Module Catalogue
for the Subject
Pre- and Protohistoric Archaeology
as a degree subject in a Bachelor's degree programme with 2 majors
(75 ECTS credits)

Examination regulations version: 2015
Responsible: Faculty of Arts, Historical, Philological, Cultural and Geographical Studies
Responsible: Institute of Ancient Cultures
Contents

The subject is divided into

Content and Objectives of the Programme

Abbreviations used, Conventions, Notes, In accordance with

Compulsory Courses

- Introduction to Pre- and Protohistoric Archaeology 1
- Introduction to Pre- and Protohistoric Archaeology 2
- Periods and Regions in Pre- and Protohistoric Archaeology 2
- Source Materials for Pre- and Protohistoric Archaeology 2
- Morphology and Chronology in Pre- and Protohistoric Archaeology
- Methods and Theories in Pre- and Protohistoric Archaeology
- Excursions in Pre- and Protohistoric Archaeology
- Practical Course in Archaeological Fieldwork 1

Compulsory Electives

- Periods and Regions in Pre- and Protohistoric Archaeology 1
- Source Materials for Pre- and Protohistoric Archaeology 1
- Practical Course in Archaeological Fieldwork 2
- Basics of Classical Archeology 1: Introduction to Greek Archeology
- Basics of Classical Archeology 2: Introduction to Roman/Italian Archeology
- Basics of Classical Archeology 3: Introduction to the Methods of Classical Archeology
- Basic Knowledge in Classical Archeology 1: Greek Archeology
- Basic Knowledge in Classical Archeology 2: Roman/Italian Archeology
- Categories of ancient Art 1
- Categories of ancient Art 2
- Excursion 2: Long Excursion
- Introduction to the Egyptian Script and Language 1
- Introduction to the Egyptian Script and Language 2
- Cultural History of Egypt 1
- Egyptian Art, Artefacts and Monuments 1
- Egyptian Religion 1
- Egyptological Basics
- Egyptological Basics 2
- Cultural History of Egypt 2
- Egyptian Art, Artefacts and Monuments 2
- Egyptological Internship
- Basics of Ancient Near Eastern Studies and Tutorials on Akkadian Grammar
- Introductory Akkadian 1
- Introductory Sumerian 1
- Introductory Hittite 1
- Introduction to Ancient Near Eastern Studies
- Introduction to Ancient Near Eastern Archaeology
- Field Trip
- Topics in the Cultural History of the Ancient Near East
- Topics in the Archaeology of the Ancient Near East A (Regions and Landscapes)
- Topics in the Archaeology of the Ancient Near East B (Artefacts and Buildings)
- Writings, Languages and Literatures 1 in the Greco-Roman World
- Writings, Languages and Literatures 2 in the Greco-Roman World
- Introduction to Ancient History
- Theory and method of Ancient History
- Introduction to the General and Comparative Linguistics
- Western Indo-European Languages 1
- Introduction to European Ethnology/Folklife 1
- Introduction to European Ethnology/Folklife 2
- Introduction to European Ethnology/Folklife 3

Content and Objectives of the Programme

No translation available.
Abbreviations used

Course types: E = field trip, K = colloquium, O = conversatorium, P = placement/lab course, R = project, S = seminar, T = tutorial, Ü = exercise, V = lecture

Term: SS = summer semester, WS = winter semester

Methods of grading: NUM = numerical grade, B/NB = (not) successfully completed

Regulations: (L)ASPO = general academic and examination regulations (for teaching-degree programmes), FSB = subject-specific provisions, SFB = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

28-Sep-2015 (2015-150)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

**Contents**

Students will be provided with basics of the Prehistoric and Early Historical Archaeology: methodological developments of research history will be covered; as well as the principal source genres: settlements, sepulchres and deposit findings.

**Intended learning outcomes**

Students acquire basics concerning the research history and source types of the Prehistoric and Early Historical Archaeology; Archaeological methodology; Sources (findings); Theory.

**Courses**

(type, number of weekly contact hours, language — if other than German)

S (2) + E (0) + E (0)

Module taught in: German and/or English

**Method of assessment**

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

written examination (approx. 90 minutes)

Language of assessment: German and/or English creditable for bonus

**Allocation of places**

## Contents

Students will be provided with basics of the Prehistoric and Early Historical Archaeology: Students will acquire the fundamental specialist and scientific methods for dating and other analyses of different source genres; They will be familiar with selected examples of source material.

## Intended learning outcomes

Students acquire basic knowledge of source types and methods of the Prehistoric and Early Historical Archaeology; Basics of the independent scientific work; Archaeological methodology; Sources (findings); Writing of an academical work.

## Courses

(type, number of weekly contact hours, language — if other than German)

S (2) + E (0) + T (1)

### Contents

Students will be provided with detailed skills of selected cultural periods and cultural spaces concerning the Prehistory and Early History of Archaeology: They will be provided with consolidated knowledge of important findings that characterise the prehistoric and early historic cultures of different periods (from the Palaeolithic up to the Roman Iron Age) and areas (from Northern Europe to the Mediterranean area); Involvement of the research history and the current state of research.

