Contents		
An introduction to systematic theology. This module discusses how Christian doctrines have developed in scripture and tradition and how faith should be defined in the context of the challenges that face us today. It also explores the implications this has for responsible behaviour, both in our personal lives and as a society. It addresses both experiences of faith that have been defined as dogma throughout the history of theology and key findings from philosophy as well as the human and social sciences.		
Intended learning outcomes		
At the end of the course, students will have learned a range of methods in systematic theology. They will have become acquainted with key Christian beliefs and their historical development and will be able to independently analyse and describe them. Familiar with essential concepts of, and types of argument used in, theological ethics, students will be able to take their own position on selected problems in ethics. They will also be able to situate issues relating to Christian beliefs and our ethical responsibility as Christians within the larger context of Christian faith.
