Content and Objectives of the Programme

The BA course in Classical Archaeology aims at introducing the student to the in-depth work with selected topics of Classical Archaeology as well as the necessary methodology and providing a sound overview of the ancient Graeco-Roman culture. This requires students to acquire a solid knowledge in Latin and Ancient Greek which allows them to extract relevant information from the sources and apply it when working on ancient material remains. By training these capabilities solid foundations for a MA course are laid.

BA courses focus on the independent and critical reflection of archaeological research, methodology and creating an understanding for life in the ancient classical world. Acquiring specialised knowledge in specific branches of Classical Archaeology is conditioned by this goal.

The BA thesis demonstrates that the graduate is able to deal with a thematically limited archaeological problem within a given time according to the taught methods and scholarly standards. The graduate has accomplished this task independently but receiving professional guidance.

The BA in Classical Archaeology constitutes, within the framework of the subsequent MA, the lowest degree qualifying for a professional job, which can serve as a basis for starting professional life or as the preparation for a MA course, a different advanced training course or further training outside university.

The BA in Classical Archaeology typically aims at preparing for the work at research institutions such as universities, academies of science, the German Archaeological Institute (DAI) or museums with collections of antiques. The BA does so only indirectly by way of providing the basis for the MA and PhD, which qualify for this occupational area.

Furthermore, degree holders are provided with the skills to assume jobs outside academia, e.g. in publishing, libraries, culture management, the media, tourism, museology, public relations and diplomatic service.

Classical Archaeology is a very wide subject that deals with a range of sources and material remains arising from over 3000 years. Consequently, it is impossible to introduce students to all fields of the subject with equal thoroughness. Thus, courses concentrate on equipping the students with knowledge dealing with exemplary monuments, genres of art and various scientific challenges. Alongside this specialised basic competence, the courses provide the methodological capability to make oneself familiar with new and complex topics quickly and efficiently. Thus, the graduate is familiar with and used to permanent learning and to reach solutions by adequate methods. He / she develops a high degree of individual initiative and commitment to acquire profound factual information.

The cultures which are subject to Classical Archaeology are mainly located in the Mediterranean area. Work as an archaeologist therefore requires close relations to the countries in this area and accordingly the relevant knowledge of foreign languages. Through the respective modules as well as stays abroad (e.g. excavations, field trips, Erasmus-exchange programmes) the students acquire the ability to operate internationally. Linguistic competence is reinforced by the specialist literature which is to a great extent composed in foreign languages, especially, French, Greek and Italian. This way the students learn to comprehend complex texts in other languages and to extract the basic statements. At the same time they have to phrase their findings in a differentiated and concise German in order to apply German as the international language of science in an accomplished manner.

Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2007

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

26-Mar-2009 (2009-16)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

<p>The module provides students with skills of the Egyptian art history and monumental knowledge. Be it the area of architecture, plastics, relief art or painting, some typical issues of the Egyptian art history are covered in detail in the offered courses. Thus, questions of the iconography will be discussed. Skills of the Egyptian language are not required for courses of this module, but would be desirable. A part of the module can be a trip to an Egyptian collection or to Egypt.</p>		
Intended learning outcomes		
<p>Students have an overview of facts, research issues and technical literature concerning the Egyptian history of art. They acquire monumental skills and the ability to critically regard the technical literature. They are familiar with the stylised development of Egyptian art in its fundamental principles. They are able to correctly interpret the most important iconographic features of Egyptian art.</p>
