## Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

## Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

## In accordance with

the general regulations governing the degree subject described in this module catalogue:

**LASPO2015**

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

**23-Sep-2020 (2020-79)**

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Contents			
Multivariate analysis procedures for cross-sectional data (multiple OLS regression, logistic regression, models for count data), regression diagnostics, basics of advanced multivariate analysis procedures for different data structures (e.g. event history analysis, panel data analysis, multi-level analysis)			
Intended learning outcomes			
The students know which multivariate data analysis methods are to be applied to which data structure. They will understand the basic principles of the methods dealt with and which model assumptions have to be fulfilled. They are able to interpret the results correctly.			
Courses (type, number of weekly contact hours, language — if other than German)			
V (2) + Ü (1) Module taught in: German and/or English			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)			
a) written examination (approx. 90 minutes) or b) oral examination of one candidate each (approx. 30 minutes) or c) written examination (approx. 90 minutes) and 3 to 5 written exercises (approx. 10 hours total), weighted 8:2 Language of assessment: German and/or English

## Internship in school

(4 ECTS credits)

Students studying for a teaching degree Grundschule must complete a practical training in didactics and teaching methodology (studienbegleitendes fachdidaktisches Praktikum) which refers to one of the subjects they selected as vertieft studiertes Fach (subject studied with a focus on the scientific discipline) pursuant to Section 34 Subsection 1 No. 4 LPO I (examination regulations for teaching-degree programmes). The obligatory accompanying tutorial is offered by the respective subject. The ECTS credits obtained are counted in the subject Erziehungswissenschaften pursuant to Section 10 Subsection 3 LASPO (general academic and examination regulations for teaching-degree programmes).

Contents			
Basic concepts (measurement, scale levels), univariate statistics (frequencies, measures of central tendency, measures of dispersion), basics of inferential statistics, bivariate statistics (cross-tabulation, correlation, t-test), analysis of variance, OLS regression			
Intended learning outcomes			
The students know the most important measures of statistics. They are able to apply these measures adequately to empirical questions, calculate them in the right way and interpret them correctly. They know the assets and drawbacks of the measures covered by the course. They can apply a statistical program to deal with the contents covered by the course.

Multivariate analysis procedures for cross-sectional data (multiple OLS regression, logistic regression, models for count data), regression diagnostics, basics of advanced multivariate analysis procedures for different data structures (e.g. event history analysis, panel data analysis, multi-level analysis)		
<b>Intended learning outcomes</b>		
The students know which multivariate data analysis methods are to be applied to which data structure. They will understand the basic principles of the methods dealt with and which model assumptions have to be fulfilled. They are able to interpret the results correctly.

## **Hausarbeit (thesis)**

(10 ECTS credits)

Preparation of a written Hausarbeit (thesis) in accordance with the provisions of Section 29 LPO I (examination regulations for teaching-degree programmes) is a prerequisite for teaching degree students to be admitted to the Erste Staatsprüfung (First State Examination). In accordance with the provisions of Section 29 LPO I, students studying for a teaching degree Grundschule may write this thesis in the subject Didaktik der Grundschule (Didactics of Grundschule), in the subject they selected as Unterrichtsfach (subject studied with a focus on the scientific discipline) or in the subject Erziehungswissenschaften (Educational Science). Pursuant to Section 29 Subsection 1 Sentence 2 LPO I, students may also choose to write an interdisciplinary thesis.
