

Subdivided Module Catalogue
for the Subject
Museology and material culture
as a major in a Bachelor's degree programme
with the degree "Bachelor of Arts"
(120 ECTS credits)

Examination regulations version: 2013
Responsible: Faculty of Arts, Historical, Philological, Cultural and Geographical
Studies
Responsible: Institute of German Studies

Course of Studies - Contents and Objectives

The Bachelor programme “Museology and material culture“ as a main subject (120 ECTS) provides a fundamental qualification for practical or academic museum work, as the student acquires not only knowledge on theoretical and analytical levels, but also application-oriented abilities in all relevant core areas. The contents of this programme with its interdisciplinary emphasis comprise: theories, methods and current research approaches in museology; history and forms of museum and exhibition realisation; principles of the collection, documentation, research, communication, presentation and preservation of exhibits; methods and strategies of museum education and application of media, including PR and publicity work; internal and external organisational structures and collection and culture management. The core subject “material culture” focuses on the functionality and socio-cultural significance of objects in earlier and present-day living environments, but also deals with properties of materials and preservation of cultural goods. The subject matter and topics presented in museums and exhibitions are also handled within a museum-relevant university discipline as a subsidiary subject (60 ECTS).

During the programme, students acquire a broadly based and theoretically and practically oriented competence in the collection, conservation, research, interpretation and exhibition of objects of cultural, artistic, technological and natural scientific significance, i.e. in communicating these to different interest groups using various media according to appropriate standards in specialist knowledge and materials science and complying with pedagogical and financial/organisational requirements. It is especially through practical work, through active participation in exhibitions with internal and external partners (“research by exhibiting”), through project work, through workshops and through regional and international excursions, that students learn mastery and problem-oriented application of these abilities. Beyond this specialist focus, the programme also provides training in the fundamentals of independent scientific working with corresponding skills in judgement and problem-solving, at the same time equipping students to discover, compress, structure and communicate information and imparting familiarity with modern presentation, charring and information technologies. In addition, social competences such as contact and team skills and readiness to shoulder responsibility are developed.

The professional aspects of this programme constitute a qualification for a scientifically oriented career in the museum and exhibition sector or in comparable cultural institutions, i.e. in exhibition houses, galleries, commemorative sites etc. Depending on the combination of subjects chosen and the emphases, the programme provides moreover a general basis for activities in the fields of culture promotion and culture politics, where the transmission, presentation, management and communication of cultural services are called for, as, for example, in the education field, the media or the leisure and tourism industries.

Abbreviations used

Course types: **E** = field trip, **K** = colloquium, **O** = conversatorium, **P** = placement/lab course, **R** = project, **S** = seminar, **T** = tutorial, **Ü** = exercise, **V** = lecture

Term: **SS** = summer semester, **WS** = winter semester

Methods of grading: **NUM** = numerical grade, **B/NB** = (not) successfully completed

Regulations: **(L)ASPO** = general academic and examination regulations (for teaching-degree programmes), **FSB** = subject-specific provisions, **SFB** = list of modules

Other: **A** = thesis, **LV** = course(s), **PL** = assessment(s), **TN** = participants, **VL** = prerequisite(s)

Conventions

Unless otherwise stated, courses and assessments will be held in German, assessments will be offered every semester and modules are not creditable for bonus.

Notes

Should there be the option to choose between several methods of assessment, the lecturer will agree with the module coordinator on the method of assessment to be used in the current semester by two weeks after the start of the course at the latest and will communicate this in the customary manner.

Should the module comprise more than one graded assessment, all assessments will be equally weighted, unless otherwise stated below.

Should the assessment comprise several individual assessments, successful completion of the module will require successful completion of all individual assessments.

In accordance with

the general regulations governing the degree subject described in this module catalogue:

ASPO2009

associated official publications (FSB (subject-specific provisions)/SFB (list of modules)):

20-Feb-2013 (2013-13)

This module handbook seeks to render, as accurately as possible, the data that is of statutory relevance according to the examination regulations of the degree subject. However, only the FSB (subject-specific provisions) and SFB (list of modules) in their officially published versions shall be legally binding. In the case of doubt, the provisions on, in particular, module assessments specified in the FSB/SFB shall prevail.

The subject is divided into

Organisation and implementation of activities within the initiative of the Martin von Wagner Museum of the University (museum tour, thematic day of action, special exhibitions).		
Intended learning outcomes		
Students are able to present technical knowledge concerning objects of the museum generally intelligible and vividly for lay public and acquire important teamwork skills by common activities. Moreover, they acquire their independence in the area of culture and knowledge transfer in the light of the vocational practice.

