Content and Objectives of the Programme

Building on professional and scientific qualification in special education (BA), graduates acquire a further and consecutive qualification, which has a professional as well as research-oriented profile in special education. This enables them to respond to the demands of the labour market in the professional field of special education and inclusion for adults with disabilities. They overlook the coherences in the field of special education and are able to autonomously apply research methods.

The graduates have set an individual emphasis on the different subjects of counseling, life and work in the context of disabilities and acquired research-based knowledge in the field of special education and related fields, as well as skills necessary for leadership and counseling in organizations for people with disabilities.

The graduates’ expert knowledge includes relevant aspects of social and employment law, aspects of organizational development and personal management, and basic competencies in counseling. They have delved into theories in special education, aspects of metatheory, anthropological and sociological approaches, and also into methods in adult special education. They have set an individual profile on either vocational education and inclusion in labour, or on the field of andragogy, leisure time, living and aging, or in counseling for people with disabilities, their affiliates or professionals. In these areas, aspects of heterogeneity and inclusion are stressed. Graduates have trained their expertise in an internship. Self and project management was skilled in a research project. They have proved autonomous, research-based skills in their master thesis in a relevant field on adult special education.
Abbreviations used

Course types: E = field trip, K = colloquium, O = conversatorium, P = placement/lab course, R = project, S = seminar, T = tutorial, Ü = exercise, V = lecture

Term: SS = summer semester, WS = winter semester

Methods of grading: NUM = numerical grade, B/NB = (not) successfully completed

Regulations: (L)ASPO = general academic and examination regulations (for teaching-degree programmes), FSB = subject-specific provisions, SFB = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue: ASPO2009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

18-Jul-2012 (2012-119)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

### Contents
Part I: This module introduces, discusses and analyses special educational theories and theories relevant to Special Education. The theories refer to approaches to the explanation of disabilities and impairments (including specific forms and manifestations), which are also examined in view of more complex aspects of disabilities, to the theoretical backgrounds of concepts of special educational action, to the theory of institutions and to further theoretical backgrounds. Examples of theory-based contexts might be counselling, work and occupation as well as living and recreation. Part II: This module elaborates on already discussed special educational theories and theories relevant to Special Education. The additional information will be discussed and analysed in the group. The theories refer to advanced approaches to the explanation of disabilities and impairments (including specific forms and manifestations), which are also examined in view of more complex aspects of disabilities, as well as to the theoretical backgrounds of concepts of action, to the theory of institutions and to further theoretical backgrounds. Examples of theory-based contexts might be counselling, work and occupation as well as living and recreation. Part III: This module further elaborates on already thoroughly discussed special educational theories and theories relevant to Special Education. The additional detailed information will be discussed and analysed in the group. The theories refer to differentiated, advanced approaches to the explanation of disabilities and impairments (including specific forms and manifestations), which are also examined in view of more complex aspects of disabilities, as well as to the theoretical backgrounds of concepts of action, to the theory of institutions and to further theoretical backgrounds. Examples of theory-based contexts might be counselling, work and occupation as well as living and recreation. (Alternatively, a specialisation in another content area than in "Special Educational Theories 1" and "Special Educational Theories 2" is possible in the module "Special Educational Theories 3". In this case, the contents and competencies/qualifications which have to be acquired correspond to the ones described in "Special Educational Theories 1".)

### Intended learning outcomes
Part I: The students are able to examine and critically contemplate special educational theories, also in view of scientific theory. They are able to determine the practical relevance of special educational theories and can test their applicability. The students can conduct detailed scientific research on special educational theories. They can communicate, represent and methodically illuminate special educational theories. They develop theoretical and critical reflection competence. Part II: The students are able to thoroughly examine and critically contemplate special educational theories in a differentiated manner, also in view of scientific theory. They can thoroughly evaluate the practical relevance of special educational theories and can test their applicability. The students can conduct detailed scientific research on special educational theories. They can communicate, represent and methodically illuminate special educational theories. They develop advanced theoretical and critical reflection competence. Part III: The students are able to thoroughly examine special educational theories in a differentiated manner. They can ascribe these theories to relevant scientific-theoretical backgrounds in a decisive and differentiated manner and are therefore able to find scientific-theoretical arguments. They can evaluate the practical relevance of special educational theories in a highly differentiated manner and can test their applicability. The students can conduct detailed scientific research on special educational theories in a differentiated manner. They can communicate, represent and methodically illuminate special educational theories. Furthermore, they can compare these theories in a highly differentiated manner. They develop highly differentiated and advanced theoretical and critical reflection competencies.

### Courses
(type, number of weekly contact hours, language — if other than German)

This module comprises 3 module components. Information on courses will be listed separately for each module component.

