## Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

## Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

## In accordance with

the general regulations governing the degree subject described in this module catalogue:

**ASPO2009, ASPO2015**

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

**26-Jul-2018 (2018-53) Information on all modules offered as part of the pool of general transferable skills (ASQ-Pool) in the winter term 2018/2019 and (as soon as available) the summer term 2019 is listed below. The list is divided into two sections without being further subdivided. This listing is valid for ASPO2009 and ASPO2015 as well.**

**26-Jul-2018 (2018-54)**

**27-Mar-2019 (2019-17)**

**27-Mar-2019 (2019-18)**

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-spe-

cific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

**This module catalogue provides information on the modules offered as part of the pool of general transferable skills (ASQ Pool) for students pursuing a Bachelor's degree at Julius-Maximilians-Universität Würzburg.**

It is divided into two sections listing the modules offered as part of the University's ASQ Pool in the winter semester and the subsequent summer semester without being further subdivided.

The exercise will comprise a total of three workshops: The workshop "Der Schreibprozess: Wissenschaftliches Schreiben organisieren und planen" ("The Writing Process: How to Organise and Plan Your Academic Writing") will kick off the course. In addition, students must attend two other workshops of their choice over the course of the semester. Alternatively, instead of the three workshops one intensive workshop about the writing process or a term paper or a writing group can be selected.

<p>Akkadian, a member of the Semitic family of languages, was the most widespread language of the ancient Near East. Thus, the student must begin learning the language from the start of the programme. The module gives an introduction to reading Akkadian texts, with special emphasis on the Old Babylonian dialect. Sections of the Code of Hammurabi in Neo-Assyrian cuneiform as well as other selected Old Babylonian texts (documents, letters, omens) will be read in class. By means of these text examples, the student will become familiar with the cuneiform signs as well as with Old Babylonian cursive. On the basis of the texts, the student will also develop a knowledge of Old Babylonian history, especially the history of society and of law.</p>		
Intended learning outcomes		
<p>The student will acquire detailed knowledge of the structure of Akkadian and will be able to use this knowledge to independently read Akkadian texts. He/she will be able to transliterate, transcribe and translate texts from the Code of Hammurabi and other selected Old Babylonian texts and to give a grammatical analysis of these. In addition to the Neo-Assyrian form of cuneiform, the student will know the elementary signs of the Old Babylonian cursive and monumental script. He/she will be familiar with Old Babylonian history and, in particular, the history of society and law.</p>

<p>The module gives an overview of the cultural history of Western Asia from the Early Bronze age to the Neo-Babylonian period based primarily on written sources. Lecture course 1: The lecture gives an overview of the emergence, development and structure of cuneiform as well as of other selected ancient Near Eastern writing systems. The geographical distribution, cultural significance, relationships and fundamental structural phenomena of numerous languages of the ancient Near East will be presented. In addition, a systematic genre-oriented survey of the written remains of the ancient Near East will be given, with an emphasis on the history of ancient Near Eastern literature. Lecture course 2: The lecture gives an overview of the history of ancient Western Asia from the beginnings of "civilisation" in Southern Mesopotamia in the middle of the 4th millennium BC to the end of the Neo-Babylonian empire in 539 BC. The emphasis lies upon Mesopotamia, but Southwest Iran, Syria and Anatolia will also be taken into account. Special attention will be paid to the critical analysis of sources. The lecture combines brief survey accounts with a detailed discussion of individual examples.</p>		
<b>Intended learning outcomes</b>		
<p>The student will acquire an overview knowledge of ancient Near Eastern history and will be able to discuss historical developments and their attestation in written sources critically and in detail on the basis of selected examples. He/she will be familiar with the emergence, development and structure of cuneiform as well as of other selected ancient Near Eastern writing systems. He/she will acquire an overview knowledge of the text corpora of the ancient Near East and of their typical genres.</p>