Contents		
Media literacy in an academic context: research strategies and tools; working with electronic image databases; searching for images on the internet; introduction to legal issues associated with the use of image sources (copyrights, exploitation rights); production of new image sources and practical use of image sources during university studies.		
Intended learning outcomes		
Students know how and where to search for images to use in presentations. They know how to use and add to the image database of the Institute of Art History that is currently in the process of being created. Students know what to keep in mind when using copyrighted images and are also able to present these images. The module equips students with the knowledge and skills necessary to prepare image-based scholarly presentations.

Contents		
This module provides an introduction to further central tasks of a museum: the exhibition. Students will be acquainted with methods, theories and current trends of the conceptualisation and design of exhibitions. Furthermore, the module is designed to teach perspectives and methodological approaches in order to analyse exhibitions critically.		
Intended learning outcomes		
Students are familiar with historical as well as current developments and trends in the scenography and exhibition design. They are able to analyse an exhibition. This is in view of the envisaged career of significant importance, as the students are able to critically question the results of their own museum work in the light of different contentual as well as creative aspect.

Contents		
The module deals with another central task of a museum: the exhibition. The module consists of an exhibition project that lasts two-semester. Thus, students will be able to put into practice the knowledge, which they have acquired in the course of their studies, of different application areas in a methodological reflective and scientifically processed way.		
Intended learning outcomes		
Students are familiar with all relevant work processes for the realisation of an exhibition. They are able to develop, present and practically apply contentual, formal and suitable for the presented exhibits as well as creative, pedagogical, educational, medial and technical realisable ideas for an exhibition. They are acquainted with practical work skills and have expanded their general as well as social competences in view of consolidated presentation and discussion qualifications as well as concerning the ability to work in a team.		
Courses (type, number of weekly contact hours, language — if other than German)		
This module comprises 2 module components. Information on courses will be listed separately for each module component. <ul style="list-style-type: none"> o4-Mus-AusstPrax-1-131: R (no information on SWS (weekly contact hours) and course language available) o4-Mus-AusstPrax-2-131: R (no information on SWS (weekly contact hours) and course language available) 		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)		
Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.

Contents		
This module provides students with a detailed overview of further selected material groups and additionally, deals with the preservation strategies for art and cultural heritage into the museum environment, so to speak with the task of preservation. This also applies for the preservation, presentation and the proper handling with museum objects (preventative conservation).		
Intended learning outcomes		
Students are able to understand and process objects of material culture independently. They are skilled in the proper handling with these objects in the museum and know about the perfect storage conditions as well as harmful influences. They are able to identify damaging factors and to minimise them, to identify and evaluate damages on objects and whether conservational measures should be taken.

The module provides a basic dealing with further central tasks of the museum: the examination and documentation of museum objects. Students will acquire knowledge of the most important materials and forms that are frequent in the daily life of a museum. In addition, the module is designed to teach techniques, principles and practices of object documentation and inventory.		
Intended learning outcomes		
Students are able to determine materials and types and to use the correct term, which is the basis of each scientific activity with objects of a museum. Students are familiar with all work steps of documentation and inventory as well as with the different ways and possibilities of further research concerning museum objects.

Within this module, students will participate 5 days in museum-relevant advanced trainings, courses, conferences or seminars from external providers (e.g. the Virtual University of Bavaria or the Bavarian Museum Academy). Thus, they independently expand and reflect their expertise according to their own prioritisation. Moreover, students acquire relevant experiences for their studies and have the possibility to establish a network of professional contacts.		
Intended learning outcomes		
Students acquire detailed theoretical as well as application-orientated insights into selected current, museum-relevant issues and problems.

During this module, a work placement in the museum sector has to be completed within a time frame of 10 weeks in total. The 10 weeks can be distributed over different time frames and institutions. Work placements can be completed in all national and international museums, exhibition houses and galleries that are led according to all common and technical criteria in full-time. Under professional supervision, students become familiar with different vocational fields and working environments and collect experiences, which are relevant for their studies.		
Intended learning outcomes		
Students acquire practical work skills in selected areas of the museum's work. Moreover, they have expanded their general as well as social competences, particularly in view of autonomous and independent action. These competences will be required when they submit their application for a work placement and the independent accomplishment of the given tasks.

The module provides students with basics of the marketing and cultural management as well as press and public relations. Furthermore, students will apply the study matter, which they have already acquired, to an application-orientated example.		
Intended learning outcomes		
Students are able to apply different marketing and management methods reflectively. They are able to classify them on a practical profession and result-orientated in view of organisational, conceptional as well as contentual requirements and to evaluate the particular effort. Furthermore, they acquire practical work skills.