Contents

Part I: The module discusses abstract and superordinated theoretical approaches and traditions which are useful for the processing and understanding of complex special educational contexts. These include explanatory approaches that stem from different disciplines such as philosophy, theology, psychology and sociology. The module examines and compares different theoretical perspectives and approaches in the context of different thematic focuses. This examination also entails the perspectives of different disciplines on the corresponding thematic focus. Part II: This module focuses on the examination of complex perspectives. These perspectives can refer to fundamental, phenomena-related or institutional contexts of Special Education. The module results in critical examinations and in the acquisition of a complex overview of backgrounds, topics and aspects relevant to Special Education, also with a critical potential for the examination and differentiated development of concepts. Part III: The third module focuses on a specific theoretical perspective on the elaboration of special educational phenomena and tasks. This perspective is discussed in detail. This (for example scientific-theoretical school) is supposed to serve as a matrix for the structuring of scientific-theoretical questions and for the development of concepts. (Alternatively, a specialisation in another content area than in "Metatheories and Interdisciplinary Contexts 1" and "Metatheories and Interdisciplinary Contexts 2" is possible in the module "Metatheories and Interdisciplinary Contexts 3". In this case, the contents and competencies/qualifications which have to be acquired correspond to the ones described in "Metatheories and Interdisciplinary Contexts 1".)

Intended learning outcomes

Part I: The students are able to compare and critically evaluate theories and approaches in view of different special educational topics. These competencies enable them to develop critical opinions and concepts for institutions and contexts of action. Part II: The students can conduct scientific analyses to compare the theories of various disciplines. They can communicate, represent and methodically illuminate theoretical and meta-theoretical backgrounds of pedagogical issues in group work. They develop advanced theoretical and critical reflection competence. Part III: The students are able to consistently represent and understand a point of view / theory. They have advanced knowledge of humanistic curricula, including a wider pedagogical context.

Courses

This module comprises 3 module components. Information on courses will be listed separately for each module component.

- 06-SO-MiB-1-122: S (no information on SWS (weekly contact hours) and course language available)
- 06-SO-MiB-2-122: S (no information on SWS (weekly contact hours) and course language available)
- 06-SO-MiB-3-122: S (no information on SWS (weekly contact hours) and course language available)

Method of assessment

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component 06-SO-MiB-1-122: Metatheories and interdisciplinary references 1

- 5 ECTS, Method of grading: numerical grade
- assessment group Seminar: a) written examination (approx. 60 minutes) or b) presentation (approx. 30 minutes) with written elaboration (approx. 15 pages) or c) presentation (approx. 45 minutes) or d) presentation (approx. 30 minutes) and written examination (approx. 45 minutes) or e) oral examination of one candidate each (approx. 30 minutes) or f) oral examination in groups (approx. 20 minutes per candidate)
or g) term paper (approx. 20 pages) or h) scientific poster (1 page DIN A0) with presentation (approx. 15 minutes)

Assessment in module component 06-SO-MiB-2-122: Metatheories and interdisciplinary references 2
- 5 ECTS, Method of grading: numerical grade
- assessment group Seminar: a) written examination (approx. 60 minutes) or b) presentation (approx. 30 minutes) with written elaboration (approx. 15 pages) or c) presentation (approx. 45 minutes) or d) presentation (approx. 30 minutes) and written examination (approx. 45 minutes) or e) oral examination of one candidate each (approx. 30 minutes) or f) oral examination in groups (approx. 20 minutes per candidate) or g) term paper (approx. 20 pages) or h) scientific poster (1 page DIN A0) with presentation (approx. 15 minutes)

Assessment in module component 06-SO-MiB-3-122: Metatheories and interdisciplinary references 3
- 5 ECTS, Method of grading: numerical grade
- assessment group Seminar: a) written examination (approx. 60 minutes) or b) presentation (approx. 30 minutes) with written elaboration (approx. 15 pages) or c) presentation (approx. 45 minutes) or d) presentation (approx. 30 minutes) and written examination (approx. 45 minutes) or e) oral examination of one candidate each (approx. 30 minutes) or f) oral examination in groups (approx. 20 minutes per candidate) or g) term paper (approx. 20 pages) or h) scientific poster (1 page DIN A0) with presentation (approx. 15 minutes)

