

## Subdivided Module Catalogue for the Subject

# **Special Education**

as a Master's with 1 major with the degree "Master of Arts" (120 ECTS credits)

Examination regulations version: 2013 Responsible: Faculty of Human Sciences Responsible: Institute of Special Education

JMU Würzburg • generated 26-Aug-2024 • exam. reg. data record 88|190|-|-|H|2013

### **Course of Studies - Contents and Objectives**

Building on professional and scientific qualification in special education (BA), graduates acquire a further and consecutive qualification, which has a professional as well as research-oriented profile in special education. This enables them to respond to the demands of the labour market in the professional field of special education and inclusion for adults with disabilities. They overlook the coherences in the field of special education and are able to autonomously apply research methods.

The graduates have set an individual emphasis on the different subjects of counseling, life and work in the context of disabilities and acquired research-based knowledge in the field of special education and related fields, as well as skills necessary for leadership and counseling in organizations for people with disabilities.

The graduates' expert knowledge includes relevant aspects of social and employment law, , aspects of organizational development and personal management, and basic competencies in counseling. They have delved into theories in special education, aspects of metatheory, anthropological and sociological approaches, and also into methods in adult special education. They have set an individual profile on either vocational education and inclusion in labour, or on the field of andragogy, leisure time, living and aging, or in counseling for people with disabilities, their affiliates or professionals. In these areas, aspects of heterogeneity and inclusion are stressed. Graduates have trained their expertise in an internship. Self and project management was skilled in a research project. They have proved autonomous, research based skills in their master thesis in a relevant field on adult special education.

### Abbreviations used

Course types:  $\mathbf{E}$  = field trip,  $\mathbf{K}$  = colloquium,  $\mathbf{O}$  = conversatorium,  $\mathbf{P}$  = placement/lab course,  $\mathbf{R}$  = project,  $\mathbf{S}$  = seminar,  $\mathbf{T}$  = tutorial,  $\ddot{\mathbf{U}}$  = exercise,  $\mathbf{V}$  = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B**/**NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

### Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

### Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

### In accordance with

the general regulations governing the degree subject described in this module catalogue:

#### ASP02009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

#### 17-Jul-2013 (2013-62)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

Conte	nts					
Part I: This module describes the relevant connections between practical fields of action and special educational theories. It discusses, gives an overview of and focuses on specific questions and requirements of practice in a theory-driven manner. Holding and analysing practical counselling sessions, going on excursions to curative and special educational institutions or inspecting local institutions might be part of the module. Theory remains the essential frame of reference and an exclusive prioritisation, e.g. of counselling, recreation, living or work and occupation is mandatory. Part II: The module "Action and Methodology 2" refines the results and findings of "Action and Methodology 1" and focuses on advanced aspects of a thematic prioritisation. It examines theory-practice-questions, e.g. from the area of work and occupation, counselling or recreation and living. Part II builds upon the broader overview given in part I and exclusively focuses on specific aspects of a thematic priority. Part III: This module specialises on and examines a prioritisation on a higher level of abstraction on the basis of detailed texts. Possible areas of specialisation might be work and occupation, counselling or recreation and living. In this process, pedagogical core topics and problems are discussed and analysed. (Alternatively, a specialisation in another content area than in "Action and Methodology 1" and "Action and Methodology 2" is possible in the module "Action and Methodology 3". In this case, the contents and competencies/qualifications which have to be acquired correspond to the ones described in "Action and Methodology 1".)						
tional proble mewor tional are ab using t evalua They e te thei proble stitutio	Part I: The students have general knowledge of different fields of action as well as curative and special educa- tional methods and are able to differentiate between these actions and methods. They are aware of practical problems and questions in the field of Curative and Special Education. The students evaluate the structural fra- mework conditions of institutions in curative and special educational fields of action. They examine organisa- tional requirements of institutions and services. They evaluate their own practical actions. Part II: The students are able to describe and discuss complex theory-driven questions of a specialised field. They are confident in using technical terms and relevant findings and are able to apply these to specific practical fields. The students evaluate the structural framework conditions of institutions in curative and special educational fields of action. They examine organisational requirements of institutions and services. Part III: The students are able to evalua- te their own professional actions in a reasonable manner. They are able to independently analyse and evaluate problems in practice in a theory-driven manner. The students evaluate the structural framework conditions of in- stitutions in curative and special educational fields of action and know theories and concepts of further develop- ment. They examine organisational requirements of institutions and services and know theories and concepts of

This module provides supervision for students working on their Master's thesis. The meetings, which are sche- duled according to requirements, are held by the corresponding thesis supervisor. The goal is to provide the students with advice regarding methods and contents of their Master's thesis, which is based upon a relevant scientific-theoretical approach. The counselling helps the students in determining a question, conducting rese- arch and dealing with data. Intended learning outcomes The students formulate a precise question for their Master's thesis. They have advanced knowledge of a metho- dological research approach. The students know the functions of the various procedures of acquiring knowledge. They independently work on the determined question in a comprehensible manner and prove that they are able to conduct good scientific practice. Conten	ts					
Part I: The module discusses abstract and superordinated theoretical approaches and traditions which are use- ful for the processing and understanding of complex special educational contexts. These include explanatory ap- proaches that stem from different disciplines such as philosophy, theology, psychology and sociology. The mo- dule examines and compares different theoretical perspectives and approaches in the context of different the- matic focuses. This examination also entails the perspectives of different disciplines on the corresponding the- matic focus. Part II: This module focuses on the examination of complex perspectives. These perspectives can re- fer to fundamental, phenomena-related or institutional contexts of Special Education. The module results in cri- tical examinations and in the acquisition of a complex overview of backgrounds, topics and aspects relevant to Special Education, also with a critical potential for the examination and differentiated development of concepts. Part III: The third module focusses on a specific theoretical perspective on the elaboration of special educatio- nal phenomena and tasks. This perspective is discussed in detail. This (for example scientific-theoretical school) is supposed to serve as a matrix for the structuring of scientific-theoretical questions and for the development of concepts. (Alternatively, a specialisation in another content area than in "Metatheories and Interdisciplinary Contexts 1" and "Metatheories and Interdisciplinary Contexts 2" is possible in the module "Metatheories and In- terdisciplinary Contexts 3". In this case, the contents and competencies/qualifications which have to be acqui- red correspond to the ones described in "Metatheories and Interdisciplinary Contexts 1".) <b>Intended learning outcomes</b> Part I: The students are able to compare and critically evaluate theories and approaches in view of different spe- cial educational topics. These competencies enable them to develop critical opinions and concepts for institu- tions and conte						
petence	e. Part		to consistently repre	sent and understand	retical and critical reflection com d a point a view / theory. They ha- context.

tional s as a dis stitutio carrying which a	This module analyses institutional framework conditions of the work placements, especially aspects of organisa- tional structures and processes encountered in the institutions. Furthermore, the corresponding seminar serves as a discussion board where the different contents, goals and methods of special educational services and in- stitutions are professionally reflected and discussed in detail. The seminar also imparts different approaches to carrying out a practical study in order to assist the students in preparing the internship report and presentation which are part of the examination. The practical study can be submitted in the form of a project study, an institu- tional analysis or a special educational reflection.