<p>The module gives an overview of the cultural history of Western Asia from the Epipalaeolithic period to the Islamic conquest based on archaeological sources. Lecture course 1: The lecture gives an overview of ancient Near Eastern cultural history from the Paleolithic to the end of the Early Bronze Age. The different types of historic monuments and especially the different ceramic styles will be presented in their geographic environment and specific context of discovery and will be diachronically traced. The most important finds and results of important ancient Near Eastern sites will be discussed. In addition, the lecture introduces students to archaeological methods and tools for dating, analysis and systematisation of finds and explains archaeological technical terminology. Lecture course 2: The lecture gives an overview of ancient Near Eastern cultural history from the beginning of the Middle Bronze Age (early second millennium B.C.) to the rise of Islam with an emphasis on the two last pre-Christian millennia. The different types of historic monuments will be presented in their geographic environment and specific context of discovery and will be diachronically traced. The most important finds and results of important and thoroughly excavated ancient Near Eastern cities will be discussed. The description of connections between archaeological finds and historical episodes will be particularly emphasised.</p>		
Intended learning outcomes		
<p>The student will acquire an overview of the basic lines of ancient Near Eastern cultural history. He/she will be familiar with the predominant types of historic monuments and most important find places and will be able to discuss diachronic developments. He/she will develop a knowledge of archaeological methods and fundamental technical terminology.</p>

The class gives an introduction to the historical geography of the Middle East. Essential information will be provided concerning the geography and environment of the various regions of Western Asia, the topography of certain regions in selected historical periods as well as the elements of ancient Near Eastern and modern toponymy. Special emphasis will be given to the "correct" transliteration and pronunciation of ancient and modern place and regional names of the Middle East; varying conventions and their backgrounds will be presented.		
Intended learning outcomes		
The student will acquire a good knowledge of the historical geography of the Middle East as well as of the typical environmental conditions in the regions of Western Asia. He/she will be familiar with the various conventions for transliterating ancient and modern geographical names of the various regions of the Middle East and will be familiar enough with the phonemic inventory of Arabic, Turkish and Persian to be able to correctly pronounce modern place names.

The course provides students of all semesters with the ability to create literary texts in the English and German language autonomously. Dialogically structured and thematically instructed sessions provide the possibility to discuss and improve own texts and to be able to gain theoretical as well as practical insights into the everyday workshop of creative writing. Under methodological supervision, writing exercises will facilitate a performative access to linguistic expression and will motivate students to form their own aesthetic idiom.		
Intended learning outcomes		
Students acquire basic knowledge of aesthetic construction regarding literary texts (poetry, prose, drama) as well as basics concerning the significance of a reading-orientated practice of literary writing. The self-confidence concerning their own skills of writing structured texts will be increased.

The module consists of a lecture on the contemporary history of the People's Republic of China (PRC) and a seminar on Chinese regional studies. The lecture introduces students to the first 40 years of the PRC (1949 to 1989). The regional studies seminar provides knowledge on physical-geographical basics, administrative structures of the PRC, population, regional disparities, social welfare and cultural mechanisms. The module is a compulsory module aimed at first-year students in the first semester.		
Intended learning outcomes		
Students have a solid knowledge of the political history of the People's Republic of China until 1989 as well as of regional, geographical and ecological facts and fundamental social developments. They are able to classify further topics on contemporary China in this basic structure.

<p>In two courses within one year, the module offers an overview of the history of China from the Neolithic cultures to the end of the Republican period. In addition to a chronological introduction to the factual history, there is a thematic deepening in the following areas of epoch-typical relevance, such as tensions between centre and periphery, state unity and regional fragmentation, aristocracy and bureaucracy, self-image and world view, relation between city and country, philosophical and religious movements, evidence of material culture, economic reforms or international relations. An introduction to the state of historiographical discussion of the most important epochs and areas of Chinese history is given.</p>		
Intended learning outcomes		
<p>Students are able to independently classify events in Chinese history chronologically and thematically. They are able to analyse historical phenomena comparatively and critically and to establish references to current China from a historical perspective. They have the basic knowledge of independent and in-depth familiarisation with further historical questions.</p>

