Abbreviations used

Course types: $\mathbf{E} = \text{field trip}$, $\mathbf{K} = \text{colloquium}$, $\mathbf{O} = \text{conversatorium}$, $\mathbf{P} = \text{placement/lab course}$, $\mathbf{R} = \text{project}$, $\mathbf{S} = \text{seminar}$, $\mathbf{T} = \text{tutorial}$, $\ddot{\mathbf{U}} = \text{exercise}$, $\mathbf{V} = \text{lecture}$

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

LASP02009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

15-Mar-2012 (2012-11)

28-Sep-2015 (2015-174)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

The module introduces students to the classroom practice of their *Unterrichtsfach* (subject studied with a focus on the scientific discipline). Using specific teaching models, examples and projects in different grades, the module introduces students to subject-specific techniques. In the university course accompanying the placement, students reflect and structure the school type-specific experiences made during their teaching placements and explore additional subject-specific and didactic aspects. In this context, the course discusses selected practical aspects of teaching computer science in accordance with applicable guidelines and curricula. The course focuses on recent developments in classroom practice, also taking into account aspects of school pedagogy and learning psychology that can support the successful practical implementation of subject-specific conceptual designs.

Intended learning outcomes

The students are familiar with the most important components of planning and organising classes. They are able to teach the relevant topics in different grades as well as to critically reflect recent developments in education. They are able to connect ideas from school pedagogy and learning psychology with their expertise in the area of didactics and to incorporate these into their teaching.

Courses (type, number of weekly contact hours, language — if other than German)

This module comprises 2 module components. Information on courses will be listed separately for each module component.

- 10-I-SBFD-RS-1-121: S (no information on SWS (weekly contact hours) and course language available)
- 10-I-SBFD-RS-2-121: P (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component 10-I-SBFD-RS-1-121: Supplement for the Practical Course in Didactics of Informatics (Realschule)

- 2 ECTS, Method of grading: (not) successfully completed
- placement report / fieldwork report / report on practical training / report on practical course / project report / report on technical course (approx. 20 to 25 pages)
- Assessment offered: usually only in the semester in which the course is offered
- Other prerequisites: Admission prerequisite to assessment: regular attendance as specified by lecturer (usually a maximum of 2 incidents of unexcused absence).

Assessment in module component 10-I-SBFD-RS-2-121: Practical Course in Didactics of Informatics (Realschule)

- 2 ECTS, Method of grading: (not) successfully completed
- participation in mandatory teaching practice, completion of all set tasks (as specified by placement school)
- Assessment offered: usually only in the semester in which the course is offered
- Other prerequisites: Admission prerequisite to assessment: regular attendance of placement as specified by placement school.

Basic concepts and processes of educational sciences.

Intended learning outcomes

Professional skills: The module introduces basic questions of educational sciences. The students have basic and orientational knowledge of the structure of the subject and the meaning of the concept of education. They are able to find theoretical explanations for concepts of educational sciences.

Courses (type, number of weekly contact hours, language — if other than German)

Didactic concepts and theories of education, media-didactic concepts with a special focus on the deployment of digital media in classes, planning and creating learning environments whilst taking into account the subject and the target group as well as the requirements of inclusive education; theory of school as a institution and organisation that has been shaped and has to be shaped; results of empirical school and classroom research; concepts of diagnosing, evaluating and promoting performance, concepts of norm determination and quality management; education, schooling, promotion and counselling in school and classes.

Intended learning outcomes

After successfully completing this module, the students are able to characterise and evaluate theories of school and classes as well as concepts and theories of schooling and education in view of different aspects and criteria. They can analyse teaching and learning offers and examples with reference to selected didactic concepts and theories whilst taking into account media as well as information and communication technology and schooling/education situations. In addition, they are able to create their own offers based on theories. They are able to outline processes of norm determination, diagnosis, learning promotion, evaluation and quality management and can evaluate their meaning for the development of school. Furthermore, the students are able to evaluate their own role as a teacher in view of different tasks regarding professional aspects.

Close examination of exemplary areas of School Pedagogics in view of theories about school, classes or the curriculum.

Intended learning outcomes

After successfully completing this module, the students have advanced knowledge of an exemplary area that is essential to the scientific examination of School Pedagogics. They have methodological competencies and know the topic areas that are relevant to practice. The students are able to plan and analyse learning environments or to transfer functions of school to school life and can therefore explain its structures.

