Learning Outcomes

Scientific Qualification

UNIVERSITÄT

WÜRZBURG

- The graduates know the key topics, theories and results on the experience of media entertainment.
- The graduates are able to independently identify and reflect upon the state of scientific knowledge regarding a focal phenomenon. This includes a critical evaluation of different sources.
- The graduates are able to develop and formulate research questions that can be tested empirically.
- The graduates have an inventory of advanced social scientific methods at their disposal, which enables them to answer research questions on media entertainment based on empirical studies.
- The graduates can take different perspectives on questions about media entertainment, including historical, psychological, conceptual-driven, or marketing-related perspectives.

Employment qualifications

- The graduates are able to understand and reflect upon questions about media entertainment that are asked by stakeholders from business and society.
- The graduates are able to answer questions about media entertainment that are asked by stakeholders from business and society, based on existing theories and results.
- The graduates are able to find answers to questions about media entertainment that are asked by stakeholders from business and society, by conducting empirical studies.

Self-development

- The graduates are able to understand and reflect upon questions and perspectives from different disciplines, especially from communication science and psychology.
- The graduates can contribute their own knowledge and skills into interdisciplinary teams, and they can work efficiently in these teams.

Empowerment for social engagement

- The graduates are able to take part in the social discourse about media entertainment and they can develop a standpoint.
- The graduates know the challenges for democracies caused by media entertainment and are able to contribute to meet these challenges.

Abbreviations used

Course types: \mathbf{E} = field trip, \mathbf{K} = colloquium, \mathbf{O} = conversatorium, \mathbf{P} = placement/lab course, \mathbf{R} = project, \mathbf{S} = seminar, \mathbf{T} = tutorial, $\ddot{\mathbf{U}}$ = exercise, \mathbf{V} = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

12-May-2022 (2022-40)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

The lecture Organisation covers the basic methodological, empirical, and institutional concepts of management that are necessary for the further study of the subject. More specifically, it gives answers to the question why there are organisations. In addition, different goals, strategies, and structures of enterpreises as well as their economic and societal environment are discussed. Finally, selected empirical findings from organisation research are presented together with the basic tool kit for empirical methods and approaches.

The lecture Personnel Management covers basic methodological, empirical, and institutional concepts of the subject. More specifically, on the basis of the principal-agent model answers are given on how the basic dilemma of the relationship between employer and employee can be solved. Mainly financial incentives on the individual and team level are presented and discussed. In addition, possibilities to reduce information asymmetries are presented.

ses as ly beca ced on theorie and e-c	Contents E-business is a comprehensive, digital processing of business transactions between private and public enterpri- ses as well as institutions and their clients on global public and private networks such as the internet. Precise- ly because euphoria for e-business has waned considerably in recent years, a lot of emphasis is now being pla- ced on introducing such solutions in a user-oriented way. This lecture will first discuss the supporting economic theories and will then describe and analyse individual solutions such as e-procurement, e-shop, e-marketplace and e-community in detail.

Online and cross-media journalism takes into account the current media convergence. This seminar focuses on the individual elements and phases of production for the website, Facebook, Instagram, Twitter, and Tiktok against the background of current trends and developments. In addition, the seminar covers current trends in journalism. In addition to content-related topics, the focus is also on new methods (e.g. of storytelling), as well as technical developments.

Conten	ts						
Economic journalism is often regarded as unwieldy, but the reporting usually revolves around content that ma- ny media users can relate to: The focus is on market developments and (economic) political conditions. How can these topics be presented in a way that is clear, easy to understand, and yet as precise as possible? What ma- kes for good economic reporting? What research options and forms of presentation are available? Such questi- ons will first be answered using examples from various media. Subsequently, the students will work on the main topic themselves. The seminar is thematically oriented towards current research projects/projects of the Chair of Business Journalism and Business Communication and can therefore vary thematically per semester.							
		ning outcomes		,	<i>,</i> ,,		
Students learn the terminology, topics, and framework of economic journalism. After completing the seminar, they will have an overview of selected areas of application. They master the research and the different forms of presentation of economic journalism. The students learn scientific methods to break down complex economic topics in reporting. After completing the seminar, students are able to independently examine journalistic products in response to previously generated research questions and thus evaluate journalistic work. Therefore, students acquire subject as well as specific methodological competencies in this seminar.

phasis lop the will cor ting fro rous in	The course will provide students with an overview of essential topics of innovation management. Particular em- phasis will be on the application of theoretical concepts to practical examples and cases. The course will deve- lop the innovation process starting with the idea and ending with the market entry of an innovation. The course will consist of two core elements: 1. "Creating Value": how can companies create something new? and 2. "Profi- ting from Value": how can companies profit from innovations? The course will use practical examples from nume- rous industries such as world-class restaurants, music, consumer goods, electricity or the software industry.						
Intende	ed lear	ning outcomes					
 At the end of the module students are able to understand: The importance of innovations The sources of innovations The New Product Development process The roles in the innovation process The importance of intellectual property rights How innovations diffuse in the market
