Learning Outcomes

German contents and learning outcome available but not translated yet.

Berufsziele

Im viersemestrigen Masterstudiengang Psychologie (akademischer Grad: „Master of Science, M.Sc.“) werden **die** im Bachelorstudiengang Psychologie (B.Sc. Psychologie) erworbenen grundlegenden psychologischen Fähigkeiten und Kenntnisse vertieft und erweitert. Die Studierenden erlangen die Fähigkeit, eigenständig nach wissenschaftlichen Methoden zu arbeiten, und werden auf die Berufspraxis als Psychologin/Psychologe vorbereitet. Das Studium versieht die Studierenden mit einer Berufsfeldqualifikation für ein breites Spektrum an Handlungsfeldern in fachlichen Institutionen und in der Privatwirtschaft, beispielsweise in den Bereichen Forschung, Gesundheit, Erziehung und Bildung, Sozialwesen, Arbeitswelt und Kultur. Die Berufsfelder beziehen sich unter anderem auf

- die Lehre an Schulen, Hochschulen und Universitäten
- die Forschung in universitären und außeruniversitären Forschungseinrichtungen
- Arbeits- und Betriebsorganisation, Unternehmensentwicklung und Personalbereich
- Forensik, Justizvollzug und Gerichtswesen, z. B. Gutachtenerstellung
- Beratungs- und Leitungsfunktion in Beratungsstellen im Erziehungs- und Gesundheitsbereich
- Tätigkeiten in der Weiterbildung
- Tätigkeiten in der Bildungsevaluation
- Schulpsychologie (außerhalb Bayerns)
- Verkehrspsychologie
- Tätigkeit im öffentlichen Dienst

Nach aktueller Lage des Arbeitsmarktes sind die Einstellungsaussichten von Absolventinnen und Absolventen der Psychologie sehr gut. Die Arbeitslosigkeit liegt mit 2.3% bezogen auf das Jahr 2018 nach Angaben der Bundesagentur für Arbeit deutlich unter der allgemeinen Arbeitslosenquote und auch unterhalb der Arbeitslosenquote von Akademikerinnen und Akademikern.

Nach erfolgreichem Abschluss des Studiums verfügen die Absolventinnen und Absolventen über die folgenden Kompetenzen:

- Die Absolventinnen und Absolventen verfügen über fortgeschrittene methodische und diagnostische Kompetenzen, nicht nur in theoretischer Hinsicht, sondern auch in der Anwendung in der Forschung und in der außeruniversitären Berufspraxis.
- Sie verfügen über vertiefte Kenntnisse in einem breiten Spektrum von Grundlagen- und Anwendungsfächern der Psychologie.
- Sie verfügen in einem der drei als Schwerpunkt wählbaren Fachgebiete „Wirtschaftspsychologie & Human Factors“, „Bildungs-, Entwicklungs- & Medienpsychologie“ und „Psychologische Grundlagenforschung“ über umfassende Kenntnisse auf dem aktuellen wissenschaftlichen Stand.
- Sie sind in der Lage, ihre methodischen Fähigkeiten selbstständig auf wissenschaftliche Fragestellungen anzuwenden, Untersuchungen zu planen, durchzuführen und auszuwerten.
- Sie sind in der Lage, die eigenen methodischen Fähigkeiten zu erweitern und sich anhand von Primärliteratur, insbesondere in englischer Sprache, in den aktuellen Forschungsstand eines Spezialgebiets einzuarbeiten.
- Sie sind in der Lage, unter Anwendung der wissenschaftlichen Arbeitsweise und unter Beachtung der Regeln guter wissenschaftlicher Praxis psychologische Fragestellungen selbstständig zu bearbeiten und die Ergebnisse ihrer Arbeit darzustellen, zu bewerten und öffentlich zu vertreten.

- Sie verfügen über grundlegendes Wissen in nicht originär psychologischen Disziplinen, die aber relevant für psychologische Forschung und Berufspraxis sind oder Tätigkeitsfelder für Psychologinnen/Psychologen bieten, wie z.B. Psychiatrie, Informatik, Neurobiologie oder Medienkommunikation.
- Sie besitzen die Fähigkeit, als Psychologin bzw. Psychologie in interdisziplinär zusammengesetzten Teams mitzuwirken oder diese zu leiten.

Wissenschaftliche Befähigung

Die Absolventinnen und Absolventen verfügen über vertiefte Kenntnisse der forschungsmethodischen und theoretischen Grundlagen der Psychologie.