During the subject-didactic work placement, which fits the students studies, the main focus of the studies lies on the acquisition of a teacher's work during the subject teaching; Thus, the course is designed to made first experiences concerning the technical planning and analysis of courses as well as an own teaching approach. The subject-didactic work placement, which fits the students studies and lasts one semester, is determined concerning form and substance by LPO I (§ 34, 4).

Intended learning outcomes

Students have the competence to implement the subject-specific class preparation and lesson analysis of the course. They are able to reflect about the suitability of self-critically.

Courses (type, number of weekly contact hours, language — if other than German)

This module comprises 2 module components. Information on courses will be listed separately for each module component.

Application, translation and reflection of fundamental subject-didactic and teaching-practical concepts to an extract of school reality; Planning, preparation, implementation, reflection and evaluation of a proper teaching approach; As planning decisions, generic preparation of a factual and didactic analysis as well as the textualisation of planning a lesson in a scheme of articulation; Systematic expansion of methodical know-how and reflection of possibilities and limits of generic methodical arrangements.

Intended learning outcomes

During the course, students have already acquired the course objects, which are extrapolated from an important perspective, in a learning objective and compentence-oriented, lesson plan compliant, methodically target-aimed and pedagogical and subject-didactic way and are dimensioned for specific sequences or intentions of a course. Students will be able to assign these aspects, which are guided by the extension of professional skill and self-competence, to scholastic practice. In an inependent lesson approach, the link between theoretical knowledge and scholastic practice can be tested. Students can realise their planning, implementation and evaluation in course and practice phases. Students are able to make a vocational field ascertaining change of role and perspective and put themselves to the test of scholastic reality. In doing so, they extend their communication, presentation and contemplation skills.

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component 04-DtRS-FD-SBP-1-092: Teaching of German - Theory and Practice (Realschule)

- 2 ECTS, Method of grading: (not) successfully completed
- a) designing a seminar (approx. 45 minutes) or b) written documentation (approx. 8 pages)
- Other prerequisites: Admission prerequisite to assessment: regular attendance (a maximum of 2 incidents of unexcused absence) of courses (lectures excluded).

Assessment in module component 04-DtRS-FD-SBP-2-092: Practical Training in Didactics and Teaching Methodology - Realschule

- 2 ECTS, Method of grading: (not) successfully completed
- participation in mandatory teaching practice, completion of all set tasks (as specified by placement school)
- Other prerequisites: Admission prerequisite to assessment: regular attendance (a maximum of 2 incidents of unexcused absence) of courses (lectures excluded).

| Contents | | | | | |

The module introduces teaching practice. The students gain insights into the pedagogical, didactic and methodical practice of Physics by observing and discussing classes. They consolidate their knowledge by preparing and holding classes themselves. In the corresponding seminar, the following topics (among others) will be discussed in agreement with the teachers: Introduction to the curriculum of Realschule; criteria to observe and analyse classes; basics of general school and class pedagogics; subject-specific work methods; planning of class sequences and models; introduction to the usage of modern media; development of blackboard pictures and transparency sketches. The main focus will be on class practice, the corresponding seminar also helps the students in developing own classes.

Intended learning outcomes

The students have gained deep insights into the main steps of planning, preparing and organising classes; they are able to implement the contents of the curricula for different grades in a practical manner; they are able to select and use media, methods and social forms according to learning goals; they are able to connect findings of school pedagogics and learning psychology with subject-didactic knowledge and to integrate these findings into the organisation of classes.

Courses (type, number of weekly contact hours, language — if other than German)

Planung und Analyse von Physikunterricht, Realschule (Planning and Analysing Physics Lessons, Realschule): S (2 weekly contact hours), once a year (summer semester)

Studienbegleitendes fachdidaktisches Praktikum Realschule (Practical Training in Didactics and Teaching Methodology, Realschule): P, once a year (summer semester)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

This module has the following assessment components

- 1. Seminar: written presentation or oral presentation with position paper (approx. 8 pages) or oral examination of one candidate each (approx. 10 minutes) or oral examination in groups of 2 (approx. 20 minutes)
- 2. Placement in part 2: participation in mandatory teaching practice, completion of all set tasks as specified by placement school

Students must register for assessment components 1 and 2 online (registration deadline to be announced). Regular attendance of courses is a prerequisite for admission to assessment component 1 (no more than 2 incidents of unexcused absence). Regular attendance of the placement as specified by the placement school is a prerequisite for admission to assessment component 2.

