Content and Objectives of the Programme

The master program in Psychology at the University of Würzburg is a consecutive program with a regular duration of two years. The program qualifies for research activities as well as professional work in the field of Psychology. Knowledge from the preceding bachelor program in Psychology is deepened and extended. The graduates learn to independently work based on scientific methods and are prepared for practical work as psychologists. They obtain qualifications for several work fields such as health, education, working environments, culture and research. The Master degree is one of the formal requirements for a subsequent doctoral program.

The following skills are acquired:

- 1. Methodical skills**  
Advanced methodical (in particular statistical) and diagnostic skills.  
Application of these skills in a supervised research project. Ability to independently work on a psychological problem with scientific methods and given time constraints by preparation of the master thesis.
- 2. Subject-specific skills in fields in psychology**  
By choosing two of three psychological subjects (one as major the other as minor) from the fields “Decision Making, Action Control, & Human Factors”, “Education, Development, & Lifelong Learning” and “Clinical Psychology, Interventional Psychology, & Clinical Neurosciences” state-of-the-art knowledge in the corresponding basic or applied fields are acquired.
- 3. Subject-specific fields beyond psychology**  
In obligatory nonpsychological electives the graduates gain insight in several fields that are not originally psychological, but relevant for psychological research and practical work, such as psychiatry, computer sciences, neurobiology, and media research.
- 4. Work-relevant, practical skills**  
The graduate has gained deepened insight into working in a job under the qualified supervision of a psychologist within the context of a 12-week orientation internship.

## Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

## Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

## Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

## In accordance with

the general regulations governing the degree subject described in this module catalogue:

**ASPO2009**

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

**12-Jul-2012 (2012-118)**

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

## Compulsory Courses

(30 ECTS credits)

Module title			Abbreviation
Psychological Research Methods			o6-PSY-MA-ML-122-mo1
Module coordinator		Module offered by	
holder of the Professorship of Psychological Research Methods		Institute of Psychology	
ECTS	Method of grading	Only after succ. compl. of module(s)	
10	numerical grade	--	
Duration	Module level	Other prerequisites	
1 semester	graduate	By way of exception, additional prerequisites are listed in the section on assessments.	
Contents			
The students acquire knowledge and skills of applying complex statistical evaluation methods (e.g. multifactorial variance analyses, multiple regression, linear structural equation models, factor analysis, cluster analysis, epidemiology, scaling methods, logistic regression). They use statistics software to practice these methods as well as the interpretation of results on the basis of sample datasets.			
Intended learning outcomes			
The students acquire knowledge of more complex statistical methods and learn to select appropriate methods to examine empirical questions, to employ these methods with the help of modern statistics software, to sensibly present the results and to interpret the results in view of the limits of these methods.			
Courses (type, number of weekly contact hours, language — if other than German)			
This module comprises 2 module components. Information on courses will be listed separately for each module component. <ul style="list-style-type: none"><li>o6-PSY-MA-ML-1-122: S (no information on SWS (weekly contact hours) and course language available)</li><li>o6-PSY-MA-ML-2-122: S (no information on SWS (weekly contact hours) and course language available)</li></ul>			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)			
Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.			
<b>Assessment in module component o6-PSY-MA-ML-1-122: Psychological Research Methods 1</b> <ul style="list-style-type: none"><li>5 ECTS, Method of grading: numerical grade</li><li>written examination (approx. 120 minutes)</li><li>Other prerequisites: Admission prerequisite to assessment: exercises (ungraded; approx. 10 hours).</li></ul>

1 semester	graduate	--
<b>Contents</b>		
In this module, the students acquire advanced knowledge of psychological diagnostics, especially regarding the essential work task of carrying out assessments.		
<b>Intended learning outcomes</b>		
The students advance their knowledge of Psychological Diagnostics. They are able to carry out psychological assessments. This includes the examination of psychological questions, the selection and employment of psychological tests, the drawing up of a report as well as the presentation and justification of a diagnostic result.		
<b>Courses</b> (type, number of weekly contact hours, language — if other than German)		
S (no information on SWS (weekly contact hours) and course language available)		
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
assessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page DIN A4) or i) case report * (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 1/2 pages per session). *: A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.

