Course of Studies - Contents and Objectives

Within the framework of a consecutive bachelor and master model, the Faculty of Business Management and Economics of JMU offers the master course Entrepreneurship & Innovation as a research-oriented course with the degree "Master of Science" (M.Sc.).

The master's program offers students the opportunity to develop entrepreneurial thinking and action in a scientifically sound, reflective, and practice-oriented manner. Particular emphasis is placed on practical application, with reference to real innovation and start-up processes. The program builds on the specialist knowledge acquired in the undergraduate program and expands it with business skills. The goal is to enable students to implement their own start-up projects, initiate innovation processes within existing organizations as intrapreneurs, and responsibly manage company successions.

The Master's program in Entrepreneurship & Innovation is a bilingual program, with instruction offered in German and English.

Abbreviations used

Course types: $\mathbf{E} = \text{field trip}$, $\mathbf{K} = \text{colloquium}$, $\mathbf{O} = \text{conversatorium}$, $\mathbf{P} = \text{placement/lab course}$, $\mathbf{R} = \text{project}$, $\mathbf{S} = \text{seminar}$, $\mathbf{T} = \text{tutorial}$, $\ddot{\mathbf{U}} = \text{exercise}$, $\mathbf{V} = \text{lecture}$

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: A = thesis, LV = course(s), PL = assessment(s), TN = participants, VL = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASP02015

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

The subject is divided into

Description

In this module, students will acquire the theoretical foundations of market-oriented management.

Content:

With the stakeholder approach as a starting point, the basic design of market-oriented management will be explained and exemplified in the 5 classical steps: situation analysis, objectives, strategies, tools and controlling. The course will focus not only on the behavioural approaches of consumer behaviour but also on industrial purchasing behaviour. A case study introducing students to the fundamental principles of market research based on a conjoint analysis will provide students with deeper insights into the topic.

Outline of syllabus:

- 1. Marketing, entrepreneurship and business management
- 2. Explanations of consumer behaviour
- 3. Fundamentals of market research
- 4. Strategic marketing; marketing tools
- 5. Corporate social responsibility versus creating shared value

The lecture names introductory relevant communication models. Furthermore, the theoretical models of PR are discussed. The added value of communication for companies, business, politics, and science is explained. The discrepancy between journalism and PR is discussed, as well as the basic elements, instruments, goals, and forms of PR. The preparation and implementation of press meetings, conferences, campaigns, and events will be systematically explained, and the central aspects of corporate communications will be outlined. The exerci-						

Intended learning outcomes

After participating in the module courses, students are able to understand and apply PR and its forms, elements as well as methods and in a holistic context. Students learn professional competencies in the field of (business) communication with regard to reflection, argumentation, and exchange as a PR consultant in different areas. In addition, students will be able to apply concrete PR instruments in practice and prepare them professionally.

se deals with the practical implementation of journalistic styles in the various media and provides an overview of

The module offers a comprehensive insight into the world of Enterprise Resource Planning (ERP) systems. ERP sys stems are central building blocks in modern business management and play a crucial role in the integration of business processes, data management and decision-making. This module is divided into three sections, each of which focuses on practical applications and examples in addition to theory.

- Section 1: ERP selection process with application examples of two ERP systems: The first part of the module is dedicated to the complex process of selecting a suitable ERP system for a company. Students are familiarized with proven methods and tools that are used in the evaluation of ERP systems. Using case studies, students compare two different ERP systems and apply the selection process in a real-life environment.
- Section 2: Low-code and no-code systems with application examples: In this part, students are familiarized with low-code and no-code platforms that enable the efficient development of individual ERP applications. The focus is on dealing with a specific software solution from a leading company in this field. Students learn the basics of these platforms and create their own applications in order to experience the advantages of low-code and no-code approaches in practice.
- Section 3: Customizing ERP software using the example of SAP S/4HANA: In the final part, students learn the basics of customizing ERP software. The focus is on the world's leading ERP system SAP S/4HANA. Students are enabled to adapt SAP S/4HANA to the specific requirements of a company. Practical exercises and case studies enable students to apply customizing techniques in real-life scenarios.

In addition to the theoretical information presented in the lecture, the exercises offer the opportunity to access the ERP systems and deal with the respective software in a practical way by means of extensive case studies.

Intended learning outcomes

The "Business Software 1: Management and Implementation of Information Systems" module aims to achieve the following learning outcomes:

- 1. ERP Systems Overview and Differentiation: Students gain a comprehensive understanding of various ERP systems, their architectures, and philosophies.
- 2. Integration of Business Processes: Participants learn how ERP systems map and optimize business operations.
- 3. Selection and Customizing of ERP Systems: Students develop skills to evaluate, select, and adapt ERP systems to meet business needs.
- 4. Implementation of Business Processes: Students gain practical experience in independently implementing business processes in ERP and low-code/no-code platforms, and learn practical ERP customizing.

Allocation of places

50 places.