Students must complete the two courses at the same time.

To pass this module, students must pass both assessment component 1 and assessment component 2.

Allocation of places

--

Additional information

Seminar: No more than 18 places per group.

Placement: Registration for and admission to placement via competent placement office.

Cognitive (intelligence, talent, creativity), emotional (eagerness to learn, anxiety) and motivational (motivation through curiosity, learning and performance motivation, interest, self-concept) requirements of learning; professional development of teachers / psychological principles and quality criteria; measuring of school performance, grading and assessment of training success; questioning, assessment, observation and test methods; diagnostics of school readiness for different types of school; methods of school related evaluation

Intended learning outcomes

The students are able to identify, classify and explain the development of the performance and personality structure of pupils as well as the corresponding differences between pupils including the different manifestations of different talents. They acquire knowledge of the individual emotional-motivational and cognitive requirements for the development and improvement of the pupils' performance. They are able to theoretically analyse, if necessary alter and practically apply conventional and psychological scientific methods for the assessment of performance.

Basic learning processes (theories and principles of human learning including cognitive learning processes); memory, knowledge acquisition (models of memory and requirements of memorising and knowledge building); thinking, problem solving (thinking processes and their principles, also during problem solving); instruction, quality of classes (specific measures and requirements of improving classes) / social interaction and communication (teacher-student and student-student interaction, intercultural learning); social structures and processes in small groups (school class, work group, teaching staff, family); social attitudes, social cognition and subjective theories in teachers and students as well as their modification); social conflicts and their resolution.

Intended learning outcomes

Advanced methodological knowledge gives the students a better understanding of psychological literature. Knowledge of Psychology of Learning, Memory, Thinking and Knowledge facilitates better teaching on the one hand and efficient help for better learning on the other hand. Advanced knowledge of Social Psychology improves the students' sympathy for pupils and their dependency on group, family and society; therefore, the students have the knowledge necessary for controlling social phenomena in class and for promoting a supportive social atmosphere in class.

An introduction to classroom practice. Training in specific methods for use in the Protestant religious education classroom on the basis of selected instructional models and classroom projects as well as examples from the classroom. This module prepares students for their transition into professional practice. It gives them an opportunity to gain insights into day-to-day school life and equips them with experience the courses in phase two of their training will draw upon. The module also enhances the didactic and methodological skills of students.

Intended learning outcomes

At the end of the course, students will have found out how they feel in the role of teachers and will have developed the ability to select teaching methods and approaches as well as to assess whether these were appropriate.

Courses (type, number of weekly contact hours, language — if other than German)

This module comprises 2 module components. Information on courses will be listed separately for each module component.

- o6-ThRS-FD-SBP-1-092: P (no information on SWS (weekly contact hours) and course language available)
- o6-ThRS-FD-SBP-2-092: S (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component o6-ThRS-FD-SBP-1-092: Internship

- 2 ECTS, Method of grading: (not) successfully completed
- prerequisites for successful completion: participation in mandatory teaching practice, completion of all set tasks (as specified by placement school)
- Other prerequisites: Admission prerequisite to assessment: regular attendance of placement as specified by placement school.

The one-semester practical training in didactics and teaching methodology (studienbegleitendes fachdidakti-sches Praktikum) for students pursuing a teaching degree Realschule will provide students with an opportunity to make subject-specific observations, under the guidance of an experienced teacher, of how pupils and teachers act in the classroom. In the course accompanying the practical training, students will analyse the experiences they made at school in detail and will become familiar with fundamental principles of biology didactics. They will also acquire an advanced knowledge on how to plan, structure and deliver lessons and will implement what they have learned, delivering several lessons to their placement classes and preparing didactic analyses.

Intended learning outcomes

- Knowledge on how to structure problem-based biology lessons. Overview of teaching methods, modes of interaction in the classroom, teaching aids as well as methods in biology. Insight into the diverse range of tasks a teacher's job includes. Overview of the disciplinary measures teachers may take. Ability to translate topics from the curriculum, in a didactically reduced manner, into teaching sequences, teaching units and lessons. Ability to deliver the respective lessons to a group of pupils.