### Intended learning outcomes

Students acquire detailed knowledge of the research history and cultural-specific characteristics of selected cultural periods and cultural areas of the Prehistoric and Early Historical Archaeology; Students will independently deal with archaeological issues/the will deal critically with current research issues; Classification of the Prehistoric and Early Historical Archaeology; Communication techniques.

**Contents**

Students will be provided with knowledge concerning museum education, types of sources and epochs on the basis of natural monuments, collections and exhibitions. Students will be familiar with current archaeological museum concepts that will critically be compared as well as with selected archaeological finding regions.

**Intended learning outcomes**

Students develop an understanding of museum-educational concepts as well as knowledge of finding material, cultural materials and types of source by dealing visually with real objects; Classification of the Prehistoric and Early Historical Archaeology.

**Courses** (type, number of weekly contact hours, language — if other than German)

E (0)  
Module taught in: German and/or English

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) presentation (approx. 20 minutes) with handout (3 to 5 pages) or b) field trip logs (15 pages total)  
Language of assessment: German and/or English

### Contents
Introduction to issues and methods of the Greek Archaeology and transfer of rudimentary knowledge on Greek art and cultural history. During the discussion of public and political, sacral and sepulchre as well as private areas, individual art forms (architecture, sculpture, vase painting) will be presented and important monuments covered.

### Intended learning outcomes
Students acquire basics of Greek Art and Cultural History and are able to identify central monuments and art objects and to locate them in a historical context.

### Courses
V (2) + Ü (1)
Module taught in: German and/or English

### Method of assessment
a) written examination (approx. 90 minutes) or b) oral examination in groups of up to 3 candidates (approx. 20 minutes per candidate)
Language of assessment: German and/or English

**Contents**

The module provides a basic overview of the technical methodology for the classification and analysis of findings, objects and images with the aim of historical interpretation and synthesis; Moreover, technical and general techniques of scientific writing will be covered and fundamental reference works and dictionaries presented.

**Intended learning outcomes**

Students are familiar with technical methodological basics of the classification and analysis of findings, objects and pictures with the objective to historical interpretation and historical synthesis. Further, they are able to apply general and technical techniques of scientific work and to use basic reference books and dictionaries.

**Courses** (type, number of weekly contact hours, language — if other than German)

Contents
The module provides a basic overview as well as a generic consolidation of fundamental genres of the Greek and Roman art, taking into account the stylised development, topographical specifics and manual as well as technical manufacturing processes.

Intended learning outcomes
The students are able to assign archaeological remains of individual genres, to process them according to genre-specific methodology and to classify them temporally, stylistically and hermeneutically. Furthermore, they develop a critical understanding for current methods and research discussions and are able to process a given issue according to scientific standards and to deal critically with the respective specialist literature and to present the different positions of research.

**Contents**

The module intensively thematises a specific genre of ancient art, taking into consideration the stylised development, topographical characteristics and manual as well as technical manufacturing processes.

**Intended learning outcomes**

Students acquire detailed knowledge of selected genres and are able to apply and question the genre-specific methodology critically. They are able to process a given issue according to scientific standards and thus, to deal critically with respective literature as well as to present and outline the different positions of research in written form.

**Courses** (type, number of weekly contact hours, language — if other than German)

### Contents

This module is essential for the entire study of Egyptology and for being able to deal with contents, which is an essential prerequisite for a successful study progress. Students will be provided with skills of the Hieroglyphs, transliteration manners and the most important record types; In addition, especially the non-verbal clauses (nominal, adjectival, adverbial clause) will be covered.

### Intended learning outcomes

Students gain first insights into the Egyptian grammar and the basic vocabulary of the Middle Egyptian Language. They are able to read simple hieroglyphic texts in the original Egyptian language by using basic tools.

### Courses

Ü (2) + T (1)

Module taught in: German and/or English

**Contents**
Introduction to sources of the Egyptian religious history. According to the previous knowledge of the seminar participants, the sources will be read in the original Egyptian language, however, it is not expected that students are acquainted with the Egyptian language. As religion affects numerous areas of the Egyptian culture, the module imparts a basic introduction to the mental world of Egyptians.

**Intended learning outcomes**
In this module, students continue to learn about the Middle Egyptian Language. The verbal forms will be covered in detail (particular different aspects of the suffix conjugation) in order to finally acquire the first reading experience with simpler Egyptian texts.

Module title: Egyptian Art, Artefacts and Monuments 2
Abbreviation: 04-ÄG-KDA-2-152-m01

Module coordinator: holder of the Chair of Egyptology
Module offered by: Chair of Egyptology

ECTS: 5
Method of grading: numerical grade
Duration: 1 semester
Module level: undergraduate

Contents
The module provides students with skills of the Egyptian cultural history and monumental knowledge. Be it the area of architecture, plastics, relief art or painting, some typical issues of the Egyptian cultural history will be covered in detail in the offered courses. Thus, questions of the iconography will be discussed. Skills of the Egyptian language are not required for courses of this module, but would be desirable. A part of the module can be a trip to an Egyptian collection or to Egypt.