1 semester	undergraduate	Required level of language proficiency: B2 CEFR (To be considered to have achieved the required level of language proficiency according to the CEFR (Common European Framework of Reference for Languages), students must have successfully completed module o4-Sp-BM-SP1 or must be able to produce another relevant certificate.)
Contents		
Students acquire detailed knowledge of concepts and methods from one of the following sub-areas of linguistics: phonology, morphology, syntax, semantics/lexicology, text linguistics, historical linguistics, variational linguistics or pragmatism. Application of concepts and methods from the selected sub-areas of the Spanish. Coherences between the Spanish and further Romance Languages.		
Intended learning outcomes		
Students acquire detailed knowledge of a central sub-area of linguistics. They are able to apply concepts and methods of this sub-area to the description of the Spanish and are able to balance between different linguistic descriptions of a given verbal phenomenon. They are also able to summarise analogously, to classify academically and historically and to critically reflect selected academic literature regarding Spanish linguistics independently.

Based on an overarching choice of issues, the course furnishes a synoptic overview of German literature respectively the cultural experiences that Germans and foreigners gain as they interact with each other. Developments in literary history, the history of language and the ensuing cultural progress respectively the literary-artistic results of these encounters are pointed out in essence to impart important knowledge about the formation, the forms of expression and the current use of the German language or the literary implementation of German self-understanding and the acceptance of the foreign in Germany.		
Intended learning outcomes		
Students gain an overview of the key developments in German law and thereby deepen their basic knowledge of one or more chronological or thematic areas under the consideration of various important aspects. They are able to integrate this area/these areas in an overall context and to identify interdependencies. They expand their frame of reference to European and non-European aspects. They are able to choose suitable tools and methods and to deploy them appropriately. The students are able to critically analyse and interpret sources and specialised literature as well as to present their evaluations in an appropriate manner.

Contents		
Media psychology deals with human experiences and behaviour while interacting with media. Media psychology develops theories and tests these in empirical studies. This introductory module aims to equip students with fundamental knowledge about the subject of media psychology (e. g. traditional media and mass media) as well as its theories, findings, and methods.		
Intended learning outcomes		
Students should be familiar with central concepts and methods of media psychology. They should have a basic knowledge of the subject-specific questions and should understand the relevance and importance of a psychological perspective as well as the relevance of questions in the field of the social sciences. Thus, a basis is provided for academic work as well as for acquiring practically relevant (vocationally oriented) media skills.

In this module, the students acquire basic knowledge of the central psychological theories and findings of the research fields of motivation and emotion. The lecture comprises the subject areas, theories, methods, application and practice of Psychology of Motivation and Psychology of Emotion. The seminar elaborates on selected, alternating subject areas (e.g. emotion regulation, impulsivity, aggression).		
<b>Intended learning outcomes</b>		
The students acquire professional and practical skills, which are useful for the further course of studies and for their future occupation. The students acquire profound professional knowledge of central subject areas, theories and methods of Psychology of Emotion and Motivation, while also learning to transfer this basic knowledge to application subjects, especially the one's of the Master's degree programme. Furthermore, the students already acquire theoretical, empirical and application-oriented competencies, which can be useful in professional life (e.g. organising work processes in a motivating manner), after finishing the first university degree programme (BSc.).

In this module, the students acquire basic knowledge of theories on personality and approaches to the investigation of individual differences in thinking, feeling and behaviour. The lecture provides an introduction to this subject area and explains the theories and methods. The seminars elaborate on various important examination contents.		
Intended learning outcomes		
The students acquire professional knowledge of central subject areas, theories and models. In the seminar, they learn and practice the processing of topics for oral or written presentations.

In this module, the students acquire basic knowledge of thinking, feeling and behaviour in a social context. They become acquainted with different subject areas, theories and methods of Social Psychology and with applied questions, e.g. regarding persuasion or prejudices. They discuss empirical findings and interrelate these with theories and everyday phenomena.		
Intended learning outcomes		
The students acquire professional skills and social competencies, which can be useful in everyday situations (e.g. for solving social conflicts and central problems of social influenceability). Additionally, the students become acquainted with the logics of empirical research and its validity for everyday phenomena and are therefore enabled to differentiate between causation and correlation.