Contents		
During the work placements, the students gain insights into the occupational activity of a psychologist in a corresponding institution and/or in the private sector under the guidance of a supervisor with a diploma or a Master's degree in Psychology. The students practice and improve the skills acquired in the courses.		
Intended learning outcomes		
The students learn to apply theoretical and practical aspects of the degree course in their work placements. They establish first contacts in the vocational world and therefore lay a foundation for their future choice of occupation and the specialisation of their Master's degree programme.		
Courses (type, number of weekly contact hours, language — if other than German)		
P (no information on SWS (weekly contact hours) and course language available)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
1 placement report (approx. 8 pages) or 2 placement reports (approx. 4 pages each) if placement is divided up into 2 individual placements. Duration of placement: 12 weeks; can be divided up into 2 individual placements, each placement must, however, have a minimum duration of 4 weeks. As a rule, it must be ensured that the person supervising the placement has a degree as Diplompsychologe or a Master's degree in psychology. Upon approval by the examination committee, this rule can be deviated from if it can be ensured that the placement is supervised by a person with an equivalent qualification.

## Compulsory Electives

(60 ECTS credits)

## **Compulsory Electives 1 (Main Subject)**

(20 ECTS credits)

Module title		Abbreviation
<b>Decision Making, Action Control &amp; Human Factors - Advanced</b>		o6-PSY-MA-EHAV-122-mo1
Module coordinator		Module offered by
holder of the Professorship of Industrial and Organisational Psychology, holder of the Chair of Experimental and Cognitive Psychology, holder of the Chair of Social Psychology		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
20	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
<b>Contents</b>		
This course lays the scientific groundwork for the occupational activities of psychologists. It discusses the requirements and implementation possibilities of correct decision making, target-oriented action and efficient work in view of Industrial Psychology, Cognitive Psychology and Social Psychology. The students acquire advanced competencies in applying psychological knowledge in order to achieve different organisational goals in a profitable manner (e.g. personnel selection, efficient communication, working atmosphere, decision making, workplace design, organisation of tasks etc.).		
<b>Intended learning outcomes</b>		
The students acquire advanced basic knowledge of questions of Cognition and Social Psychology and advanced application-oriented knowledge of questions of Industrial and Organisational Psychology. They learn about the relevance of theories and concepts such as (social) perception, interaction, motivation, action control, multiple requirements etc. for analysing and improving the conditions of work and communication. The students acquire advanced knowledge which enables them to develop evidence-based solution approaches for practical problems in companies and organisations.		
<b>Courses</b> (type, number of weekly contact hours, language — if other than German)		
This module has 4 components; information on courses listed separately for each component. <ul style="list-style-type: none"> <li>o6-PSY-MA-EHA-1-122, o6-PSY-MA-EHA-2-122, o6-PSY-MA-EHA-3-122, and o6-PSY-MA-EHA-4-122: S (no information on language and number of weekly contact hours available)</li> </ul>		
<b>Method of assessment</b> (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
This module has the following 4 assessment components. Unless stated otherwise, students must pass all of these assessment components to pass the module as a whole.		
<b>Assessment in module component o6-PSY-MA-EHA-1-122:</b> Entscheiden, Handeln, Arbeiten 1 (Decision Making, Action Control, Human Factors 1), <b>in module component o6-PSY-MA-EHA-2-122:</b> Entscheiden, Handeln, Arbeiten 2 (Decision Making, Action Control, Human Factors 2), <b>in module component o6-PSY-MA-EHA-3-122:</b> Entscheiden, Handeln, Arbeiten 3 (Decision Making, Action Control, Human Factors 3), and <b>in module component o6-PSY-MA-EHA-4-122:</b> Entscheiden, Handeln, Arbeiten 4 (Decision Making, Action Control, Human Factors 4) :5 ECTS credits, numerical gradingassessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page DIN Ao) or i) case report * (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 1/2 pages per session). *: A case report describes a disorder, using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.

