Content and Objectives of the Programme

Philosophy deals with the fundamental conditions of human thought, knowledge, and action, with the general structures of reality, and with the history of human beings' reflexion on themselves and on the world. It analyses the structure, the methods, and the results of individual intellectual disciplines, as well as their socially conditioned character and relevance. It reflects on the conditions and norms of human action and social existence.

Contemporary positions and arguments must prove their value by being confronted with competing frameworks of the past and of the present. A critical engagement with the history of our discipline not only provides us with philosophical touchstones; it also illuminates both the historically conditioned character of contemporary philosophical inquiry and the fact that the results reached by that inquiry stand in need of justification. Accordingly, we treat historical and contemporary philosophical positions both systematically and in their concrete historical contexts. We view a constantly renewed interpretive analysis of classical and contemporary texts and positions, as well as reflexion on the conditions and structures of the historical context, as an area of philosophical work that is indispensable for the systematic engagement with the contemporary results of the individual intellectual disciplines and with the practical challenges of the modern world.

By completing the thesis, the student has demonstrated that he or she is capable, within a limited time-frame, of conducting a supervised but substantially independent analysis of a thematically focussed philosophical problem or group of problems, using the intellectual and scholarly methods learned during the course of study.

The Bachelor of Arts degree can serve as a highly valuable credential for someone wishing to enter the work force; it is also the first significant requirement for continued study within a Bachelor-Master program.

Philosophy can best be understood as an intellectual precondition for further cultural, social, and historical inquiry; hence, philosophical training is in a position to influence the self-understanding of individuals, groups, societies, and cultures. Moreover, philosophy enables us to confront the flood of detailed information coming to us from the modern media, subject it to critical analysis, and put it to practical use.

While students of philosophy acquire a thorough knowledge of the subject-matter, as well as a broad array of methodological, analytical, logical, and rhetorical skills, they also sharpen their powers of historical and critical analysis, and thus can apply these powers to developments in contemporary culture. Philosophy improves the students' powers of judgement and promotes a heightened ability to engage in dialogue in a wide variety of social contexts. In general, it provides students with fundamental intellectual and discursive skills which will allow them to meet the ever-changing and increasingly unpredictable challenges of the modern social and professional world.
