 17000 standards, OECD Principles of Good Laboratory Practice (GLP)), bb) German and EU legislation on conformity assessment including certification and testing, cc) Handbooks and documentation of quality assurance procedures in laboratories and the food industry.

### Intended learning outcomes

Students are able to identify foods, cosmetics, feeds, consumer goods and tobacco products as well as to assess them on the basis of the relevant laws. They know which national and international bodies are responsible for which food regulatory issues. They have developed the necessary theoretical knowledge to enable them to develop a quality management system and work according to the standards of good laboratory practice.

### Courses

- V (1.3) + V (1.3)

### Method of assessment

- a) written examination (60 to 120 minutes) or b) oral examination of one candidate each (approx. 20 minutes) or c) oral examination in groups (groups of 2, approx. 30 minutes total)

Language of assessment: German or English

### Allocation of places

Contents

Chemical composition, production and analysis of conventional and special foodstuffs and animal feed. Chemical alteration, function and effect of food ingredients as well as legal regulations in the field of special foodstuffs and animal feed. Conception and performance of experiments as well as evaluation and interpretation of measurement data with the objective to answer a scientific issue.

Intended learning outcomes

The students know the chemistry and analysis of foodstuffs and animal feed as well as of special foodstuffs with functional ingredients or genetically modified organisms. The students are able to understand and critically evaluate scientific studies and assessments of food ingredients and special foodstuffs, also considering legal regulations. The students can identify advantages and disadvantages of different analytical methods and select appropriate methods for answering a scientific issue. The students are able to evaluate the identity, quality and safety of foodstuffs using valid analysis results, appropriate methods for statistical evaluation and presentation.

### Contents

Quantitative analysis of relevant ingredients of foodstuffs, tobacco products, cosmetics, commodities and animal feed by applying appropriate calibration and validation strategies. Basic concepts, technological processes, quality and monitoring in the field of animal feed.

### Intended learning outcomes

The students can select an appropriate method for the quantitative analysis of foodstuffs, tobacco products, cosmetics, commodities and animal feed and develop a calibration strategy considering analyte-and matrix-dependent characteristics. They can confirm the validity of test results by selecting suitable validation parameters and evaluate the test results with respect to scientific issues. Due to basic knowledge in the field of products, technology and monitoring of animal feed as well as in the field of animal feeding, the students are able to understand the link between quality of animal feed and quality of foodstuffs and to identify critical parameters in the quality of animal feed.

Contents

Chemical constituents, production and analysis of cosmetics, consumer goods and tobacco products. Chemical changes caused in those products during processing, storage and transportation as well as pharmacological and toxicological effects of their normal and abnormal constituents.

Intended learning outcomes

Students are familiar with cosmetics, consumer goods and tobacco products as well as with their chemical constituents. They know methods for the analysis of cosmetics, consumer goods and tobacco products, the relevant legal provisions as well as constituents that have pharmacological and toxicological effects.

**Contents**

Working with the food chemistry literature and databases, discussion of recent research findings and current methods in food chemistry, solution of research problems, statistical analysis of data, presentation of research findings.

**Intended learning outcomes**

Students have developed the ability to find literature about a particular research problem, perform experiments to solve that problem, prepare an account of their work and deliver a presentation on their findings.

**Courses** (type, number of weekly contact hours, language — if other than German)

| S (1) + Ü (1) + P (17) |

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

lab course assessment components: Vortestate and Nachtestate (pre and post-experiment exams, approx. 15 minutes), assessment and documentation of practical assignments (approx. 10 pages) and written report (approx. 5 to 10 pages)

Language of assessment: German or English