2 semester	graduate	Admission prerequisite to assessment: one ungraded assessment according to assessment group Seminar required for each seminar. Assessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page, DIN A0) or i) case report* (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session). * A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.
Contents		
This module deals with complex topics of Educational Psychology and Developmental Psychology. It covers a wide range of specific topics which are geared towards current research fields. For example, it offers seminars dealing with personality development across the lifespan, development in middle and late adulthood, educational success in the context of bilingualism and migration as well as mindfulness regarding behavioural disorders. It builds upon the knowledge acquired during the Bachelor's degree and focuses on practical relevance.		
Intended learning outcomes		
The students advance their competencies acquired during the Bachelor's degree programme. They acquire profound, theoretical professional competencies in current practice- and research-oriented topic areas of Educational and Developmental Psychology. Therefore, the module prepares the students for different occupational activities, such as research activities in Educational and Developmental Psychology, psychological test diagnosis and (educational) counselling activities.

holder of the Professorship of Clinical Psychology, Biological Psychology and Psychotherapy, holder of the Professorship of Intervention Psychology		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
20	numerical grade	--
Duration	Module level	Other prerequisites
2 semester	graduate	Admission prerequisite to assessment: one ungraded assessment according to assessment group Seminar required for each seminar. Assessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page, DIN A0) or i) case report* (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 0.5 pages per session). * A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.
Contents		
The module offers detailed insights into the principles of Clinical Psychology and Intervention Psychology with a focus on neuroscientific findings. It provides the students with disorder-specific knowledge of differential diagnosis, hypothesis and experimental findings as well as the methodological principles of this branch of Psychology. The lecture addresses characteristics of healthy and disturbed behaviour, especially in view of behavioural medicine. It discusses the neurobiological correlates of relevant disorders as well as therapeutic change. The seminars elaborate on the methods and current subject areas of Psychology. In one seminar, the students learn how to apply psychological knowledge to psychotherapeutic cases from real life.		
Intended learning outcomes		
The students acquire profound, theoretical and practical professional competencies as well as comprehensive methodological competencies in the area of Clinical Psychology and Intervention Psychology with a focus on Clinical Neuroscience. By incorporating clinical cases, the students acquire competencies for the understanding of the development and persistence of mental disorders as well as for diagnosis and therapy planning. By examining specific clinical cases, the students gain first therapeutic competencies.		
Courses (type, number of weekly contact hours, language — if other than German)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
written examination (60 minutes)		
Allocation of places		
Number of places: maximum 30. Should the number of applications exceed the number of available places, places will be allocated as follows: Applicants who have not yet achieved any of the required ECTS credits in the respective sub-area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated by lot. Should there be, within one module, several module components with a restricted number of places, the result of the selection process for one module component will also apply to all other module components.

<p>In diesem Fach sollen die wissenschaftlichen Grundlagen für die Tätigkeit von Psychologinnen und Psychologen in Arbeitskontexten gelegt werden. Aus arbeitspsychologischer, kognitionspsychologischer und sozialpsychologischer Perspektive werden die Voraussetzungen richtigen Entscheidens, zielgerichteten Handelns und effektiven Arbeitens behandelt und mögliche Umsetzungen in der Praxis erörtert. Dabei geht es um den Erwerb von Wissen und Kompetenzen, die es Berufsanfänger/innen ermöglichen, psychologische Erkenntnisse für das Erreichen unterschiedlicher Organisationsziele (z.B., Personalauswahl, effektive Kommunikation, Betriebsklima, Entscheidungen, Arbeitsplatzgestaltung, Strukturierung von Aufgaben, etc.) gewinnbringend anzuwenden.</p>		
<b>Intended learning outcomes</b>		
German intended learning outcomes available but not translated yet.		
<p>Die Studierenden erwerben, je nach Wahl der Veranstaltungen, vertieftes Grundlagenwissen zu Fragen der Kognitions- und Sozialpsychologie und vertieftes anwendungsbezogenes Wissen zu Fragen der Arbeits- und Organisationspsychologie. Sie lernen die Bedeutung von Theorien und Konzepten wie (soziale) Wahrnehmung, Interaktion, Motivation, Handlungskontrolle, Mehrfachanforderungen usw. für die Analyse und Verbesserung der Bedingungen des Arbeitens und Kommunizierens kennen. Dieses fundierte Wissen soll es den Studierenden ermöglichen, evidenzbasierte Lösungsvorschläge für praktische Problemstellungen in Unternehmen und Organisationen zu erarbeiten.</p>