Intended learning outcomes
Students have an overview of facts, research issues and technical literature concerning the Egyptian history of art. They are acquainted with monumental skills and are able to critically regard the specialised literature. They are familiar with the stylised development of Egyptian art in its fundamental principles. They are able to correctly interpret the most important iconographic features of Egyptian art.

Students will participate either in a field trip of the Chair of Würzburg for Egyptology or the German Archaeological Institute of Cairo in Egypt or another Egyptian institution (museum, research unit of an academic project). In case of a work placement abroad, students have to find a work placement independently. The Chair will provide support to those students.

**Intended learning outcomes**

Students are able to apply excavation technologies appropriately.

Complementary to the module Einführung ins Akkadische 1 (Introductory Akkadian 1), this course gives an introduction to the methods and tools of ancient Near Eastern studies as well as to scholarly methods in general. The course also serves to practise and deepen the knowledge of Akkadian grammar acquired in the module Einführung ins Akkadische 1.

**Intended learning outcomes**

The student will acquire the ability to use the most important tools of ancient Near Eastern studies (encyclopedias, bibliographies, significant journals, web-based tools).

He/she will acquire basic knowledge of scholarly methods in the field of ancient Near Eastern studies (scholarly writing, developing arguments, techniques for bibliographies and research, proper citation and plagiarism, using sources).

The student will acquire knowledge of the structure of the Akkadian language and, in particular, of the criteria necessary for the analysis of forms.

He/she will be able

1. to create reasonable genitive constructions from given nouns and to translate these,
2. to combine given substantives with pronominal suffixes and to translate these,
3. to render verbal forms given in transliteration with a bound transcription, to analyse and to translate these forms,
4. to name the phonetic values of simple cuneiform signs,
5. to transliterate, transcribe and translate simple practice sentences.

**Courses** (type, number of weekly contact hours, language — if other than German)

Ü (1) + Ü (2)
Module taught in: German and/or English

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

term paper (3000 to 3,500 words excluding bibliography)
Language of assessment: German and/or English

Contents
Akkadian, which belongs to the Semitic family of languages, was the most widespread language of the ancient Near East. Thus, the student must begin learning the language from the start of the programme. The module gives an introduction to cuneiform writing as well as to the grammar and vocabulary of Akkadian, although the main emphasis is on the Old Babylonian dialect.

Intended learning outcomes
The student will become familiar with the structure of the Akkadian language and especially with the criteria necessary for the analysis of forms. He/she will be able
(1) to create reasonable genitive constructions from given nouns and to translate these,
(2) to combine given substantives with pronominal suffixes and to translate these,
(3) to render verbal forms given in transliteration with a bound transcription, to analyse and to translate these forms,
(4) to name the phonetic values of simple cuneiform signs,
(5) to transliterate, transcribe and translate simple practice sentences.
The student will learn to use the most important resources (grammars, dictionaries, text editions).

The Sumerian language, which is not related to any other known language, is the oldest written language of the ancient Near East. This module gives an introduction to the grammar and vocabulary of Sumerian as well as to the cuneiform in which it was written; the knowledge to be acquired by the student is reinforced through the reading of simple Sumerian royal inscriptions. Emphasis is placed upon the Neo-Sumerian grammar, which is employed in the inscriptions of Gudea of Lagas and elsewhere.

**Intended learning outcomes**

The student will acquire an overview of the structure of the Sumerian language and especially of the criteria necessary for the analysis of forms as well as the ability to use the most important resources (grammars, dictionaries, bibliographies, text editions).

He/she will be able

1. to create reasonable genitive constructions in different cases from given nouns and to translate these,
2. to combine given substantives with pronominal suffixes and case endings and to translate these, to analyse verbal forms and to translate these,
3. to read and translate simple royal inscriptions from the original cuneiform writing.

Contents

Hittite, which is the earliest attested language of the Indo-European family of languages, was written in Babylonian cuneiform. Thus, the Hittite culture forms an established component of the cuneiform culture. The module gives an introduction to the grammar and vocabulary of the Hittite language as well as the cuneiform in which it was written and reinforces the acquired knowledge with the reading of simple Hittite historical and/or legal texts.

Intended learning outcomes

The student will acquire an overview of the structure of the Hittite language and especially of the criteria necessary for the analysis of forms as well as the ability to use the most important resources (grammars, dictionaries, bibliographies, text editions).

He/she will be able

1. to attach possessive suffixes to nouns and to decline these,
2. to analyse and translate verb forms,
3. to analyse conjunctions with enclitics,
4. to construct logical sentences from given lexemes and to translate these,
5. to transliterate, analyse and translate Hittite cuneiform texts from the class curriculum.

**Contents**

The module gives an overview of the cultural history of Western Asia from the Early Bronze age to the Neo-Babylonian period based primarily on written sources. Lecture course 1: The lecture gives an overview of the emergence, development and structure of cuneiform as well as of other selected ancient Near Eastern writing systems. The geographical distribution, cultural significance, relationships and fundamental structural phenomena of numerous languages of the ancient Near East will be presented. In addition, a systematic genre-oriented survey of the written remains of the ancient Near East will be given, with an emphasis on the history of ancient Near Eastern literature. Lecture course 2: The lecture gives an overview of the history of ancient Western Asia from the beginnings of "civilisation" in Southern Mesopotamia in the middle of the 4th millennium BC to the end of the Neo-Babylonian empire in 539 BC. The emphasis lies upon Mesopotamia, but Southwest Iran, Syria and Anatolia will also be taken into account. Special attention will be paid to the critical analysis of sources. The lecture combines brief survey accounts with a detailed discussion of individual examples.

