| This module elaborates on knowledge of theories and research in the context of counselling in special educatio- nal fields. It focuses on the (further) development of a professional, special educational counselling attitude and on institutional forms and target groups of counselling. Furthermore, it elaborates on selected counselling me- thods (including cooperative, client-centred, manifestation-oriented, solution-oriented, methodological and con- tradictory counselling) and allows for self-experience and self-reflection in the context of selected counselling methods. The students acquire central counselling skills, conversation techniques in (pedagogical) conflict si- tuations and - depending on the respective counselling concept - skills in supervision and group counselling. | | | | | | | |

| ries. It o ry-drive cial edu sential | This module describes the relevant connections between practical fields of action and special educational theo- ries. It discusses, gives an overview of and focuses on specific questions and requirements of practice in a theo- ry-driven manner. Holding and analysing practical counselling sessions, going on excursions to curative and spe- cial educational institutions or inspecting local institutions might be part of the module. Theory remains the es- sential frame of reference and an exclusive prioritisation, e.g. of counselling, recreation, living or work and occu- pation is mandatory. | | | | | | | |

| tion in individ profess cies sh build?) | Pedagogical action as a non-standardisable, personalised practice of intervention essentially means taking ac- tion in uncertain situations. It is always about imparting general pedagogical knowledge in the corresponding individual situation. The way someone manages these uncertain situations indicates their level of pedagogical professionalism. Pedagogical professionalism can be extended to pedagogical competencies (which competen- cies should a pedagogue have?), pedagogical relationship building (how should a pedagogical relationship be build?) and pedagogical personality (which pedagogical attitudes and mindsets are useful and necessary in ped- agogical practice?). | The students are able to thoroughly examine and critically contemplate special educational theories in a diffe- rentiated manner, also in view of scientific theory. They can thoroughly evaluate the practical relevance of spe- cial educational theories and can test their applicability. The students can conduct detailed scientific research on special educational theories. They can communicate, represent, compare and methodically illuminate special educational theories. They develop advanced theoretical and critical reflection competence. | | | | | | | |

| vant to theorie ding sp ties, as theoret living a ries 1" a case, th bed in | This module further elaborates on already thoroughly discussed special educational theories and theories relevant to Special Education. The additional detailed information will be discussed and analysed in the group. The theories refer to differentiated, advanced approaches to the explanation of disabilities and impairments (including specific forms and manifestations), which are also examined in view of more complex aspects of disabilities, as well as to the theoretical backgrounds of concepts of action, to the theory of institutions and to further theoretical backgrounds. Examples of theory-based topics might be counselling, work and occupation as well as living and recreation. (Alternatively, a specialisation in another content area than in "Special Educational Theories 1" and "Special Educational Theories 2" is possible in the module "Special Educational Theories 3". In this case, the contents and competencies/qualifications which have to be acquired correspond to the ones described in "Special Educational Theories 1".) | | | | | | |

They can ascribe these theories to relevant scientific-theoretical backgrounds in a decisive and differentia- ted manner and are therefore able to find scientific-theoretical arguments. They can evaluate the practical rele- vance of special educational theories in a highly differentiated manner and can test their applicability. The stu- dents can conduct detailed scientific research on special educational theories in a differentiated manner. They can communicate, represent and methodically illuminate special educational theories. Furthermore, they can compare these theories in a highly differentiated manner. They develop highly differentiated and advanced theo- retical and critical reflection competencies. | | | | | | |