This module deals with complex topics of Educational Psychology and Developmental Psychology. It covers a wide range of specific topics which are geared towards current research fields. For example, it offers seminars dealing with personality development across the lifespan, development in middle and late adulthood, educational success in the context of bilingualism and migration as well as mindfulness regarding behavioural disorders. It builds upon the knowledge acquired during the Bachelor's degree and focuses on practical relevance.		
Intended learning outcomes		
The students advance their competencies acquired during the Bachelor's degree programme. They acquire profound, theoretical professional competencies in current practice- and research-oriented topic areas of Educational and Developmental Psychology. Therefore, the module prepares the students for different occupational activities, such as research activities in Educational and Developmental Psychology, psychological test diagnosis and (educational) counselling activities.		
Courses (type, number of weekly contact hours, language — if other than German)		
S + S + S (no information on SWS (weekly contact hours) and course language available)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) written examination (50 minutes) or b) oral examination (approx. 25 minutes)

<b>Clinical Psychology, Interventional Psychology, &amp; Clinical Neurosciences - Advanced</b>		o6-PSY-MA-KIN-122-m01
Module coordinator		Module offered by
holder of the Professorship of Clinical Psychology, Biological Psychology and Psychotherapy, holder of the Professorship of Intervention Psychology		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
15	numerical grade	--
Duration	Module level	Other prerequisites
2 semester	graduate	Admission prerequisite to assessment: one ungraded assessment according to assessment group Seminar required for each seminar. Assessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page, DIN A0) or i) case report (approx. 5 pages) (a case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this) or exercises in the form of questions to be answered during the seminar (approx. 1/2 a page per session).
Contents		
The module offers detailed insights into the principles of Clinical Psychology and Intervention Psychology with a focus on neuroscientific findings. It provides the students with disorder-specific knowledge of differential diagnosis, hypothesis and experimental findings as well as the methodological principles of this branch of Psychology. The lecture addresses characteristics of healthy and disturbed behaviour, especially in view of behavioural medicine. It discusses the neurobiological correlates of relevant disorders as well as therapeutic change. The seminars elaborate on the methods and current subject areas of Psychology.		
Intended learning outcomes		
The students acquire profound, theoretical and practical professional competencies as well as comprehensive methodological competencies in the area of Clinical Psychology and Intervention Psychology with a focus on Clinical Neuroscience. By incorporating clinical cases, the students acquire competencies for the understanding of the development and persistence of mental disorders as well as for diagnosis and therapy planning.		
Courses (type, number of weekly contact hours, language — if other than German)		
V + S + S (no information on SWS (weekly contact hours) and course language available)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
a) written examination (60 minutes) or b) oral examination (approx. 30 minutes)		
Allocation of places		
Number of places: maximum 30. Should the number of applications exceed the number of available places, places will be allocated as follows: Applicants who have not yet achieved any of the required ECTS credits in the respective sub-area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated by lot. Should there be, within one module, several module components with a restricted number of places, the result of the selection process for one module component will also apply to all other module components.

In this module, the students work on a pre-defined empirical research project from the subject area of motivation and emotion under the guidance of a supervisor.			
Intended learning outcomes			
The students learn to deduce a question from research literature and to translate this question into an empirical research design. They advance their skills in evaluating and properly interpreting data obtained in experiments. The module prepares the students for the independent realisation of experimental research projects..			
Courses (type, number of weekly contact hours, language — if other than German)			
This module comprises 2 module components. Information on courses will be listed separately for each module component. <ul style="list-style-type: none"><li>o6-PSY-MA-ME-1-122: S (no information on SWS (weekly contact hours) and course language available)</li><li>o6-PSY-MA-ME-2-122: R (no information on SWS (weekly contact hours) and course language available)</li></ul>			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)			
Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.			
Assessment in module component o6-PSY-MA-ME-1-122: Motivation and Emotion 1 <ul style="list-style-type: none"><li>5 ECTS, Method of grading: numerical grade</li><li>assessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page DIN Ao) or i) case report * (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 1/2 pages per session). *: A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.</li></ul>

