Students consolidate their knowledge and qualifications concerning the sub-discipline didactics, which has not been chosen in the advanced module, in order to extend their subject-didactic competency and contemplation skills for an integrative German class. Next to theory and practice references, students will acquire current empirical findings of the teaching and learning research in particular and apply these findings to contents of a German class in a subject-didactic contouring. For this, they acquire on the basis of current research literature the required knowledge, which they will present during the course in an appropriately way and dialogically interview about possibilities to affiliate the subject teaching. This acquisition, mediation, presentation and evaluation of contents have to be seen as extension of the self-competence considering the technical contents. Moreover, students acquire fundamental knowledge of a course associated empirical established perception and control of specific teaching and learning processes in pedagogical contexts. Students are able to deal with reading matter that associates the course as well as with educational material, textbook or competent sources, which are relevant for German class. Furthermore, students independently work out a current publication from the specialised teaching and learning research in linkage to the course object and introduce this to the seminar context in an appropriate and self chosen presentation form. In this way, they extend, next to their methodological competence, the dealing with academic texts and current research literature.

The tutorial deals with the practise of writing: How do I urge a good argument? How far does a smart wording distinguish from an awkward one? When does a sentence is not only correct, but also nice and smart? What do you need to know if the intelligibility of a text should be ensured? How does a text receives argumentative density and rhetorical subtlety? The writing will exemplarily be practised on subjects that are relevant to the discipline, for example: How a recension about a subject book is written, how is the discussion of an evening of theatre or a literary novelty is written?

Intended learning outcomes

Concerning the sub-module argumentation and formulation: Students have the ability to formulate and argue as well as the ability to structure texts; Additionally, they will acquire stylistic, argumentative and structural basic principles of important text and linguistic levels.
