Information literacy in an academic context: search strategies, resources, reference management, copyright, etc.

Intended learning outcomes

Students know what information is needed for what purpose. They are able to locate information that is relevant within their discipline(s) and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their papers.

The tutorial deals with the practise of writing: How do I urge a good argument? How far does a smart wording distinguish from an awkward one? When does a sentence is not only correct, but also nice and smart? What do you need to know if the intelligibility of a text should be ensured? How does a text receives argumentative density and rhetorical subtlety? The writing will exemplarily be practised on subjects that are relevant to the discipline, for example: How a recension about a subject book is written, how is the discussion of an evening of theatre or a literary novelty is written?

Intended learning outcomes

Concerning the sub-module argumentation and formulation: Students have the ability to formulate and argue as well as the ability to structure texts; Additionally, they will acquire stylistic, argumentative and structural basic principles of important text and linguistic levels.