Courses (type, number of weekly contact hours, language - if other than German)

This module comprises 2 module components. Information on courses will be listed separately for each module component.

This module provides an introduction to physical education as a teaching subject. The students acquire knowledge about the specific work techniques of this subject on the basis of individual education models, teaching examples and class projects in different grades. The students broaden, systematize and complement their practical experiences by learning about technical and didactic aspects in the courses that accompany the teaching placements. For this purpose, they study selected areas of physical education classes which confirm to the guidelines of legal directives and the curriculum. They will focus on different topics, including the current development of teaching practice. In this context they also find connections to sports education and movement science which support the successful introduction of didactic concepts into class.

Intended learning outcomes

The students learn to prepare, conduct and evaluate physical education classes on the basis of predetermined criteria. They learn how the didactic problem of choosing topics impacts the reality of classes and how to find solutions. They know how to implement the Bavarian curriculum in classes of different grades while keeping a critical eye on the current knowledge and debate about sport didactics. Furthermore, they learn to critically evaluate the latest developments of the educational system.

A placement to give students the opportunity to gain an insight into classroom practice. A particular focus in on gaining initial experience of planning, analysing, and teaching lessons in the religious education classroom. The seminar that accompanies the placement gives students an opportunity for theory-based reflection on the experiences they have made. Comparing their practical classroom experiences with what they have learned in theory-based courses, students become familiar with the tensions between the theory and the practice of teaching and develop the ability to take their own position on the issue. The focus of the seminar is on the theory-based reflection on the students' experiences, not on the exploration of theoretical positions.

Intended learning outcomes

At the end of the module, students will have developed the ability to implement teaching models into classroom practice. They will know criteria that will enable them to engage in theory-based reflection upon the experiences they have made in the classroom.

Courses (type, number of weekly contact hours, language — if other than German)

The module introduces the student to the classroom practice of his/her Unterrichtsfach (subject studied with a focus on the scientific discipline) or Didaktikfach (subject studied with a focus on teaching methodology). Using specific teaching models, examples and projects in different grades, the module introduces the student to subject-specific techniques. In the university course accompanying the placement, the student reflects and structures what he/she has learned during his/her teaching placement and explores additional subject-specific and didactic aspects. In this context, the course discusses selected practical aspects of teaching mathematics in accordance with applicable guidelines and curricula. The course focuses on recent developments in classroom practice, also taking into account aspects of school pedagogy and learning psychology that can support the successful practical implementation of subject-specific conceptual designs.

Intended learning outcomes

The student is acquainted with the most important components of planning and organising teaching. He/She is able to teach the relevant topics for different forms, and can critically reflect the recent developments in the educational system. He/She is able to connect ideas from school pedagogy and learning psychology with didactical cognisance and incorporate them in the mise-en-scène of his/her teaching.

Courses (type, number of weekly contact hours, language — if other than German)

This module comprises 2 module components. Information on courses will be listed separately for each module component.

- 10-M-SFDPRS-1-092: Ü (no information on SWS (weekly contact hours) and course language available)
- 10-M-SFDPRS-2-092: P (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component 10-M-SFDPRS-1-092: Theory of Practical training in classroom teaching (German Realschule)

- 2 ECTS, Method of grading: (not) successfully completed
- oral presentation with position paper or written presentation (length to be specified at the beginning of the course)
- Other prerequisites: Admission prerequisite to assessment: regular attendance of courses (a maximum of 2 incidents of unexcused absence).

Assessment in module component 10-M-SFDPRS-2-092: Practical training in classroom teaching (German Real-schule)

- 2 ECTS, Method of grading: (not) successfully completed
- participation in mandatory teaching practice, completion of all set tasks (as specified by placement school)
- Other prerequisites: Admission prerequisite to assessment: regular attendance of placement as specified by placement school.

| Conten | Contents | | | | | |

This module provides an introduction to the practice of teaching history in Realschule. Observing and analysing lessons, students gain an insight into pedagogical, didactic, and methodological practice in the history classroom. Independently preparing and delivering lessons, students consolidate the knowledge they have acquired. The seminar that accompanies the placements explores topics such as: an introduction to the curriculum for Realschule -- criteria for classroom observation and the analysis of lessons -- fundamental principles of general school and classroom education -- subject-specific methods and techniques -- planning teaching sequences and lessons -- an introduction to the use of modern media in the classroom -- the representation of class contents on the blackboard and transparencies (topics to be agreed upon with placement school). The predominant focus of the module is on teaching practice; the seminar mainly aims to help students prepare their own lessons.