The module provides students with a consolidated insight into selected material groups. Additionally, they will become familiar with different scientific methods concerning materiality-based analysis of museum objects.		
Intended learning outcomes		
Students are familiar with the history, characteristics and dimensions of significance for generic material groups and thus, skilled for a proper dealing with as well as precise determination of respective museum objects. Moreover, students acquire knowledge of the most important scientific materiality-based analysis methods. Next to the application possibilities and symbolic potential, this also comprises methodological restrictions.

Contents		
Introduction to the research of material culture (Material Culture Studies), which includes the relevant theoretical approaches, research perspectives and terms. Furthermore, students will deal consolidated with different dimensions of meaning concerning material culture within presentations, based and orientated on selected specific examples.		
Intended learning outcomes		
Students are able to classify, analyse and implement different approaches and dimensions of significance in view of museum objects theoretically.		
Courses (type, number of weekly contact hours, language — if other than German)		
V + S (no information on SWS (weekly contact hours) and course language available)		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)

Contents		
The module gives a broad overview of the different media, used in a museum. The media will be examined according to their specific characteristics, applications, effects on the visitors as well as technical prerequisites.		
Intended learning outcomes		
Students are acquainted with the most common used media in a museum. They are able to analyse the media that can be found in a specific exhibition, in the respective museum overall context with regard to the conveyance of a message and its impact on the visitors. They know how a medium should be designed in order to convey objects, significances and contents sustainably and appropriately.

Contents		
The module gives a current overview of the museum landscape of a specific national and/or international region and shares knowledge of current research discourses against a historical background.		
Intended learning outcomes		
Students acquire the ability to discuss and reflect specialist discourses theoretically and application-orientated. They are acquainted with important regional and national-specific developments within the exhibition context and are able to compare these developments with the situation in this country as well as they are able to name reasons for a characteristic of particular forms.		
Courses (type, number of weekly contact hours, language — if other than German)		
This module comprises 2 module components. Information on courses will be listed separately for each module component.		
<ul style="list-style-type: none"> o4-Mus-MuF-1-131: Ü (no information on SWS (weekly contact hours) and course language available) o4-Mus-MuF-2-131: Ü (no information on SWS (weekly contact hours) and course language available) 		
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)		
Assessment in this module comprises the assessments in the individual module components as specified below. Unless stated otherwise, successful completion of the module will require successful completion of all individual assessments.		
Assessment in module component o4-Mus-MuF-1-131: Current Debates and Research <ul style="list-style-type: none"> 2 ECTS, Method of grading: (not) successfully completed work-in-progress report (presentation, approx. 30 minutes) with position paper (2 pages) as an admission prerequisite to assessment Other prerequisites: Admission prerequisite to assessment: regular attendance (a maximum of 2 incidents of unexcused absence) of courses (lectures excluded).

Contents		
Students get an overview of the history, developments, working environments, schools, specialist representatives, theories, methods and sources of the discipline Museology (Museum Science, Museology, Museum Studies) and provides a basic introduction to the history of museums and exhibitions that will be covered in detail during a second course exemplarily. Students will expand their expertise by dealing with a selected topic intensively.		
Intended learning outcomes		
Students acquire a basic museological expertise. This includes the knowledge of objects, technical terms, analysis approaches and central theoretical positions of Museology as well as the knowledge of different museum historical development stages, museum genres and museum concepts. Furthermore, students acquire the scientific argumentation by discussing specific case studies as well as they achieve basics of scientific thinking, working, presenting and writing by processing individual aspects.

Within the module a work placement of 4 weeks has to be completed. Work placements can be completed in all national and international museums or institutions in the culture sector that are led according to all common and technical criteria in full-time. Under professional supervision, students become familiar with different vocational fields and working environments and collect experiences, which are relevant for their studies.		
Intended learning outcomes		
Students acquire practical work skills in selected areas of the museum or cultural work. Moreover, they have expanded their general as well as social competences, particularly in view of autonomous and independent action. These competences will be required when they submit their application for a work placement and the independent accomplishment of the given tasks.

Contents		
This module provides students with consolidated knowledge of collecting, which is the primary task of each museum. Additionally, the module provides an overview of the phenomenon "collection" in the private as well as in the museum area. Students will become familiar with the different motives, strategies and principles that are subject to this phenomenon.		
Intended learning outcomes		
Students are able to classify, evaluate and reflect the museum as well as private collections in a cultural and scientific way. This is important for the future profession as on this basis substantiated decisions will be made, such as whether a private collection should be added to a museum's collection or not. Moreover, students are familiar with the possible consequences and individual working steps that result from such an addition and know how a collection has to be preserved and managed.

