Content and Objectives of the Programme

The student of French Studies learns scientifically relevant and analytical/methodical basic skills in the most important philological areas. Besides well-founded knowledge of the language and a competence in use of French approaching that of native speakers, the student acquires a profound, structured and adaptable knowledge in the subdisciplines of French linguistics, literature and cultural and regional studies. On this basis, the student is equipped to recognize fundamental and current philological questions and to apply scientific methods to them. An important place in studies is given to the development of the ability to analyse texts of all kinds from literary, cultural and linguistic perspectives. The aim of these studies is to equip students to deal with professional and academic challenges in all the various linguistic, textual and cultural contexts.