Contents
Part I: This module describes the relevant connections between practical fields of action and special educational theories. It discusses, gives an overview of and focuses on specific questions and requirements of practice in a theory-driven manner. Holding and analysing practical counselling sessions, going on excursions to curative and special educational institutions or inspecting local institutions might be part of the module. Theory remains the essential frame of reference and an exclusive prioritisation, e.g. of counselling, recreation, living or work and occupation is mandatory. Part II: The module "Action and Methodology 2" refines the results and findings of "Action and Methodology 1" and focuses on advanced aspects of a thematic prioritisation. It examines theory-practice-questions, e.g. from the area of work and occupation, counselling or recreation and living. Part II builds upon the broader overview given in part I and exclusively focuses on specific aspects of a thematic priority. Part III: This module specialises on and examines a prioritisation on a higher level of abstraction on the basis of detailed texts. Possible areas of specialisation might be work and occupation, counselling or recreation and living. In this process, pedagogical core topics and problems are discussed and analysed. (Alternatively, a specialisation in another content area than in "Action and Methodology 1" and "Action and Methodology 2" is possible in the module "Action and Methodology 3". In this case, the contents and competencies/qualifications which have to be acquired correspond to the ones described in "Action and Methodology 1".)

Intended learning outcomes
Part I: The students have general knowledge of different fields of action as well as curative and special educational methods and are able to differentiate between these actions and methods. They are aware of practical problems and questions in the field of Curative and Special Education. The students evaluate the structural framework conditions of institutions in curative and special educational fields of action. They examine organisational requirements of institutions and services. They evaluate their own practical actions. Part II: The students are able to describe and discuss complex theory-driven questions of a specialised field. They are confident in using technical terms and relevant findings and are able to apply these to specific practical fields. The students evaluate the structural framework conditions of institutions in curative and special educational fields of action. Part III: The students are able to evaluate their own professional actions in a reasonable manner. They are able to independently analyse and evaluate problems in practice in a theory-driven manner. The students evaluate the structural framework conditions of institutions in curative and special educational fields of action and know theories and concepts of further development. They examine organisational requirements of institutions and services and know theories and concepts of further development.

Courses (type, number of weekly contact hours, language — if other than German)

## Contents

This module introduces and develops diagnostic methods and methods of understanding individual cases. It builds upon the basics of the Bachelor's degree programme and elaborates on diagnostic competencies in the fields of counselling, living and work. The goal is to enable the participants to understand people with disabilities in view of their personal history and their living environment and to organise personalized pedagogical inventions.

## Intended learning outcomes

Knowledge of diagnostic procedures and strategies for the areas of living, work and counselling in the context of Special Education. Practical experiences in applying, conducting and interpreting diagnostic procedures.

### Contents

This module elaborates on knowledge of theories and research in the context of counselling in special educational fields. It focuses on the (further) development of a professional, special educational counselling attitude and on institutional forms and target groups of counselling. Furthermore, it elaborates on selected counselling methods (including cooperative, client-centred, manifestation-oriented, solution-oriented, methodological and contradictory counselling) and allows for self-experience and self-reflection in the context of selected counselling methods. The students acquire central counselling skills, conversation techniques in (pedagogical) conflict situations and depending on the respective counselling concept - skills in supervision and group counselling.

### Intended learning outcomes

The students analyse central theories and techniques of counselling in different special educational fields of action. Based on scientific knowledge gained through practical experience, the students acquire central skills in different counselling methods. The students become acquainted with central conversation techniques which are required in conflict situations. They know various counselling situations in special educational fields of action and the corresponding interdisciplinary requirements.

Module title: Aspects of social and employment law
Abbreviation: 06-SO-Re-122-m01

Module coordinator: Managing Director of the Institute of Special Education
Module offered by: Institute of Special Education

ECTS: 5
Method of grading: numerical grade
Duration: 1 semester
Module level: undergraduate
Other prerequisites: --

Contents:
The module "Legal Basics" focuses on the special relevance of social and labour law for special educational fields of action and work. The seminar provides an overview of the various social codes as well as labour regulations and explains their relevance for rehabilitation and services for the disabled. Aside from fostering problem awareness, it especially focuses on the general principles of social law.

Intended learning outcomes:
Professional knowledge and basic professional competence regarding social law, labour law and the peculiarities of these legal fields. Professional knowledge of the structure and organisation of both legal fields. Basic knowledge of the regulations of individual labour law (e.g. rights and obligations of employees, holiday entitlements, peculiarities of employment contracts with severely disabled persons). Action and methodological competence in enforcing entitlement to benefits based on social law. Ability to identify and understand aspects of social and labour law which are relevant to pedagogical fields of action.

