Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

Didactic concepts and theories of education, media-didactic concepts with a special focus on the deployment of digital media in classes, planning and creating learning environments whilst taking into account the subject and the target group as well as the requirements of inclusive education; theory of school as a institution and organisation that has been shaped and has to be shaped; results of empirical school and classroom research; concepts of diagnosing, evaluating and promoting performance, concepts of norm determination and quality management; education, schooling, promotion and counselling in school and classes.		
Intended learning outcomes		
After successfully completing this module, the students are able to characterise and evaluate theories of school and classes as well as concepts and theories of schooling and education in view of different aspects and criteria. They can analyse teaching and learning offers and examples with reference to selected didactic concepts and theories whilst taking into account media as well as information and communication technology and schooling/education situations. In addition, they are able to create their own offers based on theories. They are able to outline processes of norm determination, diagnosis, learning promotion, evaluation and quality management and can evaluate their meaning for the development of school. Furthermore, the students are able to evaluate their own role as a teacher in view of different tasks regarding professional aspects.

Basic learning processes (theories and principles of human learning including cognitive learning processes); memory, knowledge acquisition (models of memory and requirements of memorising and knowledge building); thinking, problem solving (thinking processes and their principles, also during problem solving); instruction, quality of classes (specific measures and requirements of improving classes)/ social interaction and communication (teacher-student and student-student interaction, intercultural learning); social structures and processes in small groups (school class, work group, teaching staff, family); social attitudes, social cognition and subjective theories in teachers and students as well as their modification); social conflicts and their resolution.		
Intended learning outcomes		
Advanced methodological knowledge gives the students a better understanding of psychological literature. Knowledge of Psychology of Learning, Memory, Thinking and Knowledge facilitates better teaching on the one hand and efficient help for better learning on the other hand. Advanced knowledge of Social Psychology improves the students' sympathy for pupils and their dependency on group, family and society; therefore, the students have the knowledge necessary for controlling social phenomena in class and for promoting a supportive social atmosphere in class.

Internship in school

(4 ECTS credits)

Students studying for a teaching degree Grundschule, Mittelschule, Realschule, or Gymnasium must complete a practical training in didactics and teaching methodology (studienbegleitendes fachdidaktisches Praktikum) pursuant to Section 34 Subsection 1 No. 4 LPO I (examination regulations for teaching-degree programmes) and must attend the accompanying tutorial. Students studying for a teaching degree Grundschule or Mittelschule must complete the respective courses in the subject they selected as Unterrichtsfach (subject studied with a focus on the scientific discipline), students studying for a teaching degree Realschule or Gymnasium must complete the respective courses in one of the subjects they selected as Unterrichtsfach or vertieft studiertes Fach (subject studied with a focus on the scientific discipline). Details on the practical training in didactics and teaching methodology as well as the accompanying tutorial are set out in the FSB (subject-specific provisions) and SFB (list of modules) of the respective subjects. Students studying for a teaching degree in special education will not have to complete a practical training in didactics and teaching methodology. Instead they will have to complete an ancillary module (Additiv-Modul). Details on ancillary modules are set out in the FSB (subject-specific provisions) and SFB (list of modules) of the respective specialisation in special education.

<p>The module introduces the student to the classroom practice of his/her Unterrichtsfach (subject studied with a focus on the scientific discipline) or Didaktikfach (subject studied with a focus on teaching methodology). Using specific teaching models, examples and projects in different grades, the module introduces the student to subject-specific techniques. In the university course accompanying the placement, the student reflects and structures what he/she has learned during his/her teaching placement and explores additional subject-specific and didactic aspects. In this context, the course discusses selected practical aspects of teaching mathematics in accordance with applicable guidelines and curricula. The course focuses on recent developments in classroom practice, also taking into account aspects of school pedagogy and learning psychology that can support the successful practical implementation of subject-specific conceptual designs.</p>		
Intended learning outcomes		
<p>The student is acquainted with the most important components of planning and organising teaching. He/She is able to teach the relevant topics for different forms, and can critically reflect the recent developments in the educational system. He/She is able to connect ideas from school pedagogy and learning psychology with didactical cognisance and incorporate them in the mise-en-scène of his/her teaching.</p>