**Intended learning outcomes**

The student will acquire an overview knowledge of ancient Near Eastern history and will be able to discuss historical developments and their attestation in written sources critically and in detail on the basis of selected examples. He/she will be familiar with the emergence, development and structure of cuneiform as well as of other selected ancient Near Eastern writing systems. He/she will acquire an overview knowledge of the text corpora of the ancient Near East and of their typical genres.

Contents
The module gives an overview of the cultural history of Western Asia from the Epipalaeolithic period to the Islamic conquest based on archaeological sources. Lecture course 1: The lecture gives an overview of ancient Near Eastern cultural history from the Paleolithic to the end of the Early Bronze Age. The different types of historic monuments and especially the different ceramic styles will be presented in their geographic environment and specific context of discovery and will be diachronically traced. The most important finds and results of important ancient Near Eastern sites will be discussed. In addition, the lecture introduces students to archaeological methods and tools for dating, analysis and systematisation of finds and explains archaeological technical terminology. Lecture course 2: The lecture gives an overview of ancient Near Eastern cultural history from the beginning of the Middle Bronze Age (early second millennium B.C.) to the rise of Islam with an emphasis on the two last pre-Christian millennia. The different types of historic monuments will be presented in their geographic environment and specific context of discovery and will be diachronically traced. The most important finds and results of important and thoroughly excavated ancient Near Eastern cities will be discussed. The description of connections between archaeological finds and historical episodes will be particularly emphasised.

Intended learning outcomes
The student will acquire an overview of the basic lines of ancient Near Eastern cultural history. He/she will be familiar with the predominant types of historic monuments and most important find places and will be able to discuss diachronic developments. He/she will develop a knowledge of archaeological methods and fundamental technical terminology.

**Contents**

The seminar gives an introduction to the ancient Near Eastern collection of a museum or to the historical sites of a specific region of the Near East. Understanding of the monuments will be acquired in advance and the monuments themselves studied on site under the guidance of students and instructors.

**Intended learning outcomes**

The student will acquire an overview of the ancient Near Eastern monuments of a museum or region of the Middle East and will acquire detailed knowledge of selected groups of monuments. He/she will study original monuments of the ancient Near East.

Contents
The module gives a comprehensive overview of a specific topic of ancient Near Eastern cultural history. Possible topics include various areas of the intellectual and cultural life of the ancient Near East, such as literature, art, music, law, sciences, divination, calendars, deities and myths, temple and palace, the structure of societies and many more. There is an emphasis on the discussion of original sources, their historical development as well as theoretical and methodological issues in the analysis of the sources. In addition, the module gives an overview of current research on the relevant topic.

Intended learning outcomes
The student will acquire detailed knowledge of a topic in ancient Near Eastern cultural history and will be able to discuss a selected topic critically and in detail, taking into account the written and iconographic sources. The student will acquire an overview of the theoretical and methodological issues associated with the respective topic.

**Contents**

The module gives a comprehensive overview of the archaeology of a region or landscape of the ancient Near East, such as Anatolia, Assyria, Babylonia, Elam, Northern Syria etc. The geographic characteristics and socio-economic conditions of the landscape as well as the diachronic development of the region will be portrayed with regard to the most important cities and settlements. In addition, the most important individual finds and find assemblages as well as the current archaeological issues concerned with the region will be discussed.

**Intended learning outcomes**

The student will acquire a comprehensive overview of one region (landscape) of the ancient Near East. He/she will acquire detailed knowledge about the diachronic development of the region, its major sites as well as important finds and find assemblages. He/she will be able to identify current archaeological issues concerned with the region with regard to specific sites or finds.

### Contents
This module equips students with fundamental knowledge about ancient history. It provides an overview of ancient history and discusses selected examples. The course explores key problems in and sources of ancient history.

### Intended learning outcomes
Students gain an overview of major developments in ancient history and consolidate their knowledge of one or more themes or periods, taking a range of aspects into account (e.g., politics, the economy, society, culture, ideas, or mentalities). They are able to consider this/these theme(s) or period(s) in a general historical context and to identify interdependencies. Students are able to take aspects of the history of Europe and beyond into account. They are able to select and employ appropriate tools and methods. Students are able to critically analyse and interpret sources and academic literature as well as to present their findings in an appropriate manner.

**Contents**

The module provides students with alternating thematic focus from the area of Ancient History as well as insights into methodological issues, discussions of theory and auxiliary scientific basics of history.

**Intended learning outcomes**

According to the individual focus within a module component, students are able to develop overarching and critical issues reflectively. In addition, they achieve knowledge of different theory formations and methodological procedures during scientific work and to apply auxiliary skills and methods.