Courses:
S (no information on SWS (weekly contact hours) and course language available)

Method of assessment:
assessment group Seminar: a) written examination (approx. 60 minutes) or b) presentation (approx. 30 minutes) with written elaboration (approx. 15 pages) or c) presentation (approx. 45 minutes) or d) presentation (approx. 30 minutes) and written examination (approx. 45 minutes) or e) oral examination of one candidate each (approx. 30 minutes) or f) oral examination in groups (approx. 20 minutes per candidate) or g) term paper (approx. 20 pages) or h) scientific poster (1 page DIN A0) with presentation (approx. 15 minutes)

Contents
Pedagogical action as a non-standardisable, personalised practice of intervention essentially means taking action in uncertain situations. It is always about imparting general pedagogical knowledge in the corresponding individual situation. The way someone manages these uncertain situations indicates their level of pedagogical professionalism. Pedagogical professionalism can be extended to pedagogical competencies (which competencies should a pedagogue have?), pedagogical relationship building (how should a pedagogical relationship be build?) and pedagogical personality (which pedagogical attitudes and mindsets are useful and necessary in pedagogical practice?). The module "Pedagogical Personality and Qualification" addresses these facets of pedagogical professionalism.

Intended learning outcomes
Knowledge of the structural uncertainties of pedagogical action. Knowledge of profession's theories relevant to pedagogy. Knowledge of the relevance of pedagogical relationship building and the role of the pedagogue in the pedagogical process. Ability of self-reflection. Ability to play the key role in the pedagogical process and to build and sustain a strong working bond.

**Contents**

This module comprises theories, approaches and methods of employee management as well as organisational development in pedagogical institutions. It includes basic aspects of organisational structures and processes in the field of non-profit institutions and methods of organisational development. Furthermore, approaches to employee management and concept development are part of the module.

**Intended learning outcomes**

Professional and methodological knowledge of employee management in pedagogical institutions. Professional and methodological knowledge of organisational development in pedagogical institutions. Evaluation of career choice as well as own strengths and weaknesses in a professional context. Analysis of motivation and abilities required for leading positions.

**Courses** (type, number of weekly contact hours, language — if other than German)

**Contents**

This module analyses institutional framework conditions of the work placements, especially aspects of organisational structures and processes encountered in the institutions. Furthermore, the corresponding seminar serves as a discussion board where the different contents, goals and methods of special educational services and institutions are professionally reflected and discussed in detail. The seminar also imparts different approaches to carrying out a practical study in order to assist the students in preparing the internship report and presentation which are part of the examination. The practical study can be submitted in the form of a project study, an institutional analysis or a special educational reflection.

**Intended learning outcomes**

Advanced theoretical knowledge of organisational structures and processes in institutions based on the example of the chosen work placement. Knowledge of requirements and contents of institutional analyses. Basic knowledge of the methods of project management. Advanced knowledge of goals, contents and methods of special educational services and institutions. Advanced knowledge of general and special educational support methods.

Managing Director of the Institute of Special Education

Module offered by
Institute of Special Education

ECTS
10

Method of grading
Numerical grade

Only after succ. compl. of module(s)

Duration
1 semester

Module level
Undergraduate

Other prerequisites

Contents
In this module, the students carry out, present and evaluate a research project in the field of Special Education. Each student individually chooses the contents of the research project upon consultation with the lecturer. The project should be related to one of the three special educational topic areas work, living/recreation or counselling. Aside from participating in scientific research projects or conducting own studies, special educational counselling and support measures as well as measures of pedagogical organisational development might be part of the research projects. The students present their results in the form of a poster presentation.

Intended learning outcomes
The participants learn to work on a scientific or application-oriented question according to scientific methods. They acquire competencies in planning, organising, conducting and evaluating a scientifically sound measure in the field of Special Education. The students create posters and give presentations to visualize complex projects in a didactic manner. During the project, they plan and execute complex processes which promote their self-competence.

Courses
R (no information on SWS (weekly contact hours) and course language available)

Method of assessment
a) project (approx. 250 hours) or b) project (approx. 200 hours) and written elaboration (approx. 15 pages)

Allocation of places

The Thesis (30 ECTS credits)
Module title: Master Thesis Special Education
Abbreviation: 06-SO-MA-122-m01

Module coordinator: Managing Director of the Institute of Special Education
Module offered by: Institute of Special Education

ECTS: 30
Method of grading: numerical grade
Duration: 1 semester
Module level: undergraduate
Other prerequisites: --

Contents:
This module provides supervision for students working on their Master's thesis. The meetings, which are scheduled according to requirements, are held by the corresponding thesis supervisor. The goal is to provide the students with advice regarding methods and contents of their Master's thesis, which is based upon a relevant scientific-theoretical approach. The counselling helps the students in determining a question, conducting research and dealing with data.

Intended learning outcomes:
The students formulate a precise question for their Master's thesis. They have advanced knowledge of a methodological research approach. The students know the functions of the various procedures of acquiring knowledge. They independently work on the determined question in a comprehensible manner and prove that they are able to conduct good scientific practice.

Courses:
no courses assigned

Method of assessment:
Master's thesis (approx. 100 pages)