<p>This module provides an introduction to the practice of teaching history in Realschule. Observing and analysing lessons, students gain an insight into pedagogical, didactic, and methodological practice in the history classroom. Independently preparing and delivering lessons, students consolidate the knowledge they have acquired. The seminar that accompanies the placements explores topics such as: an introduction to the curriculum for Realschule -- criteria for classroom observation and the analysis of lessons -- fundamental principles of general school and classroom education -- subject-specific methods and techniques -- planning teaching sequences and lessons -- an introduction to the use of modern media in the classroom -- the representation of class contents on the blackboard and transparencies (topics to be agreed upon with placement school). The predominant focus of the module is on teaching practice; the seminar mainly aims to help students prepare their own lessons.</p>		
Intended learning outcomes		
<p>Students have gained an in-depth overview of the major steps involved in lesson planning, preparation, and design; they are able to translate topics from the curriculum for pupils in different grades into lessons for the history classroom; they are able to select and use appropriate media, methods, and modes of interaction in the classroom; they are able to incorporate both findings from the disciplines of school education and the psychology of learning as well as their knowledge in the area of history didactics into their teaching.</p>

<p>A placement to give students the opportunity to gain an insight into classroom practice. A particular focus is on gaining initial experience of planning, analysing, and teaching lessons in the religious education classroom. The seminar that accompanies the placement gives students an opportunity for theory-based reflection on the experiences they have made. Comparing their practical classroom experiences with what they have learned in theory-based courses, students become familiar with the tensions between the theory and the practice of teaching and develop the ability to take their own position on the issue. The focus of the seminar is on the theory-based reflection on the students' experiences, not on the exploration of theoretical positions.</p>		
Intended learning outcomes		
<p>At the end of the module, students will have developed the ability to implement teaching models into classroom practice. They will know criteria that will enable them to engage in theory-based reflection upon the experiences they have made in the classroom.</p>

<p>Designing and delivering lessons for the Protestant religious education classroom, taking academic and didactic aspects into account; training in specific methods for use in the Protestant religious education classroom on the basis of selected instructional models and classroom projects as well as examples from the classroom (different age groups and school types); consolidation of the students' methodological and personal skills.</p>		
Intended learning outcomes		
<p>Having gained some teaching experience, students will be able to plan their own learning scenarios as well as to implement, evaluate, and reflect upon these. They will be able to find out about the social and cultural backgrounds as well as the religious socialisation of their pupils by making classroom observations. Students will be able to use a range of methods in the religious education classroom as well as to evaluate and reflect upon these, taking aspects of the academic discipline of Protestant theology into account. They will know how to encourage pupils to independently explore the topics discussed in class. Students will be able to critically reflect upon the role of the teacher in the religious education classroom and develop their own professional profile. They will have gained insights into day-to-day school life from a teacher's point of view and will have become clear about what they expect from phase two of their training.</p>

Application, translation and reflection of fundamental subject-didactic and teaching-practical concepts to an extract of school reality; Planning, preparation, implementation, reflection and evaluation of a proper teaching approach; As planning decisions, generic preparation of a factual and didactic analysis as well as the textualisation of planning a lesson in a scheme of articulation; Systematic expansion of methodical know-how and reflection of possibilities and limits of generic methodical arrangements.		
Intended learning outcomes		
During the course, students have already acquired the course objects, which are extrapolated from an important perspective, in a learning objective and competence-oriented, lesson plan compliant, methodically target-aimed and pedagogical and subject-didactic way and are dimensioned for specific sequences or intentions of a course. Students will be able to assign these aspects, which are guided by the extension of professional skill and self-competence, to scholastic practice. In an independent lesson approach, the link between theoretical knowledge and scholastic practice can be tested. Students can realise their planning, implementation and evaluation in course and practice phases. Students are able to make a vocational field ascertaining change of role and perspective and put themselves to the test of scholastic reality. In doing so, they extend their communication, presentation and contemplation skills.