Die Absolventinnen und Absolventen können auf ein fundiertes forschungsmethodisches und theoretisches Wissen zur Erlangung neuer Erkenntnisse zurückgreifen.

Die Absolventinnen und Absolventen verfügen über einen breiten Überblick über die Teilgebiete der Psychologie.

Die Absolventinnen und Absolventen kennen angrenzende Gebiete der Psychologie und erkennen interdisziplinäre Zusammenhänge.

Die Absolventinnen und Absolventen besitzen ein differenziertes Methodeninventar, um empirische Fragestellungen strukturieren und analysieren zu können.

Die Absolventinnen und Absolventen wenden ihre Fähigkeiten und Kenntnisse in Projekten an und verfügen über Kenntnisse des aktuellen Forschungsstandes in mindestens einem Spezialgebiet der Psychologie.

Die Absolventinnen und Absolventen sind in der Lage, mit Fachvertretern auf dem aktuellen Stand der Forschung psychologische Fragestellungen zu diskutieren.

Die Absolventinnen und Absolventen sind in der Lage, sich anhand von Primärliteratur, insbesondere in englischer Sprache, in den aktuellen Forschungsstand eines Spezialgebiets einzuarbeiten.

Befähigung zur Aufnahme einer Erwerbstätigkeit

Die Absolventinnen und Absolventen sind in der Lage, unter Anwendung der wissenschaftlichen Arbeitsweise und unter Beachtung der Regeln guter wissenschaftlicher Praxis psychologische Fragestellungen selbstständig zu bearbeiten und die Ergebnisse ihrer Arbeit darzustellen, zu bewerten und öffentlich zu vertreten.

Die Absolventinnen und Absolventen besitzen die Fähigkeit, als Psychologin bzw. Psychologie in interdisziplinär zusammengesetzten Teams mitzuwirken oder diese zu leiten.

Die Absolventinnen und Absolventen haben fundiertes Wissen über die Teildisziplinen der Psychologie und kennen die beruflichen Anwendungsfelder.

Die Absolventinnen und Absolventen sind in der Lage, ihr Wissen selbstständig zu erweitern, und sie können sich neue Methoden selbstständig aneignen.

Persönlichkeitsentwicklung

Die Absolventinnen und Absolventen verfügen über ein breites Wissen über ihr Studienfach hinaus. Sie haben grundlegendes Wissen in nicht originär psychologischen Disziplinen, die aber relevant für psychologische Forschung und Berufspraxis sind oder Tätigkeitsfelder für Psychologinnen/Psychologen bieten.

Die Absolventinnen und Absolventen kennen die Regeln guter wissenschaftlicher Praxis und beachten sie.

Die Absolventinnen und Absolventen verfügen über die Fähigkeit, sich in einem internationalen Umfeld in neue Themen einzuarbeiten und Kontakte zu schließen.

Befähigung zum gesellschaftlichen Engagement

Die Absolventinnen und Absolventen können gesellschaftlich relevante psychologische Fragestellungen und Entwicklungen (z. B. im Bereich Bildung, Strafrecht, Arbeitswelt, Technikfolgenabschätzung ...) kritisch reflektieren und deren Auswirkungen auf die Wirtschaft, Gesellschaft, Kultur und Politik erfassen.

Die Absolventinnen und Absolventen können ihr Wissen bezüglich wirtschaftlicher, (bildungs-)politischer, gesellschaftlicher, naturwissenschaftlicher, kultureller etc. Fragestellungen erweitern und begründet Position beziehen.

Die Absolventinnen und Absolventen haben die Bereitschaft und Fähigkeit entwickelt, ihre Kompetenzen in partizipative Prozesse einzubringen und aktiv an Entscheidungen mitzuwirken.

Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

22-Mar-2022 (2022-16)

16-May-2024 (2024-69)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Compulsory Courses

(60 ECTS credits)

Module title		Abbreviation
Psychological Research Methods 1		o6-PSY-MA-ML-1-222-m01
Module coordinator		Module offered by
holder of the Professorship of Psychological Research Methods		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
Students obtain knowledge and abilities in applying multivariate statistical techniques and measurement theory (e.g. multiple regression, multifactorial ANOVA (mixed), ANCOVA, discriminant analysis) to evaluate scientific results and integrate them e.g. into own psychotherapeutical practice. The computations are performed using appropriate statistical software with sample data sets, and interpretation of results is trained in exercises.		
Intended learning outcomes		
Students get knowledge about different complex statistical procedures and the ability to select adequate procedures for testing hypotheses, to perform the procedures using modern statistical software, display the results consistently and to interpret results with respect to limitations of the statistical procedures appropriately.		
Courses (type, number of weekly contact hours, language – if other than German)		
S (2)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)

Contents		
<p>Aim of the seminar is the comprehensive training on the basics of psychological assessment and reporting. These include, but are not limited to, the design of the diagnostic process, acceptance criteria for the client's question, selection of relevant variables and derivation of hypotheses, planning the assessment and selection of procedures, conducting the assessment, evaluating and presenting the findings, answering the hypotheses and answering the client's question(s).</p>		
Intended learning outcomes		
<p>The students deepen their knowledge in psychological diagnostics. They are able to write psychological reports. This includes the development of the psychological problem, the formulation of hypotheses, the selection and application of psychological tests, the preparation and presentation of the data, compiling the results section and forming and justification of diagnostic judgments.</p>

Contents		
<p>This module includes specific extensions in diagnostic methods in subfields of applied psychology. Among others, specific extensions in the areas of diagnostic models and methods, objectives, structure, writing and presentation of psychological reports, educational and developmental assessment, diagnostics of learning and developmental disorders, personnel psychology and selection, assessment of issues of work, occupational or professional disability and assessment of issues relevant to family or criminal law (depending on the professional focus) are covered.</p>		
Intended learning outcomes		
<p>Students acquire in-depth knowledge of various more complex diagnostic methods and procedures, as well as the ability to select, perform, present and interpret them.</p>

Contents		
<p>This course lays the basis for applications of scientific evidence in various work contexts. Based on theories, models, and current empirical evidence in IO psychology, the foundations of decision-making at work, goal directed behavior and effective performance behavior will be covered and applications in practice discussed. Students will gain scientific and practical knowledge, that later can be used to effectively apply psychological findings to reach various organizational goals (e.g. in terms of personnel selection, learning & development, work design, work & health, dealing with conflicts, mediation, coaching).</p>		
Intended learning outcomes		
<p>Students gain profound knowledge in the area of IO psychology that enables them in a later occupation to develop and implement evidence-based solutions for practical problems in organizations. Future work fields lay in all areas of modern HR-Management, e.g., personnel development, health advisor in organizations, or conflict management.</p>

Contents		
<p>Work places, machines but also products and vehicles we use in everyday life have to be designed in such a way that they meet the needs and skills of users, and thus take into account the “human factor” in man machine interfaces. This module introduces theoretical foundations and examples of human factors research. The module also introduces evidence-based methods for evaluating and improving human behavior in technical environments.</p>		
Intended learning outcomes		
<p>Students learn in which ways concepts of experimental psychology can be used to describe and improve man-machine systems. They learn to make suggestions of how to evaluate and design corresponding systems.</p>

<p>The module deals with selected psychological topics from the areas of education, development and media. Main topics are cognitive, socio-emotional and physical development across the lifespan, educational and developmental processes in the family context and in pedagogical institutions as well as practical work in the field such as counseling and pedagogical-psychological interventions (e.g., psychological learning therapy), psychology of digital media, learning with media, media literacy, media effects, and media socialization. Within this module, topics can vary per semester.</p>		
Intended learning outcomes		
<p>The students deepen their competencies gained in the bachelor's program. They gain in-depth theoretical expertise in current, practice- and research-related subject areas of Educational Psychology, Developmental Psychology, Media Psychology and their intersections. The module prepares the students for various occupational fields, such as research activities in Educational Psychology, Developmental Psychology or Media Psychology, Psychological Diagnostics, School Psychology, Psychological Counseling in Education, Psychological Learning Therapy, Educational Evaluation and Media Design and Analysis in the professional fields of Media Psychology (e.g. Media Authorities and the Media Industry).</p>

Contents		
The module covers selected topics of basic research in psychology. Current issues of the research literature will be presented and discussed, as well as current methodical developments. The module focusses on basic foundations of mental life and behavior, that is, foundations that are independent of specific applied contexts, and can thus be applied to various contexts.		
Intended learning outcomes		
Students understand and evaluate research paradigms and results in a basic field of psychology, to utilize them for future occupational settings. They acquire theoretical and methodical competences regarding current research topics in these fields. The module prepares students for professional research activities and aims to convey knowledge that is transferrable to various applied psychological settings.

