Course of Studies - Contents and Objectives

The student of Spanish Studies learns scientifically relevant and analytical/methodical basic skills in the most important philological areas. Besides well-founded knowledge of the language and a competence in use of Spanish approaching that of native speakers, the student acquires a profound, structured and adaptable knowledge in the subdisciplines of Italian linguistics, literature, and cultural and regional studies. On this basis, the student is equipped to recognise fundamental and current philological questions and to apply scientific methods to them. An important place in studies is given to the development of the ability to analyse texts of all kinds from literary, cultural and linguistic perspectives. The aim of these studies is to equip students to deal with professional and academic challenges in all the various linguistic, textual and cultural contexts.

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.