WM1:

Should the number of applications exceed the number of available places, places will be allocated as follows:

- 1) Master's students of Information Systems, Management and Economathematics will be given preferential consideration.
- (2) The remaining places will be allocated to students of other subjects.
- (3) When places are allocated in accordance with (1) and (2) and the number of applications exceeds the number of available places, places will be allocated by lot among applicants from this group.

Conter	Contents					

The module provides an overview of strategic implications of digital technologies at the level of organisations, industries and value networks. To this end, concepts and frameworks from strategic technology management are applied to digital innovations and illustrated with numerous examples. In the accompanying exercise, case studies of well-known digital companies and their business models are analysed and discussed.

Intended learning outcomes

- Become familiar with theoretical concepts of strategy development and implementation in the e-business context
- Understand the strengths and weaknesses of different frameworks and approaches as well as the prerequisites for their meaningful application
- Apply the concepts to case studies and derive action-oriented recommendations from them
- Learn how to transfer the concepts to other entrepreneurial situations from their studies or work

Contents					

This course provides students with a comprehensive understanding of sales strategies and communication techniques that are essential for success in today's dynamic business environment. By looking at sales management, including the design of sales structures, strategic management and human resource management, as well as communication management, which includes traditional and digital means of communication, students will gain a comprehensive overview of the relevant subject areas.

Rough course structure:

- Sales management:
- Designing the sales structure
- Strategic sales management
- Management of sales staff
- Communication management:
- Traditional communication tools (e.g. TV, flyers)
- Digital communication tools (e.g. social media marketing; search engine marketing, display advertising)
- Systematic channel integration

Intended learning outcomes

Through theoretical understanding and practical application, students will develop proficiency in strategic and operational sales management and the utilization of diverse communication instruments to achieve organizational objectives and maximize market impact.

Contents					

The course Organizational Economics and Digital Transformation introduces advanced topics in organizational economics, with a focus on economic decision-making within organizations. Concepts and tools from microeconomic theory, as well as empirical findings from field studies and laboratory experiments, are incorporated, such as those related to performance measurement and incentives, organizational structure, and authority. Additionally, the course integrates key aspects of digital transformation shaping modern business landscapes. Thus, students not only gain a solid overview of the fundamental principles of organizational economics but also insights into the challenges, opportunities, and strategies associated with the digital transformation of businesses.

Intended learning outcomes

With this course,

- students will be able to understand and reflect on modern microeconomic concepts and current organizational economics.
- students will learn to master and apply quantitative microeconomic methods.
- students will be enabled to classify and relate specialized knowledge from theoretical microeconomics, experimental and empirical microeconomics, business administration, and psychology.
- students learn how digital transformation impacts organizations and their architecture.

Conter	Contents					

This module is a theory-led and practice-oriented primer on corporate entrepreneurship. It provides you with knowledge useful for anyone aiming at working (or researching) in the field of corporate innovation and entrepreneurship or at pursuing an 'intrapreneurial' or entrepreneurial career.

- (1) Introduction to corporate entrepreneurship
- (2) Antecedents and forms of corporate entrepreneurship
- (3) Corporate strategy and corporate entrepreneurship
- (4) Organizational structure and corporate entrepreneurship
- (5) Human resource management and corporate entrepreneurship
- (6) Building supportive organizational cultures
- (7) Entrepreneurial control systems
- (8) Entrepreneurial leadership
- (9) The corporate entrepreneur as a champion and diplomat
- (10) The pay-off from corporate entrepreneurship
- (11) Corporate venture capital
- (12) Corporate entrepreneurship in nonprofit and government organizations
- (13) Universities and academic spin-offs
- (14) Wrap-up and Q&A

Intended learning outcomes

Educational aims

- Clarify the role of corporate entrepreneurship
- Explain theoretical concepts and mechanisms behind corporate entrepreneurship
- Enable students to critically appraise alternative approaches to corporate entrepreneurship
- Enable students to evaluate the boundaries and risks of corporate entrepreneurship

Learning outcomes

On successful completion of this module students will be able to:

- Create and evaluate concepts related to corporate entrepreneurship
- Assess the role of corporate entrepreneurship for creating and sustaining competitive advantage
- Make judgements about the organizational and managerial implications of corporate entrepreneurship
- Systematically choose between different routes of action

Contents

This theory-led and application-oriented module provides you with critical knowledge and skills related to corporate strategy—essential for anyone aspiring to take on leadership roles in their future career, may it be in the private or public sector. The module goes beyond basic knowledge about strategic management provided by bachelor-level modules.

- (1) Developing strategies in pursuit of competitive advantage
- (2) Corporate diversification
- (3) Vertical integration and outsourcing
- (4) Mergers & acquisitions
- (5) Dynamic strategies
- (6) Cooperative strategies
- (7) Corporate spin-offs and spin-outs
- (8) Internationalization strategies (I)
- (9) Internationalization strategies (II)
- (10) Strategic change
- (11) Corporate strategies and new technologies
- (12) Corporate governance and corporate social responsibility
- (13) Corporate communication and crisis management
- (14) Wrap-up and Q&A

Intended learning outcomes
