

Subdivided Module Catalogue for the Subject

Psychology

as a Bachelor's with 1 major with the degree "Bachelor of Science" (180 ECTS credits)

> Examination regulations version: 2020 Responsible: Faculty of Human Sciences Responsible: Institute of Psychology

Learning Outcomes

German contents and learning outcome available but not translated yet.

Der Bachelorstudiengang Psychologie bildet den ersten Teil der psychologischen Ausbildung an der Universität Würzburg. Aufgrund der bestandenen Bachelorprüfung wird der akademische Grad eines "Bachelor of Science" ("B. Sc.") verliehen, der einen ersten berufsqualifizierenden Abschluss darstellt. Mit dem Bachelorabschluss besitzen Studierende die grundlegende Qualifikation für einfache psychologische Tätigkeiten in fachlichen Institutionen und in der Privatwirtschaft. Absolventen und Absolventinnen sind durch ihre interdisziplinäre Ausbildung vielseitig einsetzbar und haben sehr gute Berufschancen, beispielsweise

- in der Lehre an Schulen, Hochschulen und Universitäten
- in Beratungsstellen, beispielsweise im Erziehungs-, Berufsbildungs- und im klinischen Bereich
- in gesundheitspsychologischen Berufsfeldern, Prävention und Rehabilitation
- in Unternehmensberatungen und Personalabteilungen
- im öffentlichen Dienst.

Insbesondere legt der Bachelorstudiengang aber die Grundlagen für einen allgemeinen oder spezialisierten Masterstudiengang der Psychologie, der dann seinerseits den Grundstein für eine wissenschaftliche Tätigkeit, eine qualifizierte praktisch-psychologische Tätigkeit und eine mögliche weitere Ausbildung zur/zum psychologischen Psychotherapeutin/Psychotherapeuten legt. Der Bachelorstudiengang erfüllt die Vorgaben der Approbationsordnung für Psychotherapeut(inn)en, sofern das Orientierungs- und Pflichtpraktikum im Gesundheitsbereich bzw. im Bereich der Psychotherapie geleistet werden.

Im Pflichtbereich werden Studierende mit grundlegenden Inhalten und wissenschaftlichen Konzepten der verschiedenen Teilgebiete der Psychologie vertraut gemacht und erwerben fundierte methodische Kenntnisse. Dieses Wissen wird durch Anwendungsfächer und Einblicke in angrenzende Fächer wie Medizin ergänzt und erweitert. Im Wahlpflichtbereich haben Studierende die Möglichkeit, je nach ihren persönlichen Interessen zwei Fächer auszuwählen und diese weiter zu vertiefen.

Die im Studium erworbenen Kompetenzen beziehen sich auf allgemeine, methodische und inhaltliche/fachspezifische Aspekte. Nach erfolgreichem Abschluss des Studiums verfügen die Absolventinnen und Absolventen über die folgenden Kompetenzen:

- Die Absolventinnen und Absolventen besitzen forschungsmethodisches Wissen, analytisches Denken, Problemlösungskompetenz und die Fähigkeit, wissenschaftliche Erkenntnisse und Literatur kritisch zu reflektieren und einzuordnen.
- Sie können erworbene Kenntnisse schriftlich und mündlich präsentieren, sind in der Lage, wissenschaftliche Texte nach den Standards des Faches zu verfassen und eigene wissenschaftliche Projekte durchzuführen.
- In methodischer Hinsicht haben sie solide theoretische Kenntnisse der Methoden der Psychologie und fundierte Fähigkeiten im Bereich der Datenerhebung und Datenauswertung, insbesondere der Statistik.

Sie verfügen über fundierte Kenntnisse auf folgenden Teilgebieten der Psychologie:

- Methodenlehre und Diagnostik
- Physiologische und anatomische Grundlagen von Denken, Wahrnehmung, Emotion, Motivation und Verhalten,
- Geschichte der Psychologie, Allgemeine Psychologie, Entwicklungspsychologie, Sozialpsychologie, Biopsychologie, Differenzielle und Persönlichkeitspsychologie als Grundlagen des Fachs
- Klinische und Interventionspsychologie, Pädagogische Psychologie und Arbeits- und Organisationspsychologie sowie Ergonomie als Anwendungsfächer.