This module will provide students with an overview of the interactions of plants and animals with their abiotic and biotic environments. The module will focus on the functional adaptation to environmental conditions as well as on the structure and dynamics of populations, communities and ecosystems. Students will be introduced to fundamental model concepts of ecology, will become familiar with examples of research findings and will acquire the fundamental knowledge necessary to develop an understanding of current ecological problems.		
Intended learning outcomes		
Students are familiar with the fundamental principles of research in the field of ecology and with the most important abiotic and biotic factors that influence the distribution and frequency of occurrence of organisms in their environment. In addition, they understand the scientific relevance ecology has to the assessment of environmental issues.

Seminars and workshops covering essential lab techniques. Participants are arranged into small groups and instructed by peer tutors who have practical work experience as pharmaceutical, medical or biological lab technicians and share their expertise. Topics covered include: lab protocols, recording data and results in lab notebooks, dilution series: various buffers and solutions, calculation of molarity, preparation of small amounts of different solutions and buffers, pH values, titration, pipetting precisely, measuring, weighing, common mistakes, essential lab techniques, problem solving tools, material storage, lab safety and good practice.		
Intended learning outcomes		
Students are able to perform essential lab techniques independently, they have learned how to avoid common mistakes and have acquired problem solving skills. They can prepare standard solutions and buffers independently and can reliably calculate various dilution series as well as molarity. Students are able to record results and protocols in a lab notebook. They have been trained in safe laboratory practices.

Series of workshops on a variety of topics in the area of transferable skills: What does it take to succeed at university? What skills (both subject-specific and transferable) do you need to be successful in a STEM career once you have completed your BSc/MSc degree: ability to define and achieve goals (good self and time management); How do you develop a research question/hypothesis, how do you structure a coherent analysis? How do you integrate your own findings into a bigger picture? Concrete transferable skills that will help you launch a successful career: a team player with leadership skills needs assertiveness, negotiation and conflict management skills and the ability to structure workflows. The importance of writing/English writing skills in science: an English writing lab will provide you with an opportunity to enhance your writing skills. Most of the workshops will be taught by Ms Rapp-Galmiche and qualified student tutors, but we might also invite external experts to deliver talks.		
Intended learning outcomes		
Students have acquired skills that will help them succeed at university and decide what career to pursue: They are able to define goals, know what interdisciplinary skills they need for a successful career in the biosciences and are familiar with techniques that will help them develop these skills. Students are able to describe projects, research findings and scientific issues in English in a clear and convincing style.

This module (lecture and seminar) will provide students with an overview of instrument-based methods in biotechnology and biomedicine and the underlying physical principles. It will discuss modern methods for the analysis of biological matter on the molecular and cellular level. These methods include light microscopy, fluorescence spectroscopy, electron microscopy, atomic force microscopy, flow cytometry and microfluidics.			
Intended learning outcomes			
Students will gain an overview of key methods in biotechnology and their respective advantages and disadvantages. They will learn to decide what method is most suitable for addressing a particular issue.

Seminar and workshops covering common mistakes in scientific papers and common writing mistakes in English. Upon request, students will also be given the opportunity to enhance their presentation skills in English. Workshops and seminars will be taught by trained tutors. External lecturers may be invited to speak on specific topics.		
Intended learning outcomes		
Scientific writing skills in English. Students are able to communicate project descriptions as well as lab results and hypotheses effectively and convincingly in English. Students can create an outline and are aware of common ESL (English as a second language) mistakes. Students have learned how to handle general writing problems, such as writer's block.

This module provides students with an overview of the fundamental principles of organic chemistry. It examines the bonding situation of carbon and introduces students to the nomenclature of simple and moderately complex organic compounds. The module also discusses the fundamental principles of stereochemistry, substitution, addition and elimination reactions as well as synthesis planning.		
<b>Intended learning outcomes</b>		
Students know important categories of substances in organic chemistry. They are able to use different systems of nomenclature to determine simple substance names. Students are able to analyse the stereochemistry of molecules. They are able to describe and formulate some of the most important reactions in organic chemistry. For that purpose, they can analyse and categorise the characteristic reaction conditions and can use them for simple syntheses.