**Duration**
1 semester

**Module level**
undergraduate

**Other prerequisites**
--

**Contents**

1. An introductory overview of the early Indo-European languages (geography, chronology, text genres).
3. Introduction to the methodology of diachronic linguistics.
4. Presentation of the most important concepts and analytical techniques of synchronic linguistics in the areas of phonetics, phonology, morphology and word formation. German-language examples will be used as well as examples from other languages depending on the subjects studied within the group and the existing knowledge of course participants.
5. An introduction to the academic working methods of linguistics.
6. An overview of the most important academic literature.

**Intended learning outcomes**

The students will possess the methodical prerequisites for academic work in diachronic and synchronic linguistics in relation to different languages.

Everyday and Popular Cultures

Module coordinator: holder of the Chair of European Ethnology
Module offered by: Chair of European Ethnology

ECTS: 5
Method of grading: numerical grade
Duration: 1 semester
Other prerequisites: --

Contents
Identities and lifestyles characterise partial cultures of modern as well as historical societies regarding their everyday life. Symbols, norms and strategies for action become important, since they influence group and gender identities or ascribe identities in a communicative regard. The preparation, analysis and interpretation of certain subject areas and material groups of everyday and popular culture based on, e.g. regionality, nationality, territoriality, gender, sex and minorities are an integral part of this course.
- Preparation, analysis and interpretation of certain subject areas and material groups of everyday and popular culture based on, e.g. regionality, nationality, territoriality as well as gender, sex and minorities.

Intended learning outcomes
The students acquire knowledge of practical application in regard to personal managements and the organisation of groups. Furthermore, students will develop sensitivity and the ability to discuss stereotypes and prejudices as well as their creation and exploitation. The module aims to develop an application-oriented awareness of the problems in terms of group and gender identities as well as so-called subcultures.
- Knowledge of practical application in regard to personal managements and the organisation of groups.
- Development of sensitivity and the ability to discuss stereotypes and prejudices as well as their creation and exploitation.
- Development of an application-oriented awareness of the problems in terms of group and gender identities and so-called subcultures.

**Contents**

This seminar prepares the content of a multi-day field trip. In the course of the seminar, topic-relevant cultural science texts will be introduced and discussed, the contents, with the help of media, reviewed and the goals of the field trip and key subjects will be introduced.

**Intended learning outcomes**

During the multi-day field trip, the earlier prepared contents and acquired knowledge will be advanced and enlarged to (small) research projects at site. Field work skills and basics of Ethnography will be applied practically.

**Courses** (type, number of weekly contact hours, language — if other than German)

Module title: Research and Imparting Knowledge of Material Everyday Culture
Abbreviation: 04-EEVK-EVA-152-m01

Module coordinator: holder of the Chair of European Ethnology
Module offered by: Chair of European Ethnology

ECTS: 5
Method of grading: numerical grade
Only after succ. compl. of module(s):

Duration: 1 semester
Module level: undergraduate
Other prerequisites: --

Contents:
The emergence and development of European museums as well as the ability to create concepts and techniques for presenting in a museum will be dealt with in depth. They will also be supported by examples and realised through exhibitions. Furthermore, students will be provided with basic knowledge of material culture, e.g. terminology, typology, technology, context of use, coherences of the interaction between people and objects in past and present age. - Mediation of knowledge about emergence and development of European museums. - Creating a concept and techniques for presenting in a museum. - Basic knowledge of material culture, e.g. terminology, typology, technology, context of use, coherences of the interaction between people and objects in past and present age.

Intended learning outcomes:
Overview of fundamental problems, positions and discourses in terms of the development of European museums and the advanced knowledge of their history. Knowledge and comprehension of relevant research questions as well as questions concerning exhibitions. Ability to create an exhibition concept autonomously. Mastering of techniques and approaches to research and acquire materials. Ability to analyse and classify material objects as well as knowledge of their structure, characteristics, terminology and where to find them. Ability to reflect on historic origins, their history of ideas and their coherences. Overview of fundamental problems, positions and discourses in the development of European museums. Advanced history knowledge of European museums. Knowledge and comprehension of relevant research questions as well as questions concerning exhibitions. Ability to create an exhibition concept autonomously. Mastering of techniques and approaches to research and acquire materials. Ability to analyse and classify material objects as well as knowledge of their structure, characteristics, terminology and where to find them. Module title: Basis Module: Introduction in Museum Studies and Exhibition Practice

Abbreviation: 04-Mus-EinfMuA-152-m01

Module coordinator: holder of the Professorship of Museum Studies

Module offered by: Professorship of Museum Studies

ECTS: 5

Method of grading: numerical grade

Duration: 1 semester

Module level: undergraduate

Other prerequisites: --

Contents:
Introduction to the Museology, the history and development of museums as well as an overview of museological working areas. According to the definition of the International Council of Museums (ICOM), a museum is “not-for-profit institution that serves society and their development, that is open to the public and that collects, preserves, examines, imparts and exhibits material remains of the human and its ambient environment for study, education and entertainment purposes”.

Intended learning outcomes:
Students acquire a broad overview knowledge concerning the institution museum, the history, tasks and current problem situation. Moreover, they acquire knowledge of selected museological topics.