Contents		
The "Project Work Differential Psychology" addresses current research projects. It discusses the theoretical principles and goals of the current projects and theoretically and practically prepares the students for an active involvement as researchers. Furthermore, the students write own scientific reports and contributions to improve their scientific writing skills.		
Intended learning outcomes		
The students learn to critically and thoroughly examine current research literature and to use this expertise for the development of new research questions. They acquire theoretical and scientific knowledge in preparation for the independent examination of a research question in their Master's thesis. The students gather in small groups to develop, carry out and evaluate an empirical examination and compare the results to the current state of research. Furthermore, the students learn to present results in a scientific manner (presentation, report, poster).

In project work, the students form small groups to carry out a study in the field of Clinical Psychology and experimental psychopathology. First, they become familiar with theoretical principles and develop an experimental design in seminars and tutorials. Next, they are introduced to independent work and become acquainted with data collection, evaluation and interpretation under the guidance of a supervisor. After discussing the results, the students write individual reports in the form of manuscripts following the guidelines of the DGPs (German Society for Psychology) /APA (American Psychological Association). In the following seminar, which builds upon the project work, the students give oral presentations discussing fundamental works relevant to the project as well as the results of the project work or principles or results of the intended Master's thesis.

The module deals with current research fields of Educational Psychology and Developmental Psychology.			
Intended learning outcomes			
The students acquire profound methodological skills in conducting research in the field of Educational and Developmental Psychology. Thus, they are prepared for carrying out research on and writing their Master's thesis. Furthermore, they acquire qualifying competencies for their future occupational activity, especially in the field of scientific work.

<b>Contents</b>		
In this module, the students acquire empirical skills in planning, carrying out, evaluating and presenting an experiment in a subdiscipline of Social Psychology. The students generally plan and carry out the experiments as individual works under the guidance of a supervisor (o6-Psy-MA-SK2) and discuss their experiments with students and staff of the Chair of Psychology in the colloquium (o6-Psy-MA-SK1).		
<b>Intended learning outcomes</b>		
In addition to advanced professional skills in the subdiscipline of working, the students acquire advanced empirical skills as well as knowledge of good scientific practice. These competencies especially prepare them for their Master's thesis.

In project work, the students work in a group to carry out a study in the field of behaviour regulation with reference to health-psychological or clinical topics. First, they become familiar with theoretical principles and develop an experimental design in seminars and tutorials. Next, they are introduced to independent work and become acquainted with data collection, evaluation and interpretation under the guidance of a supervisor. After discussing the results, the students write individual reports in the form of manuscripts following the guidelines of the DGPs (German Society for Psychology) /APA (American Psychological Association). In the following seminar, which builds upon the project work, the students give oral presentations discussing fundamental works relevant to the project as well as the results of the project work.			
Intended learning outcomes			
The students acquire profound theoretical knowledge as well as comprehensive methodological competencies in a specific research area of behaviour analysis and behaviour regulation. They advance their skills regarding the independent development of research ideas as well as the transferring into an empirical examination and the practical implementation of these ideas. This prepares the students for the writing of their Master's thesis and for a subsequent academic occupation.

<b>Assessment in module component o6-PSY-MA-VV-2-122: Analysis and Regulation of Behavior 2</b> <ul style="list-style-type: none"><li>10 ECTS, Method of grading: numerical grade</li><li>project report (approx. 10 pages)</li></ul>			

### Allocation of places

Number of places: max. 12. Should the number of applications exceed the number of available places, places will be allocated as follows: Applicants who have not yet achieved any of the required ECTS credits in the respective sub-area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. Should there be, within one module, several module components with a restricted number of places, the result of the selection process for one module component will also apply to all other module components.