<p>The course will focus on three main areas:</p> <p>1. Introduction: What characterises sport? We will focus on its importance for society and the economy. What is sports management? In this context, we will also discuss sports business administration and the professionalisation of sports managements.</p> <p>2. Integrated sports management: Who are the stakeholders in sport and what are their interests? What characterises integrated sports management and where is it already being used? Practical examples and case studies will illustrate the applicability of the concept.</p> <p>3. OR in sport: How can OR-methods be used to prepare and improve management decisions (OR stands for operations research and is a collective term for specific mathematical procedures)? In this context, we will work on case studies from areas including sport and health, sporting goods production and stadium construction.</p>			
Intended learning outcomes			
<p>The students</p> <p>(i) learn what distinguishes systematic sport management;</p> <p>(ii) know how to appreciate the big public interest appropriately, which makes a distinct challenge to manage services and events in the sports sector;</p> <p>(iii) apply methods from the area of the mathematically based operations research and</p> <p>(iv) can interpret practically oriented case studies and examples from the sports world.</p>

The course provides a basic understanding of the driving forces behind business cycles and growth processes and discusses approaches for a sensible economic policy. After a brief introduction to national accounts, the short and medium-term effects of fiscal and monetary policies on goods and money markets in closed as well as open economies are discussed. In this context, the volatility of macroeconomic variables such as GDP, interest rates, inflation and unemployment are analysed in the economic cycle. In addition, the determinants of long-term economic growth and causes of international differences in living standards are examined. Here, the course will focus on recent developments such as monetary and fiscal policy in the euro area.		
Intended learning outcomes		
Analytical understanding of basic macroeconomic models. Insights into the impact of economic policy measures and the ability to produce independent, well-founded analyses of macroeconomic issues.

<p>From an economic point of view, the lecture will acquaint students with how consumers and companies make decisions (consumption, labour demand, production decision). Starting with a brief introduction to the theory of preferences, the course will discuss the optimal consumption decision of private households and derive the resulting demand for goods. Following a vivid introduction to the theory of production, the supply of goods of companies will be determined. The equilibrium defined by the two optimisation processes will be analysed with regard to its efficiency characteristics. The course will discuss the effects of market imperfections on the decentralised equilibrium and will provide students with a brief insight into game theory and the theory of insurance markets. In addition, topics such decisions under risk and risky asset markets will be discussed.</p>		
<b>Intended learning outcomes</b>		
<p>Students are enabled to make up their mind on economic policy measures, like government interventions due to monopoly power or tax measures. Basic solution concepts are introduced for a vast array of microeconomic problems at a basic level. Accordingly students are able to understand and analyze relevant problems.</p>

<p>The course offers basic insights into the principles of economics. We analyse how markets work, i. e. how consumers form their demand and how suppliers make production decisions. On the basis of first insights into market economies, we analyse why governments might want to intervene. In this context, we focus on monopoly, environmental issues and minimum wages in labour markets.</p> <p>In addition to micro topics, we also focus on macroeconomic aspects and analyse why we observe business cycles (unemployment, inflation) and long term economic growth. We also address topics related to monetary and fiscal policy in the euro area.</p>		
Intended learning outcomes		
<p>The students have a basic knowledge of economics, with which they can analyze complex economic relationships. They can deal critically with current economic policy issues and make an independent judgment. In addition, elementary mathematical techniques for solving micropores and macroeconomic models are mediated.</p>

In this module, the students practice and apply the key steps of systemic planning of application procedures and entry into professional life. The core topics are: Potential analysis. Methods of searching for suitable jobs, analysis of job descriptions, application letter and curriculum vitae, personnel selection procedures, job fairs and career portals, job interview, rhetoric and presentation. The module especially focuses on planning the future after the Bachelor's degree programme (graduate studies, work placements, entry into professional life or alternatives).		
Intended learning outcomes		
The students are able to gain, evaluate and use relevant information for the next steps of their career planning. They know different possibilities for improving their personal profile and for entering into professional life. They are familiar with job profiles and descriptions and are able to create comprehensive application documents for different recipients and to orally present their personal goals.