Wissenschaftliche Befähigung

Bachelor's with 1 major Psychology (2020)	JMU Würzburg • generated 07-Mai-2025 • exam. reg.	page 2 / 60
	data record Bachelor (180 ECTS) Psychologie - 2020	

- Die Absolventinnen und Absolventen besitzen forschungsmethodisches Wissen und die Fähigkeit, wissenschaftliche Erkenntnisse und Literatur kritisch zu reflektieren und einzuordnen.
- Die Absolventinnen und Absolventen sind in der Lage, wissenschaftliche Untersuchungen zu planen und durchzuführen.
- Die Absolventinnen und Absolventen k\u00f6nnen die erworbenen methodischen F\u00e4higkeiten einsetzen, um die Ergebnisse empirischer Untersuchungen auszuwerten und daraus Schlussfolgerungen zu ziehen.
- Die Absolventinnen und Absolventen sind mit den Regeln guter wissenschaftlicher Praxis (Umgang mit Quellen, Datenerhebung und Datenaufbereitung, Dokumentation) vertraut.
- Die Absolventinnen und Absolventen können ihr Wissen und ihre Erkenntnisse einem Fachpublikum gegenüber darstellen und vertreten.
- Die Absolventinnen und Absolventen verfügen über breites Wissen aus Grundlagenfächern der Psychologie und können dieses auf reale Probleme anwenden.
- Die Absolventinnen und Absolventen verfügen über ein breites Wissen aus den Anwendungsfächern und können dieses auf reale Probleme anwenden.
- Die Absolventinnen und Absolventen sind in der Lage, sich mithilfe von internationaler Fachliteratur in neue Aufgabengebiete einzuarbeiten und selbstständig Literatur für bislang unbekannte Fragestellungen zu recherchieren, zu interpretieren und zu bewerten.

Befähigung zur Aufnahme einer Erwerbstätigkeit

- Die Absolventinnen und Absolventen können ihr Wissen und ihre Erkenntnisse einem Fachpublikum gegenüber darstellen und vertreten.
- Die Absolventinnen und Absolventen sind in der Lage, konstruktiv und zielorientiert in einem heterogenen Team zusammenzuarbeiten, unterschiedliche und abweichende Ansichten produktiv zur Zielerreichung zu nutzen und auftretende Konflikte zu lösen (Teamfähigkeit).
- Die Absolventinnen und Absolventen können ihre erworbenen Kompetenzen in unterschiedlichen interdisziplinären Teams anwenden.
- Die Absolventinnen und Absolventen sind in der Lage, Probleme und deren Lösungen zielgruppengerecht und auch in einer Fremdsprache aufzubereiten und darzustellen.
- Die Absolventinnen und Absolventen sind befähigt, sich in neue psychologische Themengebiete und Fragestellungen durch die Recherche aktueller Forschungsergebnisse einzuarbeiten.

Persönlichkeitsentwicklung

- Die Absolventinnen und Absolventen kennen die Regeln guter wissenschaftlicher Praxis und beachten sie.
- Die Absolventinnen und Absolventen können ihr Wissen und ihre Erkenntnisse einem Fachpublikum gegenüber darstellen und vertreten.
- Die Absolventinnen und Absolventen verfügen über die Fähigkeit, sich in einem internationalen Umfeld in neue Themen einzuarbeiten und Kontakte zu schließen.

Befähigung zum gesellschaftlichen Engagement

- Die Absolventinnen und Absolventen können gesellschaftliche Diskussionen auf der Basis selbst recherchierter objektiver Daten kritisch reflektieren und bewerten.
- Die Absolventinnen und Absolventen können auf der Basis des erworbenen Wissens im gesellschaftlichen Diskurs begründet Position beziehen.
- Die Absolventinnen und Absolventen entwickeln die Bereitschaft und Fähigkeit, ihre Kompetenzen in partizipative Prozesse einzubringen und aktiv an Entscheidungen mitzuwirken.

Abbreviations used

Course types: $\mathbf{E} = \text{field trip}$, $\mathbf{K} = \text{colloquium}$, $\mathbf{O} = \text{conversatorium}$, $\mathbf{P} = \text{placement/lab course}$, $\mathbf{R} = \text{project}$, $\mathbf{S} = \text{seminar}$, $\mathbf{T} = \text{tutorial}$, $\ddot{\mathbf{U}} = \text{exercise}$, $\mathbf{V} = \text{lecture}$

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

German contents and learning outcome available but not translated yet.

