Content and Objectives of the Programme

Students of Digital Humanities learn the application of computer-supported procedures and the systematic use of digital resources in humanities and cultural sciences. This subject has an interdisciplinary orientation, and its representatives are distinguished by a traditional training in humanities and cultural sciences as well as by their familiarity with a series of relevant concepts, procedures and standards in information technology. Typical research and work areas include:

- digitization
- digital editions and corpora
- formal modelling of knowledge in humanities and cultural sciences
- quantitative text analysis
- visualisation of complex data structures
- digital libraries
- development and use of digital tools for humanists
- theories of digital media

Graduates of the Bachelor main subject programme Digital Humanities (acquisition of 85 ECTS) have practical knowledge of digital procedures and scripting languages and have proved their competence in Digital Humanities in an independently conducted project. Their secondary subject is supplemented by insights into two further subjects in the fields of arts or culture sciences.

Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

07-Aug-2012 (2012-162)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Fundamental knowledge of digitalisation and programming.		
Intended learning outcomes		
Students have gained an overview of digitisation technologies and are able to evaluate the quality of image and metadata with regard to the need for post-processing. They know what hardware, software, staff resources, and organisational expertise are required for a digitisation project and are aware of the costs one will incur throughout such a project. In addition, students master the foundations of algorithmic processing.