Internship		o6-PSY-MA-PRA-212-m01
Module coordinator		Module offered by
chairperson of examination committee		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
10	(not) successfully completed	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
Under the supervision of a psychologist with a diploma or master's degree, the job-oriented internships provide insights into the professional activity of psychologists in psychology-related institutions and / or the private sector. Students apply and deepen the knowledge acquired during their studies in a practical context.		
Intended learning outcomes		
The students learn to apply theoretical and practical aspects of their studies to new tasks in their internships. They make their first contacts with the professional world and thus create a basis for their future career choice and for the orientation of the Master's program.		
Courses (type, number of weekly contact hours, language – if other than German)		
P (0)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
placement report (approx. 8 pages) or two placement reports (approx. 4 pages each) if placement is divided up into two individual placements Duration of placement: 8 weeks (may be divided up into 2 individual placements, each placement must, however, have a minimum duration of 4 weeks). As a rule, it must be ensured that the person supervising the placement has a degree as Diplompsychologe or a Master's degree in psychology. Upon approval by the examination committee, this rule can be deviated from if it can be ensured that the placement is supervised by a person with an equivalent qualification.

(10 ECTS credits)

Business Psychology & Human Factors - Advanced

(10 ECTS credits)

Module title		Abbreviation
Business Psychology & Human Factors 2		o6-PSY-MA-WiPsyHF-2-212-m01
Module coordinator		Module offered by
holder of the Chair of Experimental and Cognitive Psychology, holder of the Professorship of Industrial and Organisational Psychology, holder of the Professorship of Psychological Methodology		Institute of Psychology
ECTS	Method of grading	Only after succ. compl. of module(s)
5	numerical grade	--
Duration	Module level	Other prerequisites
1 semester	graduate	--
Contents		
<p>The module deals with selected psychological topics from the area of business psychology or human factors. Within seminars topics from the field of human factors with the design of workplaces, machines, products, and vehicles or on work, industrial, and organizational psychology (e.g., personnel selection, work design, work & health) will be covered in-depth. The core of all course deals with evidence-based practice. Within this module, topics can vary per semester.</p>		
Intended learning outcomes		
<p>Students learn in which ways concepts of experimental psychology can be used to describe and improve man-machine systems. They learn to make suggestions of how to evaluate and design corresponding systems. Students gain profound knowledge in the field of IO psychology that enables them to develop and implement evidence-based solutions for practical problems in organizations.</p>

Contents		
<p>The module deals with selected psychological topics from the areas of education, development and media. Main topics are cognitive, socio-emotional and physical development across the lifespan, educational and developmental processes in the family context and in pedagogical institutions as well as practical work in the field such as counseling and pedagogical-psychological interventions (e.g., psychological learning therapy), psychology of digital media, learning with media, media literacy, media effects, and media socialization. Within this module, topics can vary per semester.</p>		
Intended learning outcomes		
<p>The students deepen their competencies gained in the bachelor's program. They gain in-depth theoretical expertise in current, practice- and research-related subject areas of Educational Psychology, Developmental Psychology, Media Psychology and their intersections. The module prepares the students for various occupational fields, such as research activities in Educational Psychology, Developmental Psychology or Media Psychology, Psychological Diagnostics, School Psychology, Psychological Counseling in Education, Psychological Learning Therapy, Educational Evaluation and Media Design and Analysis in the professional fields of Media Psychology (e.g. Media Authorities and the Media Industry).</p>

Contents		
The module aims to deepen the knowledge conveyed by the obligatory courses on basic research of the MSc program. Consequently, topic not already covered previously will be addressed or significantly developed further.		
Intended learning outcomes		
Students broaden their knowledge and methodical competences in basic research. Thereby, connection regarding content and methodology become visible, and can be used to derive won research questions. The module aims to develop an interconnected knowledge network in basic psychological theorizing that prepares for research as well as transfer to various domains of applied psychology.