<p>The one-semester practical training in didactics and teaching methodology (<i>studienbegleitendes fachdidaktisches Praktikum</i>) for students pursuing a teaching degree <i>Realschule</i> will provide students with an opportunity to make subject-specific observations, under the guidance of an experienced teacher, of how pupils and teachers act in the classroom. In the course accompanying the practical training, students will analyse the experiences they made at school in detail and will become familiar with fundamental principles of biology didactics. They will also acquire an advanced knowledge on how to plan, structure and deliver lessons and will implement what they have learned, delivering several lessons to their placement classes and preparing didactic analyses.</p>		
Intended learning outcomes		
<p>- Knowledge on how to structure problem-based biology lessons. Overview of teaching methods, modes of interaction in the classroom, teaching aids as well as methods in biology. Insight into the diverse range of tasks a teacher's job includes. Overview of the disciplinary measures teachers may take. Ability to translate topics from the curriculum, in a didactically reduced manner, into teaching sequences, teaching units and lessons. <p>The module introduces students to the classroom practice of their <i>Unterrichtsfach</i> (subject studied with a focus on the scientific discipline). Using specific teaching models, examples and projects in different grades, the module introduces students to subject-specific techniques. In the university course accompanying the placement, students reflect and structure the school type-specific experiences made during their teaching placements and explore additional subject-specific and didactic aspects. In this context, the course discusses selected practical aspects of teaching computer science in accordance with applicable guidelines and curricula. The course focuses on recent developments in classroom practice, also taking into account aspects of school pedagogy and learning psychology that can support the successful practical implementation of subject-specific conceptual designs.</p>		
Intended learning outcomes		
<p>The students are familiar with the most important components of planning and organising classes. They are able to teach the relevant topics in different grades as well as to critically reflect recent developments in education. They are able to connect ideas from school pedagogy and learning psychology with their expertise in the area of didactics and to incorporate these into their teaching.</p>

<p>The course for a teaching position at a secondary school, which accompanies the work placement, will systematise as well as consolidate experiences that are acquired during the work placement in a school and will complete the experiences by technical aspects. Thus, selected areas concerning the practice in the English lessons, which orientate towards the content requirements of valid guidelines and curricula, will be covered. The focus will lie on current developments concerning the teaching practice. In this context, connecting factors regarding school education and learning psychology are the result; they support the successful implementation of educational concepts in the daily teaching life.</p>		
Intended learning outcomes		
<p>Students are expected to</p> <ul style="list-style-type: none"> • be familiar with the most important components of lesson planning and teaching structure • be able to practically implement the contents for different grades, which are described in the curriculum exemplarily • critically reflect the latest developments in the educational system • learn to involve important findings from school education and learning psychology and to connect the findings with subject-specific knowledge as well as to involve the presentation of the lesson.

<p>This module provides an introduction to physical education as a teaching subject. The students acquire knowledge about the specific work techniques of this subject on the basis of individual education models, teaching examples and class projects in different grades. The students broaden, systematize and complement their practical experiences by learning about technical and didactic aspects in the courses that accompany the teaching placements. For this purpose, they study selected areas of physical education classes which confirm to the guidelines of legal directives and the curriculum. They will focus on different topics, including the current development of teaching practice. In this context they also find connections to sports education and movement science which support the successful introduction of didactic concepts into class.</p>		
Intended learning outcomes		
<p>The students are able to prepare, conduct and evaluate physical education classes on the basis of predetermined criteria. They know how the didactic problem of choosing topics impacts the reality of classes and how to find solutions. They know how to implement the Bavarian curriculum in classes of different grades while keeping a critical eye on the current knowledge and debate about sport didactics. Furthermore, they are able to critically evaluate the latest developments of the educational system.</p>