Courses (type, number of weekly contact hours, language — if other than German):

Ü (1) + Ü (2)

Module taught in: Ü, Ü, S: German and/or English

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus):

a) presentation (approx. 30 minutes) with position paper (1 to 2 pages) and written elaboration (approx. 10 pages) or b) project (preparing materials, e.g. for a guided tour or other event in the field of museum education or accompanying event, approx. 50 hours total)

04-Mus-EinfMuAV-152-m01

Module coordinator

holder of the Professorship of Museum Studies

Module offered by

Professorship of Museum Studies

ECTS

5

Method of grading

numerical grade

Duration

1 semester

Module level

undergraduate

Other prerequisites

--

Contents

This advanced module gives a detailed insight into Museology and exhibition practice.

Intended learning outcomes

Students acquire detailed knowledge of a selected field of Museology.

Courses

(type, number of weekly contact hours, language — if other than German)

Ü (2) + Ü (2)

Module taught in: Ü, Ü, S: German and/or English

Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) presentation (approx. 30 minutes) with position paper (1 to 2 pages) and written elaboration (approx. 10 pages) or b) project (preparing materials, e. g. for a guided tour or other event in the field of museum education or accompanying event, approx. 50 hours total)

Language of assessment: German and/or English creditable for bonus

Allocation of places

--

Additional information

--

Referred to in LPO I (examination regulations for teaching-degree programmes)

--

**Contents**

Introduction to the extracurricular site "museum" with focus on the educational work and the transfer of knowledge, which is implemented there. According to the definition of the International Council of Museum (ICOM), a museum is a "not-for-profit institution that serves society and their development, that is open to the public and that collects, preserves, examines, imparts and exhibits material remains of the human and its ambient environment for study, education and entertainment purposes".

**Intended learning outcomes**

Students acquire a broad overview knowledge concerning the institution museum and the related history, tasks and current problems. They are able to apply a museum educational working method to the extracurricular learning site museum practically. They achieve a museum educational and specific background knowledge that can be applied to the school practice.

**Contents**

Erosion and accumulation processes and accumulation results: gravitative, fluvial, glacial and periglacial, Aeolian, marin, littoral, solution; monoprocessual large forms, e.g. endogenous/tectonic forms like volcanoes, break clod, fold mountains or Aeolian "Draas" (huge dunes), deflation (enclosed) basins; - polyprocessual large forms, e.g. glacial series, shape of coastlines, escarpments

**Intended learning outcomes**

Students dispose over the following knowledge: basics of the system earth, i.e. the understanding of processes that are dominating the landscape on the Earth’s surface and which are driven by the geological factors rocks, relief, climate, soil, water, flora and fauna. These are decisive for understanding the structure, function and dynamics of the natural environment and its anthropogenic transformation (the environment that has been shaped from humans by land utilisation, settlements, transport routes etc.).

**Contents**

Introduction to "Settlement Geography", students will deal with the following topic areas:
- geographical urbanism,
- Geography of rural settlements,
- urban system research,
- urbanisation,
- regional urban types,
- theories of urban development,
- city models

**Intended learning outcomes**

Students dispose over basic knowledge of Urban Geography as well as Geography of Rural Settlements.

#### Contents

Introduction to basic concepts as well as fundamental contents and methods of "Economic Geography". Topics of theoretical "Economic Geography" like the choice of location and system, structure and dynamics of the economic sector, the geographical influence of groups of players and geographical imbalance will be covered. The examination of theories will be made with the help of typical examples and empirical knowledge.

#### Intended learning outcomes

Students dispose over knowledge skills of Economic Geography concerning terms, contents and methods.

#### Courses (type, number of weekly contact hours, language — if other than German)

- V (3)
- Module taught in: German and/or English

#### Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

#### Contents

Introduction to basic concepts as well as fundamental contents and methods of social and "Population Geography". In particular, topics of geographical "Population Geography" and structure, population movement, geographical society research, Vienna-Munich School of Social Geography, social spatial analysis as well as perception, behaviour and action-theoretical approaches will be covered.

#### Intended learning outcomes

Students acquire a basic understanding of population and socio-geographical issues. They dispose over skills of central population and socio-geographical terms, scientific approaches and theories as well as of acquired possibilities and their implementation on issues of the Applied Population and Social Geography.

#### Courses

(V (3)

Module taught in: German and/or English

**Contents**

Students will get an overview of the Earth’s continuous development over the past 4.6 billion years, genesis, composition and change of the resulting deposits and their evidence concerning former environmental conditions, the development of life and the related possibility of a relative ageing of stratigraphic deposits, the composition of stratigraphy and plate tectonic development as well as an introduction to the absolute age dating.

**Intended learning outcomes**

The students dispose over the required basics of the Earth’s history, stratigraphic methods and age dating of rocks.