<p>The module addresses the various opportunities of humanities students for entry into professional life. In this context, it provides the students with information on the whole range of possible occupational fields for humanities scholars. The students conduct an analysis of their strengths and weaknesses in order to identify their personal key competencies or lack thereof. Afterwards, they create a professional application portfolio to familiarise themselves with the guidelines of writing a curriculum vitae, an application letter and an unsolicited application. Furthermore, they practise their presentation skills in order to prepare for real job interviews.</p>		
<b>Intended learning outcomes</b>		
<p>The students know possible occupational fields for humanities scholars. Apart from typical career opportunities, this also includes opportunities for lateral entry into the job market. The students know which personal key competencies qualify them for their desired occupation or for alternative occupational fields and are confident in using relevant sources of information. They are able to create a complete application portfolio as well as a personal portfolio containing relevant information for the desired occupational field. The students know how to write a personal curriculum vitae, application letters and unsolicited applications. Furthermore, they know the argumentative principles of job interviews. We develop and implement marketing measures to draw attention to the range of services of the Career Service and to increase its popularity amongst students and teachers. In addition, we cooperate with the students to determine their current needs in order to optimise the work of the Career Service. The work placement includes weekly meetings, an analysis of the efficiency of the Career Service so far, the development of new and original target-group-specific measures and the independent implementation of a measure within the team of trainees, using different forms of organisation and (online) media.		
Intended learning outcomes		
The trainees become acquainted with a variety of marketing measures and their practical application. They learn what to keep in mind when organising events, developing ideas and implementing unusual marketing measures. They are able to develop and apply various methods of editorial work for online marketing (e.g. websites, blogs, Facebook campaigns, live posts). Furthermore, they improve their communication and presentation skills by making personal appearances on different occasions and in front of different groups. The trainees acquire broad competencies in team and project work which also include the evaluation of campaigns and measures on the basis of a documentation which serves as a foundation for the work of the next group of trainees.

Information literacy in an academic context: search strategies, resources, reference management, copyright, etc.		
Intended learning outcomes		
Students know what information is needed for what purpose. They are able to locate information that is relevant within their discipline(s) and beyond in a variety of resources and to evaluate this information. They recognise the difference in quality between information they have retrieved from specific, restricted access resources (databases) and information they have found on the free web. The module aims to equip students with the skills needed to find information and literature that is relevant to the topics of their papers.

Students will develop basic general language skills and become familiar with intercultural aspects. They will develop an elementary ability to communicate and exchange information in a very basic way. When they read or listen to texts, they will understand familiar, everyday expressions and very simple sentences. Students will be able to speak and write in the target language, using simple phrases. At the end of the module, students will have developed skills in the target language that are equivalent to level "A1 -- Breakthrough" of the Common European Framework of Reference for Languages.

Groups and goals are heterogeneous. We have to reflect on the opportunities and limitations of individualisation in the classroom (learner autonomy / differentiated classroom activities / inclusion classrooms) and we can simulate mixed-ability teaching situations. In this course, students will work in pairs and we will video-tape and analyse a teaching sequence.			
<b>Intended learning outcomes</b>			
Students gain sound communication skills (written and oral) in academic German. They develop advanced academic German language skills that will allow them to communicate about selected topics in corresponding situations, using language flexibly. Students are proficient in academic German terminology and are able to communicate effectively within the discipline of German language and literature.