Intended learning outcomes

Students have gained an in-depth overview of the major steps involved in lesson planning, preparation, and design; they are able to translate topics from the curriculum for pupils in different grades into lessons for the history classroom; they are able to select and use appropriate media, methods, and modes of interaction in the classroom; they are able to incorporate both findings from the disciplines of school education and the psychology of learning as well as their knowledge in the area of history didactics into their teaching.

Freier Bereich (general as well as subject-specific electives)

(ECTS credits)

Teaching degree students must take modules worth a total of 15 ECTS credits in the area Freier Bereich (general as well as subject-specific electives) (Section 9 LASPO (general academic and examination regulations for teaching-degree programmes)). To achieve the required number of ECTS credits, students may take any modules from the areas below.

Freier Bereich (general as well as subject-specific electives) -- open for all teaching degree students irrespective of their subject combinations: For additional courses that are open to all teaching degree students irrespective of their subject combinations (fächerübergreifendes Zusatzangebot), please refer to the respective Annex of the "Ergänzende Bestimmungen für den "Freien Bereich" im Rahmen des Studiums für ein Lehramt" (Supplementary Provisions on the Area "Freier Bereich" in Teaching-Degree Programmes).

Freier Bereich (general as well as subject-specific electives) -- subject specific (teaching degree Grundschule (LA GS), teaching degree Mittelschule (LA MS), teaching degree Realschule (LA RS) or teaching degree special education (LA SoP)).

| Contor | Contonte | | | | |

In the seminar, the students acquire knowledge of the characteristics, application possibilities and production techniques of multimedia components. They become acquainted with the principles of working with boards. This knowledge enables them to take advantage of the possibilities and opportunities of working with interactive board systems. As an example of multimedia use in modern learning environments, the students practise working with interactive whiteboards, which are a digital version of the conventional blackboard. They study functions such as video and audio recording as well as computerised and self-directed learning processes.

Intended learning outcomes

The students have advanced knowledge of the handling of various electronic board systems. They have the requisite know-how needed to create pupil-centred learning environments and to integrate interactivity into teaching, for example for future teaching jobs.

Courses (type, number of weekly contact hours, language — if other than German)

S (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

presentation (approx. 60 minutes) with written elaboration (approx. 4 pages)

Allocation of places

Number of places: maximum 15. Should the number of applications exceed the number of available places, places will be allocated as follows: (1) Students applying after not having successfully completed assessment in the past two semesters will be given preferential consideration. (2) The remaining places will be allocated by lot. (3) A waiting list will be maintained and places re-allocated by lot as they become available.

Principles of planning classes on the basis of scientifically proven didactic concepts and theories that take into account the curriculum of secondary level I and II in secondary schools as well as the corresponding age group; empirical and theoretical characteristics of good classes; concepts and methods of analysing and evaluating classes whilst taking into account the curriculum of secondary level I and II.

Intended learning outcomes

After successfully completing this module, the students are able to characterise and evaluate concepts and theories of planning and conducting classes in secondary level I and II in view of different aspects and criteria. They can analyse and evaluate teaching and learning offers and examples in secondary level I in view of different aspects. They are able to create own teaching and learning offers and examples in secondary level I and II with reference to selected didactic concepts and theories whilst taking into account the target group, media as well as information and communication technology. Furthermore, they can evaluate selected examples in view of different aspects.

| 1 semester undergraduate | | By way of exception, additional prerequisites are listed in the section on assessments. | | | |

The module gives a basic insight into the research of everyday and popular cultures from the view of European Ethnology/ Cultural Anthropology (empirical cultural science, Cultural Anthropology). For a long time, it has only been the "nice things" of the former "cultures" that had to be saved, but for a modern Cultural Anthropology, the testimonies of everyday and popular mass culture are of great significance: The dramatic changes of the preindustrial world changing into an industrial and post-industrial world are visible. This changed research concept of the cultural analysis, the most important technical terms, sources, methods as well as selected working areas and technical relevant basics of the scientific work covers an overall introduction to the research field culture. The acquired basics will be consolidated and differentiated on the basis of a generic topic area. Thus, the study of specific everyday and popular cultures in history and the present age takes place, taking into account the regional, particularly the dealing with Bavarian regions, but also cultural and intercultural environment issues. Hence, the module provides a detailed background knowledge of the field of experience of pupils and students that can be applied to the school practice at the same time.