</tr>
</tbody>
</table>

### Contents

The course provides an insight into the formation and change of igneous and metamorphic rocks, which make up a significant part of the modern Earth's crust and Earth's surface. Further, the connection between the rock formation (petrogenesis) and the geodynamical processes of the planet Earth, which change constantly, will be made. This includes an introduction to modern methods in order to quantify information, which are contained in rocks, about pressure, temperature and point of time of the rock formation. Next to theoretical considerations, practical observations on thin sections of rocks under the polarisation microscope will be of great importance.

### Intended learning outcomes

The students dispose over basics concerning the igneous and metamorphic Petrology.

### Courses

V (2)

Module taught in: German and/or English

### Method of assessment

(a) written examination (approx. 45 minutes) or (b) oral examination of one candidate each (approx. 30 minutes) or (c) presentation (approx. 30 minutes) or (d) term paper (approx. 20 pages)

Assessment offered: Once a year, summer semester

**Contents**

The module deals with different geochemical systems, particularly in the area of the Earth's upper crust and geochemical processes that lead to changes in rocks and rearrangement of elements or element groups as well as the respective transport mechanisms. The main focus will be on aquatic processes and thus, also on general hydrogeological aspects like water cycle, water storage and problems concerning the water contamination.

**Intended learning outcomes**

The students are acquainted with the basics of geochemical and hydrological processes that particularly occur in the Earth's upper crust and which are the basis of further studies in the field of environmental sciences.

**Courses** (type, number of weekly contact hours, language — if other than German)

V (2)

Thesis

(10 ECTS credits)

Students may also choose to write their Bachelor's theses in their second majors or to write an interdisciplinary thesis.
### Module title
**Bachelor Thesis in Pre- and Protohistoric Archaeology**

### Abbreviation
04-VFG-BTVFG-152-m01

### Module coordinator
holder of the Chair of Pre- and Protohistoric Archaeology

### Module offered by
Chair of Pre- and Protohistoric Archaeology

### ECTS
10

### Method of grading
numerical grade

### Only after succ. compl. of module(s)
--

### Duration
undergraduate

### Contents
With the help of scientific methods, students will work on a specific topic of the Prehistoric and Early Historical Archaeology in a from the ASPO given period of time. In case of the B.A. studies that contain two main subjects, a topic will be chosen that covers an issue, which affects both main subjects interdisciplinarily. The topic is to be agreed upon with an authorised examiner or, in the case of an interdisciplinary thesis, 2 authorised examiners.

### Intended learning outcomes
With the help of scientific methods, students are able to work on an issue of the Prehistoric and Early Historical Archaeology and are able to present their results in written form, according to the scientific convention.

### Courses
No courses assigned to module

### Method of assessment
Bachelor’s thesis (approx. 30 pages)
Language of assessment: German and/or English

### Allocation of places
--

### Additional information
--

### Referred to in LPO I
(examination regulations for teaching-degree programmes)

Key Skills Area
(20 ECTS credits)

In the two degree subjects, students must achieve a total of 20 ECTS credits in the area of transferable skills. Of these, a total of 5 ECTS credits must be achieved in the two subjects in the area of general transferable skills and a total of 15 ECTS credits (no less than 5 ECTS credits per subject) must be achieved in the two subjects in the area of subject-specific transferable skills.
General Key Skills
(0-5 ECTS credits)

Students must select modules offered as part of the pool of general transferable skills (ASQ) of JMU; completion of module 41-IK-BM is recommended.
General Key Skills (subject-specific)
(ECTS credits)
Subject-specific Key Skills
(5-10 ECTS credits)
### Module title

### Duration

1 semester

### Module level

undergraduate

### Other prerequisites

--

### Contents

Students will be provided with knowledge concerning selected topics of scientific auxiliary sciences and EDP applications during the studies of Prehistoric and Early Historical Archaeology: Students will work on the systematic basis of scientific analysis methods as well as the computer-assisted data processing and analysis.

### Intended learning outcomes

Students develop an understanding of scientific methods and the ability to apply specific EDP applications to the Prehistoric and Early Historical Archaeology; They acquire basics of scientific work; Archaeological methodology.

### Courses

(type, number of weekly contact hours, language — if other than German)

S (2)

Module taught in: German and/or English

### Method of assessment

(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) exercises during seminar with practical assignments (approx. 120 minutes total) or written examination (approx. 60 minutes) or b) presentation (approx. 45 minutes) with position paper (2 to 3 pages)

Language of assessment: German and/or English

## Duration
1 semester

## Module level
undergraduate

## Other prerequisites
--

### Contents
Students will be provided with theoretical and practical skills concerning selected techniques of archaeological field research and treatment of findings. Students acquire systematic basics of techniques concerning the archaeological prospection, excavation and documentation.

### Intended learning outcomes
In the archaeological practice, students will deal with selected techniques of field research and preparation of finding reliably, theoretically and thoroughly; Archaeological methodology; Communication techniques; Techniques of field research and preparation of finding.

### Courses
(type, number of weekly contact hours, language — if other than German)

- S (2)
  Module taught in: German and/or English

### Method of assessment
(type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- a) exercises during seminar with practical assignments (approx. 120 minutes total) or written examination (approx. 60 minutes) or b) presentation (approx. 45 minutes) with position paper (2 to 3 pages)
  Language of assessment: German and/or English

### Allocation of places
--

### Additional information
--

### Referred to in LPO I
(examination regulations for teaching-degree programmes)

**Duration**

undergraduate

**Other prerequisites**

--

**Contents**

The module provides students with basic skills of the archaeologic-related vocational field "museum". Introduction to topic areas, such as archiving, cataloguing, lending. Elaboration of a thematic exhibition with the help of the aspects advertisement, marketing and fund-raising.