Module title			Abbreviation
Experimental Clinical Psychology			o6-PSY-MA-EKI-122-mo1
Module coordinator		Module offered by	
holder of the Professorship of Experimental Clinical Psychology		Institute of Psychology	
ECTS	Method of grading	Only after succ. compl. of module(s)	
15	numerical grade	--	
Duration	Module level	Other prerequisites	
1 semester	graduate	--	
Contents			
This module provides an overview of the basic mechanisms contributing to the development and persistence of mental disorders. It discusses genetic, neurobiological and psychological factors and their interactions. It focuses on experimental animal and human studies which are relevant to Clinical Psychology and demonstrate how basic psychological concepts can contribute to the understanding of mental disorders.			
Intended learning outcomes			
The students acquire profound knowledge of relevant methodological approaches to experimental Clinical Psychology and of the transfer of fundamental research to clinical practice. The module promotes the students' understanding of the neurobiological foundations of mental disorders and addresses the relevance of psychological concepts for the explanation of clinical anomalies. In addition, the module's orientation on research serves as a preparation for the Master's thesis in an experimental-psychological context. The students acquire relevant professional competencies which prepare them for an academic career or for an occupation in the field of Neuropsychology or psychotherapy.			
Courses (type, number of weekly contact hours, language — if other than German)			
This module comprises 2 module components. Information on courses will be listed separately for each module component. <ul style="list-style-type: none"><li>o6-PSY-MA-EKI-1-122: S (no information on SWS (weekly contact hours) and course language available)</li><li>o6-PSY-MA-EKI-2-122: R (no information on SWS (weekly contact hours) and course language available)</li></ul>			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)			
Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.			
Assessment in module component o6-PSY-MA-EKI-1-122: Experimental Clinical Psychology 1 <ul style="list-style-type: none"><li>5 ECTS, Method of grading: numerical grade</li><li>assessment group Seminar: a) presentation (approx. 15 minutes) with written elaboration (approx. 6 pages) or b) presentation (approx. 30 minutes) with written elaboration (approx. 3 pages) or c) presentation (approx. 60 minutes) with handout (approx. 1 page) or d) written examination (approx. 60 minutes) or e) oral examination (approx. 15 minutes) or f) practical assignment (approx. 60 pages) or g) term paper (approx. 10 pages) or h) scientific poster (1 page DIN Ao) or i) case report * (approx. 5 pages) or j) exercises in the form of questions to be answered during the seminar (approx. 1/2 pages per session). *: A case report describes a disorder using the example of a (fictitious) patient; it includes a symptom report, a medical history, a behavioural assessment, a diagnosis and a treatment plan derived from this.</li></ul>

Master's degree (1 major) Psychology (2012)

Module title		Abbreviation
Forensic Psychiatry		o6-PSY-MA-FOR-122-m01
Module coordinator		Module offered by
head of the Section on Forensic Psychiatry at the Centre of Mental Health		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
<b>Contents</b>		
<p>The seminar on selected topics of Forensic Psychiatry and the interdisciplinary lecture provide an introduction to the field of Forensic Psychiatry. The students acquire basic theoretical knowledge in view of psychiatry, forensics, psychology and development dynamics and consolidate their knowledge on the basis of individual cases which yet have to be assessed or are of special clinical interest. The courses provide an overview of manifestations, development and treatment of mental disorders such as schizophrenia, addictive disorders, sexual disorders, personality disorders etc. while at the same time discussing relevant legal problems in the context of mental disorders. Therefore, the courses deal with aspects of guardianship and social law, different forms of delinquency (e.g.: property offences, homicide and sex offences) as well as questions of making prognoses, credibility, protection of victims and youth and adult crime prevention.</p>		
<b>Intended learning outcomes</b>		
<p>In the minor Forensic Psychiatry, the students can acquire the following subject/professional competencies: basic knowledge of psychiatric psychopathology and diagnostics, basic knowledge of forensics, knowledge of the history of psychiatry, knowledge of important specialised terminology as well as insights into treatment methods in the context of Forensic Psychiatry. The methodological competencies are focused on the structure of psychiatric exploration, the drawing up of a psychiatric report, principles of testpsychological diagnostics and the structure of a psychiatric expert report. The social competencies are focused on approaches to dealing with the mentally ill, interdisciplinary cooperation as well as opinion forming and representation in the group. Self-reflection, phenomena of countertransference and appreciative behaviour even towards complicated conversation partners can be observed and practised in the context of self-competencies.</p>