Intended learning outcomes

Students acquire the following competences: - Fundamental knowledge of scientific working methods; -Basic knowledge of folkloric and ethnological cultural analysis; -Advanced knowledge of a generic working field from the area of cultural analysis or Ethnography based on generic everyday and popular cultures from the past and present age; Dealing autonomously with cultural phenomena and processes based on typical examples; - Students acquire general cultural practice and intercultural competences in a selected field of study, especially for the implementation of school lessons (e.g. Regional and Cultural studies, History, Ethics, Religious Education).

Courses (type, number of weekly contact hours, language — if other than German)

This module comprises 2 module components. Information on courses will be listed separately for each module component.

- 04-EEVK-EAP-GWS-1-092: Ü (no information on SWS (weekly contact hours) and course language available)
- o4-EEVK-EAP-GWS-2-092: S (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Assessment in module component 04-EEVK-EAP-GWS-1-092: Introduction: Culture as a field of research

- 2 ECTS, Method of grading: numerical grade
- written examination (approx. 60 minutes)
- Other prerequisites: Admission prerequisite to assessment: regular attendance of exercises (a maximum of 2 incidents of unexcused absence).

Assessment in module component o4-EEVK-EAP-GWS-2-092: Researching popular and everyday culture

• 3 ECTS, Method of grading: numerical grade

- presentation (approx. 25 minutes) with handout (approx. 2 page) and written elaboration (approx. 10 pages)
- Other prerequisites: Admission prerequisite to assessment: regular attendance of seminar (a maximum of 2 incidents of unexcused absence).

- Students gain an insight into cultural-scientific research and topic areas that are defined by the determinants tradition and modernity as well as by space and time.
- Overview of research approaches and theoretical positions of cultural historical work.
- Tradition situations, tradition carriers and modalities as well as phenomena and factors of the cultural change will be covered.
- Students will be provided with approaches and techniques of the cultural analysis.

Intended learning outcomes

- Students develop an understanding of historical and cultural contexts.
- The module provides students with historico-cultural knowledge.
- They gain insights into positions and research fields of the historico-cultural work.
- They are able to classify historical cultural heritage, cultural bodies and cultural mediators in time and space.
- The students are able to reflect the use of cultural analysis critically.

Manifestations, causes, clustering and effects of behavioural abnormalities in secondary education. Measures and programmes to influence behavioural abnormalities in school and school-related situations, especially aggression and violence, anxiety disorders, disturbed social and eating behaviour as well as attention deficit hyperactivity disorder.

Intended learning outcomes

The students know the causes, manifestations and relevance of behavioural abnormalities in pupils in secondary education, regardless of the type of school. They have knowledge of measures and programmes for influencing behavioural abnormalities in school and in the context of school and especially know the structure, course and specific application of relevant, evaluated programmes.

Courses (type, number of weekly contact hours, language — if other than German)

S (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

- a) talk (approx. 20 minutes) with written elaboration (approx. 2 pages) or
- b) presentation (approx. 20 minutes) with documentation (approx. 2 pages) or
- c) term paper (approx. 7 pages) or
- d) written examination (approx. 30 minutes) or
- e) oral examination (approx. 15 minutes) or
- f) portfolio (maximum 10 pages)

Allocation of places

Number of places: maximum 30. Places will be allocated by lot.

Principles, goals and methods of using media in school and class in view of Media Psychology, media technology, and Educational Psychology, e.g. psychological computer programmes for learning and practising individual teaching subjects and areas of secondary education; utilising recording media for classroom support (ensuring learning achievements, visualisation, improvement of class solidarity).

Intended learning outcomes

The students know corresponding media and their possible pedagogical-psychological application. When it comes to learning programmes, they have gained an overview of relevant, evaluated programmes and are able to evaluate their efficiency on the basis of individual dimensions. They are able to handle recording media and to prepare the usage for improved teaching.

Types, development and identification of intellectual giftedness and its typical manifestations in secondary education, including the resulting advantages and disadvantages in school life. Necessity and measures of special support for highly gifted pupils in secondary education.