Approbationskriterien:

Um den berufsrechtlichen Voraussetzungen für ein Studium zur Approbation in Psychotherapie nach § 7 und § 9 des Gesetzes über den Beruf der Psychotherapeutin und des Psychotherapeuten (PsychThG) und der Anlage 1 der Approbationsordnung für Psychotherapeutinnen und Psychotherapeuten (PsychThApprO) zu entsprechen, müssen alle hier aufgeführten Module abgeschlossen werden, sowie das Orientierungspraktikum Psychotherapie und die Berufspraktische Tätigkeit Psychotherapie 1 gewählt worden sein. Das Orientierungspraktikum Psychotherapie und die Berufspraktische Tätigkeit Psychotherapie 1 muss in interdisziplinären Einrichtungen der Gesundheitsversorgung unter Anleitung einer Person erfolgen, die über eine der folgenden Qualifikationen verfügt: Psychotherapeutin oder Psychotherapeuten mit abgeschlossener Weiterbildung, oder Psychologische Psychotherapeutin oder Psychotherapeut, oder Kinder- und Jugendlichenpsychotherapeutin oder -psychotherapeut mit entsprechender Fachkunde. Praktikumstätigkeiten, die vor dem Studium abgeleistet worden sind, können auf Antrag an den Vorsitzenden des Prüfungsausschusses als Orientierungspraktikum Psychotherapie anerkannt werden, sofern die vorgenannten Betreuungsvoraussetzungen erfüllt sind.

Anwesenheitspflicht:

Bachelor's with 1 major Psychology (2020)	JMU Würzburg • generated 07-Mai-2025 • exam. reg.	page 4 / 60
	data record Bachelor (180 ECTS) Psychologie - 2020	

Gemäß § 5 der Approbationsordnung für Psychotherapeutinnen und Psychotherapeuten (PsychTh-ApprO) besteht in den Veranstaltungen der hochschulischen Lehre gem. Anlage 1 PsychTh-ApprO, soweit dort praktische Kompetenzen erworben werden sollen, sowie in den in §§ 13 bis 15 der PsychTh-ApprO geregelten berufspraktischen Erfahrungen zwingende Anwesenheitspflicht. Um diese zu erfüllen, müssen die Studierenden in mindestens 85 % der den mit Anwesenheitspflicht gekennzeichneten Module zugeordneten Veranstaltungen anwesend sein.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

Contents

Anatomical organization and functions of different parts of the nervous system, peripheral and central nervous system, somatic (animal) and autonomous (vegetative) nervous system;

Structure and functions of nervous tissue components: neurons and glial cells;

Selected aspects of central nervous system development;

Structure and functions of meninges and the liquor system;

Blood supply of the brain;

Structure and functions of spinal and cranial nerves;

Anatomy of spinal cord, Brain stem, Cerebellum, Diencephalon, Telencephalon (particularly Cortex cerebri);

Selected aspects of functional anatomy of the different brain regions and their connections, relevance for sensory and motor systems and for cognitive and affective functions;

Functional-neuroanatomical aspects of selected internal and neurological diseases and psychic disorders and their symptoms;

Foundations of somatic differential diagnostics; Genetics and behavioral genetics

Intended learning outcomes

Students acquire basic neuroanatomical knowledge which provides the background for an understanding of functions and dysfunctions of the nervous system in the context of psychic phenomena.

Courses (type, number of weekly contact hours, language — if other than German)

V (2)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)

Written examination (approx. 60 minutes) or oral examination (approx. 15 minutes) Language of assessment: German and/or English

Allocation of places

Only as part of pool of general transferable skills (ASQ): max. 5 places.

There are no restrictions with regard to available places for students of the degree subjects Psychology (Bachelor of Science, 180 ECTS credits).

The number specified is the total number of places that will be allocated to students of other degree subjects in the SFB (list of modules) of which this module is listed.

Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.

The purpose of the module is to deepen a topic area of psychology. The specific topic within psychology can vary to enable students to set independent priorities and to enable the integration of psychology courses from stays abroad.

Intended learning outcomes

The students deepen their knowledge in a subject area of psychology. They learn to orient themselves in psychology thematically, and to identify an individual focus of interests and learning objectives, as well as to put the acquired knowledge in relation to the contents of the compulsory curriculum.