Contents		
<p>In the seminar 'Project Work Differential Psychology' current research projects are discussed. In addition, the theoretical foundations and objectives of the ongoing research will be presented and the participants theoretically and practically prepared for an active participation in the role as researchers in these projects. In addition, some knowledge for the writing of scientific papers will be deepened and practiced through own scientific papers and contributions.</p>		
Intended learning outcomes		
<p>The students learn to examine the current research literature critically and in depth and to use this expertise to develop new research questions. They acquire theoretical and scientific practical knowledge as preparation for an independent handling of a research question in the master thesis. Students design their own empirical research in small groups, carry it out, evaluate it and relate the results to the current state of research. In addition, students learn to communicate the results in science-typical form (lecture, report, poster).</p>

1 semester	graduate	--
Contents		
Students present theory and goals of a self-selected research project, report results in a scientific presentation and discuss methodological and scientific aspects of presentations. The course is completed by scientific presentations to current research topics which familiarize students with research questions and methods and prepare them to actively participate in in research projects.		
Intended learning outcomes		
Students learn to develop a research question based on literature review and to select the appropriate experimental design to test this question. They improve abilities in analysis of empirical data with appropriate methods and procedures, learn proper interpretation of results and prepare for independent research activities.

Students participate in research projects, in which theories, results and methods of cognitive Psychology are applied to basic and applied topics of cognitive research (e.g. action control, eye tracking, visual information processing).		
Intended learning outcomes		
Students get theoretical and methodological competences in application of cognitive research. The enhanced knowledge of scientific content and methods is relevant for preparing a master thesis. Additionally students obtain special competences relevant for professional practice.

Contents		
The module includes working on a research project and a research seminar in which students present and discuss their planned research project.		
Intended learning outcomes		
Students expand and deepen their research expertise in planning and conducting empirical research and analyzing data. This goal is achieved through the development, presentation and discussion of research questions and investigations in the areas of educational psychology, developmental psychology or media psychology and their intersections.		
Courses (type, number of weekly contact hours, language – if other than German)

Contents		
The seminar is focused on current research projects and related methodological issues from the field of social psychology with a focus on questions of social cognitive research. The seminar serves to generate research questions from the literature, as well as to plan and discuss the results of one's own research projects.		
Intended learning outcomes		
Students will learn to identify research gaps, to derive research social cognition research questions from theories, to systematically analyze and develop theoretical approaches and to develop research designs. They will also learn to present critically discuss own empirical results.

Contents		
During the project seminar, specific research projects from social psychology and social cognition are developed and carried out under supervision. As a rule, this includes the development of an empirical research design, data collection and analysis, as well as the presentation of results.		
Intended learning outcomes		
The project imparts knowledge and skills that are required to carry out empirical research. This includes the operationalization of theoretical research designs, the coordination and implementation of data collection (including ethical aspects, aspects of data protection and open science), the evaluation of the collected data and their preparation for scientific communication.

<p>This seminar provides comprehensive and in-depth knowledge of disorder-specific, psychotherapeutic treatment of adult patients. This knowledge includes the psychological-psychotherapeutic, psychobiological and neuroscientific basis of the various disorders with their respective characteristics and problems, as well as current knowledge of neuropsychotherapy. Scientifically approved and recognized psychotherapeutic procedures and methods are presented and discussed.</p>		
Intended learning outcomes		
<p>The students acquire the theoretically and empirically supported skills for independent case conception and treatment planning on the basis of previous diagnostics, differential diagnostics, classification and knowledge of the appropriate scientifically approved treatment guidelines in adult psychotherapy, taking into account different treatment settings as well as psychological and neuropsychological disorders.</p>

Contents		
The module covers psychological disorders in childhood and adolescence relevant for psychological counseling (for example, family and parenting counseling, school psychology, psychological learning therapy). Main topics are basics of mental disorders in childhood and adolescence (clinical-psychological concepts, developmental and family psychological foundations, classification), specific disorders (diagnostic criteria, epidemiology, etiology, cognitive/learning, emotional, and social effects) as well as prevention and intervention concepts.		
Intended learning outcomes		
The students acquire application-related knowledge about mental disorders in childhood and adolescence, which is relevant for a practical or research-related psychological activity.