Intended learning outcomes

The students have knowledge of intellectual giftedness in pupils in secondary education as well as the forms, development and possibilities of identification. They know the capabilities and limits of highly gifted pupils in secondary education as well as the possible developmental problems of these pupils. They know school and extracurricular measures for the promotion of highly gifted pupils as well as the possibilities of psychological counselling.

Forms, identification and effects of special learning disorders in primary education, especially of dyslexia and dyscalculia, including the psychological theories on development and course. Psychologically evaluated intervention programmes in view of their way of functioning, organisation and implementation.

Intended learning outcomes

The students know special learning disorders, especially dyslexia and dyscalculia as well as their forms and their relevance in school. They have gained an overview of corresponding, evaluated intervention and training programmes and know how to apply these.

Supervision of teaching degree students deals with current stress situations of supervisors. These situations might include conflicts resulting from relations with oneself, pupils, parents or the teaching staff. We will consider the problems presented from different angles and compile various solution approaches.

Intended learning outcomes

By working as supervisors, the teaching degree students advance their personal, subject-specific and social competencies. The students are able to re-evaluate conflictual relations in school, to evaluate interaction processes and problems in altered contexts, and to perceive themselves and others in a differentiated manner. They are more aware of their own and other person's feelings and are able to develop alternatives for action.

| Contents | | | | | |

Self-perception, self-reflection and resource analysis regarding one's suitability as a teacher and the decision to study a teaching degree programme (demands on teachers; individual stress management strategies; the significance of collegial counselling when dealing with difficult pupils, parents and colleagues). The teacher training courses analyse the teaching behaviour of the participating students and the structure of learning-psychological and socio-psychological alternatives: (usage of video feedback; elements of group dynamics and behaviour regulation in due consideration of different types of pupils.)

Intended learning outcomes

The students reflect on their journey leading to the teaching degree studies. They compare the role and tasks of teachers to their expectations and competencies and analyse stress factors and possible coping strategies. They understand the importance of personal attitude and behaviour when dealing with pupils, parents and colleagues and become acquainted with solution-oriented systemic perspectives. After completing the teaching training, the students know advantageous and disadvantageous forms and effects of possible interactions between teachers and children/juveniles as well as alternative behaviour patterns for dealing with pupils based on an appropriate basic attitude taking into account the pupils' individual peculiarities.

Different aspects of messages; basic attitudes in conversation; active and passive listening; I-messages; preparation for and phases of conversation; problem and solution orientation; observation and analysis of sample conversations as well as testing and practising of conversations on the basis of realistic conversational situations.

Intended learning outcomes

The students acquire basic attitudes and techniques indispensable for a target- and result-oriented conversation in a professional and confidence-building atmosphere.

Courses (type, number of weekly contact hours, language — if other than German)

Ü (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

designing a seminar (approx. 90 minutes). Designing a seminar includes providing subject-specific input, giving instructions for assignments, moderating/coordinating the participants' contributions, summarising these contributions as well as demonstrating/delivering/designing a class.

Allocation of places

Number of places: maximum 20. Places will be allocated by lot.

Basics of intercultural education; didactics of intercultural education, intercultural competencies.

Intended learning outcomes

The students are provided with an overview of the theories and lines of argument of cultural and intercultural education. They are able to find cultural differences and similarities by studying theories of culture, inter-culturalism and foreignness. They become acquainted with structures of cultural knowledge as well as questions and methods of intercultural communication and learn how to convey this knowledge. Furthermore, they acquire competencies by trying and practising general and subject-specific intercultural didactic competencies.

At the beginning of the seminar, the students acquire important knowledge of the technical development of websites. In the following, they become acquainted with tools for the sensible and effective organisation of websites. Afterwards, the students develop own projects and present them in the plenum.

Intended learning outcomes

The students have broad knowledge of the structure and function of web technologies such as HTML, CSS, PHP, databases and content management systems. They know tools for the efficient and sensible use of these technologies. They have acquired advanced knowledge of much-discussed concepts such as "Web 2.0" and "Accessibility" through practical application examples.

In this seminar, the students learn to efficiently handle multimedia formats and contents in combination with electronic board systems. Theoretical principles of working with boards are mentioned. Aside from learning how to acquire resources for the integration into board images, the students also learn how to produce such resources themselves. Afterwards, the students present self-created board images in the course, which are discussed in the group.

Intended learning outcomes

The students have basic knowledge of the handling of various electronic board systems. They have the requisite know-how needed to create pupil-centred learning environments and to integrate interactivity into teaching for example for future teaching jobs.

