Content and Objectives of the Programme

The Faculty of Medicine and the Faculty of Biology of the JMU Würzburg offer the opportunity to acquire a "Master of Science" (M.Sc.) degree in Biomedicine within a consecutive Bachelor's and Master's programme. This degree programme has a strong emphasis on research. This Master of Science degree equips graduates with further professional qualifications as well as extensive research experience. This degree programme aims to impart to students in-depth and interdisciplinary knowledge at the interface between biology and medicine and to enable them to competently apply and implement concepts and methods of molecular medicine. Students in this degree programme gain the skills and specialist knowledge necessary for a career in research, development and practical application and will be able to independently conduct scientific research in the field of biomedicine.

In their thesis, students demonstrate their ability to illustrate and handle a defined biomedical problem from an academic perspective using established or modified methods within a given time frame.

By passing their Master's examination, students demonstrate their grasp of biomedical research and their ability to independently apply scientific methods. In compliance with the effective doctoral regulations of the JMU a successfully completed Master's degree qualifies candidates for admission to a doctoral programme.

Master's with 1 major Biomedicine (2012)	JMU Würzburg • generated 26-Aug-2024 • exam. reg.	page 4 / 41
	data record Master (120 ECTS) Biomedizin - 2012	

Abbreviations used

Course types: \mathbf{E} = field trip, \mathbf{K} = colloquium, \mathbf{O} = conversatorium, \mathbf{P} = placement/lab course, \mathbf{R} = project, \mathbf{S} = seminar, \mathbf{T} = tutorial, $\ddot{\mathbf{U}}$ = exercise, \mathbf{V} = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASP02009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

12-Jul-2012 (2012-105)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

to corre sues ar tive ma sophist are abl and int	Students are able to define key terms for each model organism and use them in the right context. They are able to correctly assess the importance of model organisms and 3D tissue culture systems for current biomedical issues and questions. They are able to discuss the relevant scientific advantages and disadvantages in a deliberative manner, also taking into account ethical issues. Under supervision, they are able to independently perform sophisticated genetic, cell biological and histological experiments and document the results. In particular, they are able to present the results in a written report in accordance with scientific standards, to critically evaluate and interpret the data and put it in the context of current literature. Working in small groups as well as preparing and delivering group presentations, they demonstrate their knowledge of the contents covered as well as their

Thesis (30 ECTS credits)

Thesis and colloquium.

Module	title		Abbreviation				
Final Oral Examination 03-98-MTH-122-m01							
Module coordinator				Module offered by			
chairperson of examination committee Biomedizin (Biome- dicine)							
ECTS Method of grading		Only after succ. compl. of module(s)					
30 numerical grade							
Duratio	n	Module level	Other prerequisites				
1 semester graduate							
Contents							
Students conduct a scientific research project, using appropriate methods and adhering to the principles of good scientific practice. They document and discuss their work in a thesis and defend it in a final colloquium.							
Intended learning outcomes							
Students are able to independently carry out scientific work according to the rules of good scientific practice. They are able to document and, where necessary, adjust their research as well as to interpret their findings in a larger context. Students are able to defend their work in front of a professional audience.							
Courses (type, number of weekly contact hours, language — if other than German)							
 This module has 2 components; information on courses listed separately for each component. 03-98-MTH-2-122: K (no information on language and number of weekly contact hours available) 03-98-MTH-1-122: A (no information on language and number of weekly contact hours available) 							
Method of assessment (type, scope, language – if other than German, examination offered – if not every semester, information on whether module is creditable for bonus)							
 This module has the following 2 assessment components. Unless stated otherwise, students must pass all of these assessment components to pass the module as a whole Assessment component to module component o3-98-MTH-2-122: Abschlusskolloquium 5 ECTS credits, method of grading: numerical grade Abschlusskolloquium (approx. 45 minutes) Language of assessment: English Assessment component to module component o3-98-MTH-1-122: Masterthesis 25 ECTS credits, method of grading: numerical grade written thesis Language of assessment: English 							
Allocation of places							
Additional information Additional information listed separately for each module component. • 03-98-MTH-1-122: Additional information on module duration: 6 months. • 03-98-MTH-2-122: Workload