<p>This module equips students with an advanced knowledge of the target language that will allow them to communicate appropriately, in both written and oral form, at university and in the workplace. The course focuses on equipping students with knowledge about the culture and society of countries where the target language is spoken while giving them an opportunity to systematically practise their communication skills and equipping them with country-specific intercultural skills.</p>		
<b>Intended learning outcomes</b>		
<p>Students develop advanced language skills and a thorough familiarity with the culture and society of countries where the target language is spoken. They are thus able to communicate, both verbally and in writing, in a variety of situations, taking into account aspects related to the culture and society of said countries. They are able to effectively and flexibly use the target language, both during study abroad periods and in the workplace. This module aims to enable students to reach level "C1 -- Effective Operational Proficiency" of the Common European Framework of Reference for Languages.</p>

This online course equips students with an intermediate knowledge of the target language. It focuses on training students in academic skills while giving them an opportunity to systematically practise their listening comprehension and written communication skills. In addition, it gives students an opportunity to engage in guided information search to familiarise themselves with the French higher education system and French university culture.		
<b>Intended learning outcomes</b>		
Having been systematically trained in academic skills in the target language, students will be able to attend university in a country where the target language is spoken and to prepare for their stay abroad. Familiar with university terminology and appropriate linguistic structures and equipped with intercultural skills, students will be able to communicate effectively in a university setting. At the end of the module, students will have developed skills in the target language that are equivalent to level "B2 -- Vantage" of the Common European Framework of Reference for Languages.

In this module, students (without any previous knowledge of the Latin language) gain a solid knowledge of Latin.		
<b>Intended learning outcomes</b>		
Students develop the ability to comprehend the content, structure, and message of original Latin texts that correspond in difficulty to simpler passages from prose texts (e. g. Caesar, Nepos). Upon successful completion of the module, students will be issued the Latin language certificate <i>Kleines Latinum</i> that attests a "solid knowledge" of the Latin language. The certificate also attests a "knowledge" of the Latin language.

In this module, students (without any previous knowledge of the target language) gain a basic knowledge of the target language. They develop language skills for both general and academic purposes.		
<b>Intended learning outcomes</b>		
Students will develop basic general language skills and become familiar with intercultural aspects. They will develop an elementary ability to communicate and exchange information in a very basic way. When they read or listen to texts, they will understand familiar, everyday expressions and very simple sentences. Students will be able to speak and write in the target language, using simple phrases. At the end of the module, students will have developed skills in the target language that are equivalent to level "A1 -- Breakthrough" of the Common European Framework of Reference for Languages.

The aim of the module is to produce a professional video clip (broadcasts). Therefore, the principles of audio and video work, e.g. lighting engineering, camera settings, editing, montage, and professional recording of audio tracks, are conveyed during the course. Afterwards, the students apply their acquired skills to practical projects at the video / recording studio. Finally, the resulting audiovisual materials are converted into different target formats for the internet, live streams etc.		
Intended learning outcomes		
Basic skills regarding the proper usage of professional audio and video technology, basic skills in lighting engineering, postproduction (e.g. for various platforms), planning and designing broadcasts.

The aim of the module is to produce a professional video clip (broadcasts). Therefore, the principles of audio and video work, e.g. lighting engineering, camera settings, editing, montage, and professional recording of audio tracks, are conveyed during the course. Afterwards, the students apply their acquired skills to practical projects at the video / recording studio. Finally, the resulting audiovisual materials are converted into different target formats for the internet, live streams etc.

Students at universities in Germany must be able to deliver presentations on topics in their disciplines without simply reading out a prepared text. This course teaches students how to deliver presentations to groups and gives them the opportunity to practise their presentation skills. Students also learn how to structure information, prepare handouts, use appropriate visual aids and write cue cards.		
<b>Intended learning outcomes</b>		
Participants have practised the communication skills that are essential for university students and developed confidence and fluency in communicating in an academic setting.

The modul functions as the preparation for the subsequent excursion to schools in different European countries. The course includes facts about the history, culture, society, and other aspects of the target culture. Furthermore, students will acquire knowledge about the structure of teacher training, schools and higher education systems of the respective country in order to compare them to the German educational system. Additionally, students are prepared in an intercultural way for the respective country. This will form the basis for the mutual exchange		
<b>Intended learning outcomes</b>		
Students are able to reflect upon and discuss about similarities and differences of international educational systems in comparison with the German educational system. They can discuss different aspects of educational systems in respect to migration and intercultural learning. They recognize and can assess historic, social, cultural and political effects on educational systems.