German contents available but not translated yet.

Im Seminar wird ein Know-how zur Evaluation von Open-Source-Lösungen vermittelt. Anschließend wird die Funktionalität von etablierten Produkten aus diesem Bereich behandelt. In ihren Vorträgen stellen die Studierenden neben den Evaluationskriterien funktionale Aspekte eines spezifischen Produkts vor und veranschaulichen die produktive Arbeit mit diesem.

Intended learning outcomes

German intended learning outcomes available but not translated yet.

Die Studierenden verfügen über vertiefte Kenntnisse zur Evaluation von Open-Source-Software. Sie kennen neben gängigen auch spezielle Funktionen um produktiv mit quelloffenen Applikationen zu arbeiten. Die Studierenden können einen Vergleich von Open-Source-Lösungen zu deren kommerziellen Pendants ziehen und sind in der Lage Anwendungen aus beiden Rubriken miteinander einzusetzen.

This seminar imparts know-how about the evaluation of open source solutions. Afterwards, it discusses the functionality of established products of this area. During their presentations, the students introduce evaluation criteria as well as functional aspects of a specific product and show how to productively work with it.

Intended learning outcomes

The students have detailed knowledge of the evaluation of open source software. They know farther-reaching functions for productive working with open source applications. The students are able to compare open source solutions to their commercial counterparts.

Concepts and methods of teaching and learning in school and in class; theoretical and empirical criteria of good classes as a basis for the critical evaluation of concepts and methods

Intended learning outcomes

After successfully completing this module, the students are able to characterise and evaluate selected concepts and theories of teaching and learning in school and in class in view of different aspects and criteria (main idea, empirical findings, realization possibilities and limits).

Courses (type, number of weekly contact hours, language — if other than German)

S (no information on SWS (weekly contact hours) and course language available)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module is creditable for bonus)

a) written examination (approx. 30 minutes) or b) oral examination of one candidate each (approx. 10 minutes) or c) oral examination in groups (groups of 3, approx. 30 minutes) or d) presentation with/without slides (approx. 15 minutes) with written elaboration (approx. 5 pages) or e) term paper (approx. 8 pages) or f) portfolio (approx. 10 pages)

Allocation of places

Number of places: maximum 15. Places will be allocated by lot.

Thesis

(10 ECTS credits)

Preparation of a written Hausarbeit (thesis) in accordance with the provisions of Section 29 LPO I (examination regulations for teaching-degree programmes) is a prerequisite for teaching degree students to be admitted to the Erste Staatsprüfung (First State Examination). The Hausarbeit module is worth 10 ECTS credits.

Students studying for a teaching degree Grundschule or Hauptschule may write their Hausarbeit (thesis) pursuant to Section 29 LPO I (examination regulations for teaching-degree programmes) in the subject Erziehungswissenschaften (Educational Science) (Erziehungswissenschaftliches Studium (Educational Science Courses) or Gesellschaftswissenschaftliches Studium (Social and Political Sciences Courses)), in the subject Didaktiken einer Fächergruppe der Hauptschule (Didactics of a Group of Subjects of Hauptschule) within the meaning of Section 38 Subsection 1 LPO I, Didaktik der Grundschule (Didactics for Grundschule) within the meaning of Section 36 Subsection 1 LPO I, or in the subject they selected as Unterrichtsfach (subject studied with a focus on the scientific discipline). Students may also choose to write an interdisciplinary thesis. Students studying for a teaching degree Realschule or Gymnasium may write their Hausarbeit (thesis) pursuant to Section 29 LPO I (examination regulations for teaching-degree programmes) in the subject Erziehungswissenschaften (Educational Science) (Erziehungswissenschaftliches Studium (Educational Science Courses)) or in one of the two subjects they selected as Unterrichtsfach or vertieft studiertes Fach (subject studied with a focus on the scientific discipline). Students may also choose to write an interdisciplinary thesis.

Students studying for a teaching degree in special education may write their Hausarbeit (thesis) in their specialisation in special education. In accordance with the provisions of Section 29 Subsection 1 Sentence 2 LPO I (examination regulations for teaching-degree programmes), students may also choose to write an interdisciplinary thesis. For the Hausarbeit modules of each specialisation in special education, see the corresponding SFB (list of modules).