Students will become familiar with historical as well as current approaches of Museum Education by using different learning theories and models. Further, selected approaches will be tested practically.		
Intended learning outcomes		
Students are able to reflect different theoretical approaches, which are related to museum mediation tasks, as well as practical methods. Additionally, they are able to apply this to museum educational work visitor-oriented. They acquire practical working skills and have expanded their general as well as social skills in the light of the collaboration with specific target groups and the public presentation of results.

Module title			Abbreviation
Environmental Education in the Botanical Garden of the University			07-SQF-UBG-102-m01
Module coordinator		Module offered by	
head of Botanical Garden		Faculty of Biology	
ECTS	Method of grading	Only after succ. compl. of module(s)	
2	(not) successfully completed	--	
Duration	Module level	Other prerequisites	
1 semester	undergraduate	--	
Contents			
The Botanical Garden of the University of Würzburg is primarily used for teaching and research-related activities. In addition, it is used for activities in the area of general environmental education with the plants in the different sections and collections being used to inform interested members of the public about topics in the areas of botany, ecology and gardening. In this module, students will develop appropriate educational concepts for imparting, in a comprehensible way, specialist knowledge to interested laypersons. They will practise designing and using appropriate aids (information boards, leaflets etc.) and applying methodological approaches (guidelines) for the comprehensible presentation of complex concepts. Students will be organised into teams to complete the following tasks: develop contents tailored to the needs of selected target groups, acquire the specialist knowledge necessary for presenting these contents, select appropriate methods for presenting these contents.			
Intended learning outcomes			
Students will be able to communicate concepts in ecology and botany to a lay audience. They will be able to tailor contents to a target audience, selecting and using appropriate aids and techniques. Students will have acquired an overview of the sectors of the Botanical Garden and will be able to prepare information material on individual sections. They will have developed both botanical knowledge and teaching skills that will enable them to guide tours through the Botanical Garden, imparting knowledge in a way that is tailored to their target audience.			
Courses (type, number of weekly contact hours, language — if other than German)			
Ü + E (no information on SWS (weekly contact hours) and course language available)			
Method of assessment (type, scope, language — if other than German, examination offered — if not every semester, information on whether module can be chosen to earn a bonus)			
term paper or preparing educational materials and materials for demonstrations (approx. 10 to 20 pages)			
Allocation of places			
Number of places: 6. Should the number of applications exceed the number of available places, places will be allocated as follows: Places will primarily be allocated to students of the Bachelor's degree subject Biologie (Biology) with 180 ECTS credits. Should the module be used in other subjects, there will be two quotas: 95% of places will be allocated to students of the Bachelor's degree subject Biologie (Biology) with 180 ECTS credits and 5% of places (a minimum of one participant in total) will be allocated to students of the Bachelor's degree subject Biologie (Biology) with 60 ECTS credits and to students of the Bachelor's degree subjects Computational Mathematics and Mathematik (Mathematics), each with 180 ECTS credits, as part of the application-oriented subject Biology (as well as potentially to students of other 'importing' subjects). Should the number of places available in one quota exceed the number of applications, the remaining places will be allocated to applicants from the other quota. Should there be, within one module component, several courses with a restricted number of places, there will be a uniform regulation for the courses of one module component. In this case, places on all courses of a module component that are concerned will be allocated in a standardised procedure. In this procedure, applicants who already have successfully completed at least one other module component of the respective module will be given preferential consideration. A waiting list will be maintained and places re-allocated as they become available. Selection process group 1 (95%): Places will primarily be allocated according to the applicants' previous academic achievements. For this purpose, applicants will be ranked according to the number of ECTS credits they have achieved and their average grade of all assessments taken during their studies or of all module components in the subject of Biologie (Biology) (excluding Chemie (Chemistry), Physik (Physics), Mathematik (Mathematics)) at the time of application. This will be done as follows: First, applicants will be ranked, firstly, according to their average grade weighted according to the number of ECTS credits (qualitative ranking) and, secondly, according to their total number of ECTS credits achieved (quantitative ranking). The applicants'

		page 56 / 57	

position in a third ranking will be calculated as the sum of these two rankings, and places will be allocated according to this third ranking. Among applicants with the same ranking, places will be allocated according to the qualitative ranking or otherwise by lot. Selection process group 2 (5%): Places will be allocated according to the following quotas: Quota 1 (50% of places): total number of ECTS credits already achieved in modules/module components of the Faculty of Biology; among applicants with the same number of ECTS credits achieved, places will be allocated by lot. Quota 2 (25% of places): number of subject semesters of the respective applicant; among applicants with the same number of subject semesters, places will be allocated by lot. Quota 3 (25% of places): allocation by lot. Should the module be used only in the Bachelor's degree subject Biologie (Biology) with 180 ECTS credits, places will be allocated according to the selection process of group 1.