**Intended learning outcomes**

Students are able to focus on fundamental statements of current research results and to impart these statements with the help of a presentation, which is understandable for a wide range of people and thus, account for knowledge.

**Courses** (type, number of weekly contact hours, language — if other than German)

P (0)

Module taught in: German and/or English

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Preparing an exhibition (approx. 150 hours) or activities report (2 to 3 pages)

Language of assessment: German and/or English

**Contents**

The students will accomplish a work placement either in the University's Martin von Wagner museum or another museum. However, they have to search a work placement independently. In case of external work placements, the Chair will provide support.

**Intended learning outcomes**

Students have the ability to treat and present museum objects properly.

### Contents

The basics of multivariate statistics will be presented, including multiple regression, spectral analysis and eigenvalue techniques.

### Intended learning outcomes

The students achieve methodical skills in terms of multivariate statistical methods and data analysis.

### Courses

- **V (2) + T (2)**
- Module taught in: German and/or English

### Method of assessment

- written examination (approx. 60 minutes)
- Language of assessment: German and/or English

### Allocation of places

**Contents**

Introduction to GIS; application examples from Geography, earth and environmental sciences; introduction to GIS ArcGIS; data models to GIS: factual and geometrical data (vector and grid data); geometrical, topological and topical data modelling; data administration with ArcGIS (ArcCatalog); conception and structure of a GIS project (ArcGIS); plain principle, meta data, data format, attribute data; relational data model; software components of ArcGIS (ArcMap, ArcToolbox, ArcInfo Workstation); data acquisition and preparation of geometrical and factual data (digitisation, measurement); administration of geometrical and factual data (introduction to structure of a geodata base); geographical analysis of geodata (linkage, intersection, topical and geographical queries, geographical interpolation, terrain analysis from digital elevation data); interpretation, visualisation and result presentation of geodata (signatures, diagrams and map design, topical maps).

**Intended learning outcomes**

Students achieve knowledge of the type and development, management, processing and presenting of geographical data. They acquire skills in dealing with GIS and in the organisation of GIS projects as well as in the processing and interpretation of spatial analysis of GIS (GIS software).

**Courses** (type, number of weekly contact hours, language — if other than German)

S (2)

Module taught in: German and/or English

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

portfolio (approx. 20 pages, including 3 maps, 2 logs)

Language of assessment: German and/or English

**Contents**

The lecture gives an overview of the principles of remote sensing, that are: theoretical basics, history of remote sensing / physical principles (energy and radiation, interactions radiation - atmosphere, interactions radiation - surfaces, objects under investigation: soils, vegetation, water) / thermal remote sensing: radiation laws, radiant temperature, emissivity / detectors: characterisation of remote sensing data, platforms and sensors (passive and active systems, e.g. hyperspectral and LiDAR) / radar remote sensing / radar interferometry / basics for remote sensing parameters (land, atmosphere, oceans).

**Intended learning outcomes**

The students describe basics of earth observation. They outline and explain the radiation path through the atmosphere to the object under investigation and back to the sensor. They emphasise essential characteristics of remote sensing data, sensors and platforms.

**Courses** (type, number of weekly contact hours, language — if other than German)

V (2) + T (2)

Module taught in: German and/or English

**Contents**

Principles of modern methods in order to determine mineralogical, elementary and isotopic composition of minerals and rocks, e.g. x-ray diffractometry, x-ray fluorescence spectrometry, microprobe-analytic, mass spectrometry. As far as possible, practical tutorials/demonstrations will be conducted, next to the explanation of theoretical functionality, in the respective labs.

**Intended learning outcomes**

The students achieve basics of common analytical methods in order to determine the chemical and isotopic composition of minerals and rocks.

**Courses** (type, number of weekly contact hours, language — if other than German)

<table>
<thead>
<tr>

**Contents**

Guidance on microscopy of minerals and thin slices of rocks under the polarisation microscope. In order to use a transmitted light microscope, students learn the ropes of crystal-optical principles. On this basis, the most important rock forming groups of minerals will be elucidated by their typical optical features in the thin section.

**Intended learning outcomes**

The students achieve the necessary basics concerning the identification of the most important rock-forming minerals under the polarisation microscope. This module provides students with crucial basics of advanced studies of Petrology and Crystalline Geology.

**Courses** (type, number of weekly contact hours, language — if other than German)

| Ü (2) | Module taught in: German and/or English |

**Method of assessment** (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- a) written examination (approx. 45 minutes) or b) oral examination of one candidate each (approx. 30 minutes) or c) presentation (approx. 30 minutes)

Assessment offered: Once a year, summer semester

Language of assessment: German and/or English

**Allocation of places**

max. 20 places. Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters with the individual student's progression through their degree programme being taken into account. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.