Conter	nts		•		

The module addresses the social-psychological foundation of human behavior and its relevance for social interaction and cooperation. In addition, based on current research findings from the scientific literature, decision making at work is discussed with potential applications in career counseling (e.g. choosing an occupation or company to work for) or consumer behavior in practice. Insights are given into and examples of career counse-

ling approaches are practiced. Intended learning outcomes

Students reach deepened theoretical and methodological competencies in relation to decision-making and social interaction. Also, the ability to read and understand scientific publications, to evaluate the methods and results, and to infer and communicate implications for applied problems. This knowledge and skills can be used and applied in the run of the later study program, in particular with regard to the Bachelor thesis and in a follow-up Master program. Given the cross- and interdisciplinary character of the module, the skill to integrate different theoretical perspectives will be enhanced. In addition, students gain central skills for their later occupation, in terms of preparing them for a potential academic career or that can be used in practice after finishing the Bachelor, e.g., with regard to career counseling or coaching for decision-making at work.

Courses (type, number of weekly contact hours, language — if other than German)

Conten	Contents				

The module deals with selected, changing contents in the field of education, development and lifelong learning. Main topics are, among others, cognitive and social development, developmental disorders, the instructional design of learning environments and psychological aspects of media use.

Intended learning outcomes

The students acquire profound theoretical competences as well as extensive methodical competencies in the field of cognitive and social development and learning processes. The in-depth specialist knowledge can be applied in the course of further studies, especially in the context of the Bachelor's thesis and the Master's program. In addition, students acquire professional skills that can be of use already after graduation (BSc.) in work life, for example in the context of advisory and counseling activities in health and education.

The remaining places, if and when any become available, will be allocated to applicants who have achieved the required number of ECTS credits already. Within these groups, places will be allocated according to the following quotas:

b) Quota 1 (80% of places): average grade (weighted according to ECTS credits) achieved in the modules listed under 'Only after successful completion of' in the module description of the respective module; among applicants with the same average grade, places will be allocated by lot. c) Quota 2 (20% of places): number of subject semesters of the respective applicant; among applicants with the same number of subject semesters, places will be allocated by lot.

Conten	ts					
The aim of this module is to teach the foundations of biopsychology as well as cognitive and affective neuroscience. It is concerned with the influence of psychological aspects on biological processes and the neural representation of sensory, motoric and higher order cognitive and affective functions. In the first part of the lecture, the foundations of neurobiology will be discussed as well as the spectrum of non-invasive methods that is available for biopsychological research. The focus will be on methods that are used in human research (e.g., EEG, neuroimaging, peripheral physiology) and illustrative examples for these methods will be provided. The second part of the lecture is concerned with the biological foundations of important psychological functions (biological rhythms and sleep, learning and memory, attention, emotion and motivation, social behavior, executive functions, language). Intended learning outcomes No information on intended learning outcomes available. Courses (type, number of weekly contact hours, language — if other than German) V (2) + V (2)

Conten	Contents				

The aim of this module is to deepen the knowledge in biopsychology and cognitive and affective neuroscience by focusing on the findings and research methods of specific areas within the field. Potential topics include perception and attention, consciousness, learning and memory, emotion and motivation, social behavior and brain lateralization. In addition to focusing on non-invasive research methods such as EEG, peripheral physiology or neuroimaging, this module will also introduce invasive pharmacological methods and neurostimulation as well as genetic approaches.

Intended learning outcomes

No information on intended learning outcomes available.

Students acquire additional knowledge and competences for computer based data analysis, using specialized software (statistical software, graphics packages).

Intended learning outcomes

Competences and abilities acquired in this module are important for analysis of empirical data and can be applied for an empirical Bachelor thesis or in further studies, especially in the Master programme, but also after graduation (B.Sc.) in work life.

Psychological diagnostics is understood as a practice-related professional testing, measuring, acting and decision-making that is based on strict methodological criteria. The main focus is on classical test theory and probabilistic test theory, test construction, item characteristics and quality criteria. In addition, the diagnostic methods, procedures and approaches for capturing individual differences through observation, questioning, tests, questionnaires and their presentation in findings reports and assessments as well as classification systems their characteristics, classification errors and sources of error, the indication and the diagnostic process are presented. In addition, an introduction to the technical mastery of selected psychodiagnostic procedures is given and the approaches to scientifically guided professional action and decision-making in the lecture are treated and practically tested in exercises.