<p>The module introduces teaching practice. The students gain insights into the pedagogical, didactic and methodical practice of Physics by observing and discussing classes. They consolidate their knowledge by preparing and holding classes themselves. In the corresponding seminar, the following topics (among others) will be discussed in agreement with the teachers: Introduction to the curriculum of Realschule; criteria to observe and analyse classes; basics of general school and class pedagogics; subject-specific work methods; planning of class sequences and models; introduction to the usage of modern media; development of blackboard pictures and transparency sketches. The main focus will be on class practice, the corresponding seminar also helps the students in developing own classes.</p>

Supervision of teaching degree students deals with current stress situations of supervisors. These situations might include conflicts resulting from relations with oneself, pupils, parents or the teaching staff. We will consider the problems presented from different angles and compile various solution approaches.		
Intended learning outcomes		
By working as supervisors, the teaching degree students advance their personal, subject-specific and social competencies. The students are able to re-evaluate conflictual relations in school, to evaluate interaction processes and problems in altered contexts, and to perceive themselves and others in a differentiated manner. They are more aware of their own and other person's feelings and are able to develop alternatives for action.

<p>Self-perception, self-reflection and resource analysis regarding one's suitability as a teacher and the decision to study a teaching degree programme (demands on teachers; individual stress management strategies; the significance of collegial counselling when dealing with difficult pupils, parents and colleagues). The teacher training courses analyse the teaching behaviour of the participating students and the structure of learning-psychological and socio-psychological alternatives: (usage of video feedback; elements of group dynamics and behaviour regulation in due consideration of different types of pupils.)</p>		
Intended learning outcomes		
<p>The students reflect on their journey leading to the teaching degree studies. They compare the role and tasks of teachers to their expectations and competencies and analyse stress factors and possible coping strategies. They understand the importance of personal attitude and behaviour when dealing with pupils, parents and colleagues and become acquainted with solution-oriented systemic perspectives. After completing the teaching training, the students know advantageous and disadvantageous forms and effects of possible interactions between teachers and children/juveniles as well as alternative behaviour patterns for dealing with pupils based on an appropriate basic attitude taking into account the pupils' individual peculiarities.</p>

Paper

(10 ECTS credits)

Preparation of a written Hausarbeit (thesis) in accordance with the provisions of Section 29 LPO I (examination regulations for teaching-degree programmes) is a prerequisite for teaching degree students to be admitted to the Erste Staatsprüfung (First State Examination). The Hausarbeit module is worth 10 ECTS credits.

Students studying for a teaching degree Grundschule or Mittelschule may write their Hausarbeit (thesis) pursuant to Section 29 LPO I (examination regulations for teaching-degree programmes) in the subject Erziehungswissenschaften (Educational Science) (Erziehungswissenschaftliches Studium (Educational Science Courses) or Gesellschaftswissenschaftliches Studium (Social and Political Sciences Courses)), in the subject Didaktiken einer Fächergruppe der Mittelschule (Didactics of a Group of Subjects of Mittelschule) within the meaning of Section 38 Subsection 1 LPO I, Didaktik der Grundschule (Didactics for Grundschule) within the meaning of Section 36 Subsection 1 LPO I, or in the subject they selected as Unterrichtsfach (subject studied with a focus on the scientific discipline). Students may also choose to write an interdisciplinary thesis. Students studying for a teaching degree Realschule or Gymnasium may write their Hausarbeit (thesis) pursuant to Section 29 LPO I (examination regulations for teaching-degree programmes) in the subject Erziehungswissenschaften (Educational Science) (Erziehungswissenschaftliches Studium (Educational Science Courses)) or in one of the two subjects they selected as Unterrichtsfach or vertieft studiertes Fach (subject studied with a focus on the scientific discipline). Students may also choose to write an interdisciplinary thesis.

Students studying for a teaching degree in special education may write their Hausarbeit (thesis) in their specialisation in special education. In accordance with the provisions of Section 29 Subsection 1 Sentence 2 LPO I (examination regulations for teaching-degree programmes), students may also choose to write an interdisciplinary thesis. For the Hausarbeit modules of each specialisation in special education, see the corresponding SFB (list of modules).