Contents		
Students gain insight in spheres of activity of educational sciences focusing on culture. Education as a fundamental term will be central for the discussion and its meaning will be analyzed and reflected on in view of social and cultural changes.		
Intended learning outcomes		
Students will acquire a deeper knowledge of basic questions and conditions of education and culture. They are able to debate methodically and reflexively upon problems of educational sciences with regard to culture. Furthermore, they are aware of historical development and current questions of educational and cultural sciences.		
Courses (type, number of weekly contact hours, language – if other than German)		
S (2)		
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)		
a) written examination (approx. 100 minutes) or b) oral examination (approx. 30 minutes) or c) presentation (30 to 45 minutes) or d) term paper (15 to 20 pages) Language of assessment: German		
Allocation of places		
Max. 10 Duration of placement: 8 weeks (may be divided up into 2 individual placements, each placement must, however, have a minimum duration of 4 weeks). As a rule, it must be ensured that the person supervising the placement has a degree as Diplompsychologe or a Master's degree in psychology. Upon approval by the examination committee, this rule can be deviated from if it can be ensured that the placement is supervised by a person with an equivalent qualification Should the number of applications exceed the number of available places, places will be allocated as follows: Applicants who have not yet achieved any of the required ECTS credits in the respective sub-area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. Contents		
<p>Students will get a theoretical introduction to neurobiology and clinical neurobiology. The following topics will be discussed: introduction to neurons and glia, ion channels and membrane potential, ion channelopathies, synapses, transmitter release, NMJ, myasthenia gravis, cerebellum, basal ganglia, ataxia and Morbus Parkinson, somatosensory system, touch, pain, schizophrenia and autism spectrum disorders, disorders of cognition, muscle and muscle diseases, anatomy and function of the motor system, spinal reflexes, motoneuron diseases, hippocampus, learning and memory, anterograde amnesia, visual agnosia, cortex and the limbic system, emotions, disorders of conscious and unconscious mental processes, attention, smell and taste and hearing, sleep, EEG, epilepsy, vision and diseases of the visual system. The literature seminars are based on fundamental literature on lecture-relevant topics to document the experiments underlying our present knowledge in neurobiology.</p>		
Intended learning outcomes		
<p>Students who successfully completed this module will have acquired insights into current theoretical concepts in neurobiology. The students will examine clinical aspects of neurobiology with a focus on the molecular, cellular and physiological mechanisms. Additionally, they will have learned how to evaluate and present data in oral form.</p>

The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. Should there be, within one subject, several modules with a restricted number of places, the result of the selection process for one module will also apply to all other modules.

German contents available but not translated yet.		
<p>Die interdisziplinär angelegte Vorlesung bietet eine Einführung in das Gebiet der forensischen Psychiatrie. Aus psychiatrischer, juristischer, psychologischer und entwicklungs-dynamischer Perspektive werden theoretische Grundkenntnisse vermittelt und anhand von präsentierten Einzelfällen, die aktuell zur Begutachtung anstehen bzw. klinisch besonders interessant sind, beispielhaft vertieft. Die Veranstaltungen sollen einerseits Grundlagen über Erscheinungsbilder, Entwicklung und Behandlung von psychischen Störungen wie Schizophrenie, Suchterkrankungen, Sexualstörungen, Persönlichkeitsstörungen etc. vermitteln, andererseits sollen relevante rechtliche Problemfelder im Kontext von psychischen Erkrankungen aufgezeigt werden. Betreuungs- und sozialrechtliche Aspekte werden daher ebenso erörtert wie verschiedene Formen der Delinquenz (z.B.: Eigentumsdelikte, Tötungs- und Sexualdelikte) sowie Fragen der Prognoseerstellung und Glaubhaftigkeit, des Opferschutzes und der Kriminalprävention bei Jugendlichen und Erwachsenen.</p>		
Intended learning outcomes		
No information on intended learning outcomes available.		
Courses (type, number of weekly contact hours, language — if other than German)		
V (2)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)		
Oral examination (approx. 45 minutes) Language of assessment: German and/or English		
Allocation of places		
Min. 4, Max. 8 Should the number of applications exceed the number of available places, places will be allocated as follows: Applicants who have not yet achieved any of the required ECTS credits in the respective sub-area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who already have achieved ECTS credits. Within these groups, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. Should there be, within one subject, several modules with a restricted number of places, the result of the selection process for one module will also apply to all other modules.

Contents		
The module provides insights into the contents and methods of another scientific discipline.		
Intended learning outcomes		
The students gain insights into undergraduate topics of a non-psychological scientific field. They also learn to identify and classify the methodological peculiarities and topics of Psychology by comparing it to another subject.		
Courses (type, number of weekly contact hours, language — if other than German)

Contents		
The Master's thesis is intended to show that students are able to work on and document a problem from the subject area of psychology with the scientific methods of the subject within a defined period of time. Students will present and discuss their Master's thesis in an accompanying seminar.		
Intended learning outcomes		
The students are enabled to use their methodological and content knowledge to work on and document a circumscribed research question.