Intended learning outcomes

Knowledge of classical and probabilistic approaches to test and questionnaire design as well as terms and methods for evaluating tests and questionnaires. Practice in the planning and development of tests, item analyzes, factor analyzes, quality criteria. Introduction to standardized survey methods for differential psychology, personality research and psychological diagnostics.

Conten	ıts				

Core contents are knowledge of mental and psychopathological findings taking into account differential diagnostic aspects, the language and interaction in the diagnostic process, in particular interview methods, as well as diagnostic methods and procedures including observation methods, indications and diagnostic process in people of all ages. Against the background of various fields of application, the module deepens central topics of diagnostic psychology. The students get to know different diagnostic procedures, focusing in particular on the aspect of multimodal diagnostics in the sense of complementary benefits of different test types. In addition, the module includes topics such as the compilation of a test battery, aggregation and weighting of individual methods, statistical vs. clinical judgment, questionnaires, interviewing, judgment and diagnostic framework. In doing so, scientific standards are compared with practical requirements. Further topics include the interpretation of the results of psychological testing, feedback to the subjects, decision-making, derivation of intervention measures, evaluation and information processing in the diagnostic process. An essential aspect of the module is also the teaching of practical skills in the performance of diagnostic tools (such as conducting a performance test, conducting a diagnostic interview, observing behavior, etc.) practiced in practical units.

Intended learning outcomes

Competencies in the collection and presentation of psychodiagnostic findings on individuals on the basis of observation, interview, questioning, tests, questionnaires.

Conten	Contents				

The course provides basic knowledge about the theories of Differential Psychology and Personality Psychology and about the approaches to the empirical exploration of individual differences in characteristics of thinking, feeling and behavior. Skills (such as intelligence and creativity) are one focus and temperamental characteristics on the other focus (e.g., big five, extraversion, anxiety, impulsivity). The lecture gives an introduction to the subject area, the theories and the methods. In the seminar selected, changing subject areas are extended and deepened.

Intended learning outcomes

Students acquire specialist knowledge of central subject areas, theories and methods. In the seminar they acquire and practice skills in the preparation of topics for an oral presentation.

This lecture provides an overview of the history of psychology, including the development of psychotherapy and other applications. Students gain insights into the historical and scientific-historical contexts of the emergence and development of various basic areas and fields of application of psychology.

Intended learning outcomes

The module serves as an introduction to the scientific and social contexts of the emergence and development of psychology and thus the acquisition of the central professional competence to reflect on the situation of the subject and the profession of psychology within the wider scientific landscape and society as a whole. In addition, central theoretical and methodological approaches of psychological research and practice are learned to assess their historical dependencies. These competences are designed to be transferred and applied to other basic and applied subjects in the BSc.Part module: Abbreviation: o6-PSY-EiG-1 Version: 2009-WS Title: Introduction to the History of Psychology. Degree of obligation: obligatory SWS: 2 ECTS-Points: 3

Courses (type, number of weekly contact hours, language — if other than German)

V (2)

Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)

written examination (approx. 60 minutes)

Language of assessment: German and/or English

Allocation of places

Only as part of pool of general key skills (ASQ): maximum 10 places.

There are no restrictions with regard to available places for students of the degree subjects Psychology (Bachelor of Science, 180 ECTS credits).

The number specified is the total number of places that will be allocated to students of other degree subjects in the SFB (list of modules) of which this module is listed.

Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.

Contents

The module deals with fundamental theories and phenomena of age-related changes and consistencies regarding behavior, experiences, learning and performance across the life span. Furthermore, students get to know the essential research methods and empirical findings of the field.

The lecture introduces the subject area and outlines theories and methods. During the seminars, a variety of topics, all relevant to the exam, are dealt with in-depth, for instance by discussing and reflecting topics and their relevance in the professional context in small-group settings.

Intended learning outcomes

Student acquire specialist knowledge about pivotal subject areas, theories and methods of the field of Developmental Psychology. They will acquire the necessary knowledge and skills to consider findings from research and relevant theories when dealing with applied psychological problems as well in the context of their own actions. Furthermore, students acquire skills relevant for giving (scientific) oral presentations and writing scientific reports.

Allocation of places

2 places.

There are no restrictions with regard to available places for students of the degree subjects Psychology (Bachelor of Science, 180 ECTS credits). The number specified is the total number of places that will be allocated to students of other degree subjects in the SFB (list of modules) of which this module is listed. Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.

Contents					

The module deals with elaborated findings and theories of the field of Developmental Psychology. Selected, changing topics are discussed in-depth, based on specialized literature and/or current research reports. For example, topics included are early childhood, development in the context of the family, practice-oriented aspects of language development, development disorders, or development during adolescence. These topics and their relevance for the professional context will be discussed and reflected critically in individual and small-group settings.

Intended learning outcomes

The module enables students to understand complex problems and research questions in the field of Developmental Psychology. Students further develop their skill to read and evaluate theories, methods and results described in scientific literature. Moreover, they acquire competencies to transfer the findings of basic research to applied problems.

Conten	Contents					

The module provides an overview of the cognitive structures and mechanisms which enable goal oriented behaviour and its adaptation to changing environments. Among them are executive function which cope with behavioural conflicts and multitasking demands. Moreover, current topics on behavioural control are critically elaborated with the aim to develop new research questions.

Intended learning outcomes

The students acquire profound knowledge and methodical expertise in the field of cognitive control. This knowledge is supposed to prepare students for a BSc thesis and later MSc studies. By means of the research-oriented character of this module, students gain competence to critically and constructively evaluate research. These competences prepare for a later scientific career.

Allocation of places

max. 30 places.

Should the number of applications exceed the number of available places, places will be allocated as follows:
a) Applicants who have not yet achieved the required ECTS credits in the area of mandatory electives will be given preferential consideration. The remaining places, if and when any become available, will be allocated to applicants who have achieved the required number of ECTS credits already. Within these groups, places will be allocated according to the following quotas:

b) Quota 1 (80% of places): average grade (weighted according to ECTS credits) achieved in the modules listed under 'Only after successful completion of' in the module description of the respective module; among applicants with the same average grade, places will be allocated by lot. c) Quota 2 (20% of places): number of subject semesters of the respective applicant; among applicants with the same number of subject semesters, places will be allocated by lot.

The seminars teach characteristics, goals, duties, indications and methods related to prevention and rehabilitation. One seminar focusses on theoretical, scientific and health aspects of prevention and rehabilitation related to general and specific concepts of psychopathology in children, adolescents, adults including older ages. Another seminar is more applied by discussion specific prevention and rehabilitation programs for different age groups. Examples are: prevention of psychological disorders after trauma or somatic disease; prevention of alcohol and drug abuse in children and adolescents as well as older populations; rehabilitation after somatic diseases and drug addiction in elder patients; neuropsychological rehabilitation; prevention and rehabilitation in behavior medicine.

Intended learning outcomes

The students will learn basic and applied competence in the area of prevention and rehabilitation differentiated for different age groups. They will be able to evaluate the scientific quality of prevention and rehabilitation programs. Practical competence in conduction prevention and rehabilitation programs will be acquired by means of tutorials. These goals can only be achieved by regular attendance, active participation and active lecture work.

This module conveys basic knowledge about the phenomena, theories and methods of Cognitive Psychology including Cognitive Neuroscience. Students become acquainted with the principles of cognitive processes such as perception and attention, learning, memory, language and their respective neural underpinnings.

Intended learning outcomes

Students will learn to know fundamental explanatory principles of Cognitive Psychology. They will become familiar with basic research methods in the field, and can critically evaluate scientific literature. Moreover, they can assign relevant models and findings of cognitive psychology to applied settings such as psychotherapy or man-machine interaction. They become familiar with experimental research methods which sets the stage for own experimental research.

Allocation of places

2 places.

There are no restrictions with regard to available places for students of the degree subjects Psychology (Bachelor of Science, 180 ECTS credits). The number specified is the total number of places that will be allocated to students of other degree subjects in the SFB (list of modules) of which this module is listed.

Should the number of applications exceed the number of available places, places will be allocated according to the number of subject semesters. Among applicants with the same number of subject semesters, places will be allocated by lot. A waiting list will be maintained and places re-allocated by lot as they become available.

Contents

The module conveys elaborated knowledge of Cognitive Psychology. Selected topics are expanded by means of special textbooks and current research literature.

Intended learning outcomes

The module enables students to understand complex problems and current research questions in Cognitive Psychology. They acquire the knowledge to summarize such problems and to communicate them in scientific exchange.

Duration Module level Oth		Other prerequisites				
1 semester undergraduate						
Conter	Contents					

The module presents basic knowledge of central psychological theories and research findings in the field of motivation, volition, and emotion. Aim is the analysis, prediction and explanation of motivational and emotional influences on behavior, goal-oriented actions, and decisions. The module covers historical theories (drive theory, field theory), modern expectancy-value approaches, theories of basal motives, goals and self-concept, self-regulation and goal pursuit (volition). From emotion psychology, evolutionary, cognitive and constructivist theories and central findings will be discussed. In the associated seminars, we will discuss selected topics and applications of motivation and emotion psychology.

Intended learning outcomes

Students acquire professional and practical skills that can be used in further studies as well as at work. They learn basic theories and methods of emotion and motivation psychology, and how to use these concepts and skills for the enhancement of motivation and well-being in applied settings (e.g., work, education, psychotherapy).

The module provides basic knowledge about central theoretical assumptions and research findings on Educatio-							

The module provides basic knowledge about central theoretical assumptions and research findings on Educational Psychology. In conjunction with the in-depth seminar, the lecture provides an overview of the main subject areas, methods and results of educational and instructional psychology. In addition, the module covers basic questions of education and education as well as influences of the learner's living environment, life situation, milieu and culture on pedagogical and educational processes.

Intended learning outcomes

Students acquire skills and practical skills that are useful in their further studies and practical work. They are taught basic methodological approaches in the field of educational psychology and are offered a representative overview of core areas of the subject, as for example the preconditions and mechanism of academic success, characteristics of teaching excellence, setting up effective instruction, self-regulated learning, the role of media in teaching and effects of interindividual differences. The knowledge and skills acquired in this module will prepare students for the main areas of education of the MSc Psychology program. Competencies in the field of educational psychology acquired in the first degree can be used in many ways in professional life, for example for psychological counseling activities in the fields of education and (continuing) education or learning therapy. The module also teaches competences that are relevant for a later professional activity as a psychotherapist.

Under the supervision of a psychologist with a diploma or master's degree, the job-oriented internships provide insights into the professional activity of psychologists in psychology-related institutions, e.g. in the health sector, in education, the private sector, or research. Students apply and deepen the knowledge acquired during their studies in a practical context.

Intended learning outcomes

The students learn to apply theoretical and practical aspects of their studies to new tasks in their internships. They make their first contacts with the professional world and thus create a basis for their future career choice and for the orientation of the Master's program.

Contents

This module provides basic knowledge about research methods, theories, and results on psychological processes underlying social interaction. The lecture covers fundamental research in social psychology as well as applied aspects. Central topics are person perception, stereotypes and prejudice, social influence, the self in a social context, attraction, close relationships, group interaction, as well as conflict and cooperation. The seminar will provide deeper insights into the topics of the lecture, their experimental and theoretical underpinnings as well as their implications for application.

Intended learning outcomes

Students know basic research methods, theories and results of social psychology. They will know about the relevance of this knowledge for understanding and solving applied problems (e.g., in organisational psychology or clinical psychology). Students will also acquire abilities to evaluate and compare the quality of scientific results, methods, and theories.

The module gives an introduction to univariate and bivariate descriptive statistics and probability theory (descriptive statistics, graphic representations of data, probability theory, Bayes, distributions, binomial test, linear, nonlinear and multiple regression, correlation) as well as statistical methods of evaluation research. The application of computer-based data collection and -analysis is trained in exercises and explicitly tested in the exam.

Intended learning outcomes

Students know different procedures of descriptive statistics and foundations of probability theory. They are able to select adequate statistical procedures for different empirical questions, compute these procedures correctly, display results according to scientific standards and interpret results correctly.

The module provides advanced knowledge of inferential statistics (sampling, estimation principles, confidence intervals, theory of Null hypothesis testing, parametric and nonparametric methods for univariate and bivariate data sets, tests of equivalence, contingency table analysis, analysis of variance). After the principles of statistical data analysis are discussed, computational procedures using computer-based data analysis are trained with examples and tested in the final exam.

Intended learning outcomes

Students possess knowledge of various inferential procedures and their foundations as well as the ability to select adequate statistical methods for testing empirical questions e.g. from evaluation research, perform these correctly, display the results reasonably and interpret them correctly.
